The Ultimate RV Logbook Dec 13 2020 The ultimate log book for RVers who want to keep great records of where they've been! Record campground information like: Hookups available Bathhouse conditions Amenities Road Conditions Campsite conditions Management/Staff Info Booking/Cancellation Notes Local Area Notes Sightseeing Notes and A LOT more! There's even extra space to add your own notes for each site! Great for RVing in: Class A Motorhomes Class C Motorhomes Travel Trailer RV 5th Wheel RV Class B Motorhome Custom Vans This book is an amazing tool for your travel adventures. We, as full-time RVers ourselves, wanted to produce something that would actually be useful for other RV travelers. Our goal was to create a place where you can record all of the great (and sometimes not so great) notes & impressions of your camping spots as you wander about in your RV. We made this book a place to store information but also easily find those notes again later, so we incorporated an easy-to-use referencing system, organized by U.S. state (or you can fill in your own regions). This way, when you need to look back on your notes from two, three, or even 20 years later, you will be able to quickly find them. Here's how to use this book: Log Your Stays: Turn to the first log and start writing! Use our prompted notes and checkoffs to record basic information and then also add your own notes as a refresher for your memory later. We didn't make space for every possible scenario (there are so many!) So, use the extra space to write down anything you think you might want to know later. For instance, you may note more things like low/high water pressure, road noise, or management/staff names & notes. Did you spend way too much on laundry here? Make a note of it! Did you see a sasquatch walk casually through your campground on Friday night? Make a note of it! And share the picture! You did get one, right? Our Referencing System: It's so simple! Let's begin with the Site Logs. Each Site Log has a number in the corner. When you log a campsite, take a second to record that site's Log Number in the back of the book in its reference section. Most reference sections are simply a state. However, some states are larger (and more popular) than others, so we broke them down into smaller regions for even quicker reference. For instance, we've broken Texas down to 5 regions: North, West, Central, Gulf Coast & Panhandle. Maintenance Logs: In the back of the book, there are pages dedicated for recording RV maintenance. Just record the date, service performed, mileage, and any other notes there so you have that information later. Praise for The Ultimate RV Logbook: "In the past, I tried to keep track of campground details using our Google Calendar....but, we've gotten really bad about recording the details. What I really needed was this." ">Let's Travel Family RV Travel Blog "We were keeping similar notes in a blank notebook, but our entries were always inconsistent and we always forgot to note something. With "The Ultimate RV Logbook" we will be able to keep consistent records in neat and organized fashion." - Exploring The Local Life, RV Travel Blog

Once, Only Once, and in the Right Place Dec 01 2019 The usefulness of the U.S. decennial census depends critically on the accuracy with which individual people are counted in specific housing units, at precise geographic locations. The 2000 and other recent censuses have relied on a set of residence rules to craft instructions on the census questionnaire in order to guide respondents to identify their correct "usual residence." Determining the proper place to count such groups as college students, prisoners, and military personnel has always been complicated and controversial; major societal trends such as placement of children in shared custody arrangements and the prevalence of "snowbird" and "sunbird" populations who regularly move to favorable climates further make it difficult to specify ties to one household and one place. *Once, Only Once, and in the Right Place* reviews the evolution of current residence rules and the way residence concepts are presented to respondents. It proposes major changes to the basic approach of collecting residence information and suggests a program of research to improve the 2010 and future censuses.
