City Planning in India, 1947-2017 Aug 09 2020 This book is a comprehensive history of city planning in post-independence India. It explores how the nature and orientation of city planning have evolved in India's changing sociopolitical context over the past hundred or so years. The book situates India's experience within a historical framework in order to illustrate continuities and disjunctions between the pre- and post-independent Indian laws, policies, and programs for city planning and development. It focuses on the development, scope, and significance of professional planning work in the midst of rapid economic transition, migration, social disparity, and environmental degradation. The volume also highlights the need for inclusive planning processes that can provide clean air, water, and community spaces to large, diverse, and fast growing communities. Detailed and insightful, this volume will be of interest to researchers and students of public administration, civil engineering, architecture, geography, economics, and sociology. It will also be useful for policy makers and professionals working in the areas of town and country planning.

Property, Politics, and Urban Planning Sep 29 2019 This book written before the cusp of a waning left-liberal approach to planning issues and a just blossoming neo-Marxist paradigm, reflects the ambivalence of its era. Developments in social and political theory have generated new ways of understanding the role of urban planning in capitalist societies and the emergence of feminist historical frameworks have led Sandercock to reconsider her gender-neutral approach to planning history.

The Individual and the Welfare State Jul 28 2019 Our health, our income and our social networks at older ages are the consequence of what has happened to us over the course of our lives. The situation at age 50+ reflects our own decisions as well as many environmental factors, especially interventions by the welfare state. This book explores the richness of 28,000 life histories in thirteen European countries, collected as part of the Survey of Health, Ageing and Retirement in Europe (SHARE). Combining these data with a comprehensive account of European welfare state interventions provides a unique opportunity to answer the important public policy questions of our time - how the welfare state affects people's incomes, housing, families, retirement, volunteering and health. The overarching theme of the welfare state creates a book of genuinely interdisciplinary analyses, a valuable resource for economists, gerontologists, historians, political scientists, public health analysts, and sociologists alike.

Cape Town Mar 16 2021 This richly illustrated history of Cape Town under Dutch and British rule tells the story of its residents, the world they inhabited and the city they made - beginning in the seventeenth century with the tiny Dutch settlement, hemmed in by mountains and looking out to sea, and ending with the well-established British colonial city, poised confidently on the threshold of the twentieth century. This social history of Cape Town under Dutch and British rule traces the changing character of the city and portrays the varied lives and experiences of its inhabitants e" black and white, rich and poor, slave and free, Christian and Muslim. The story told in these pages is both immensely readable and endlessly interesting, and is sure to remain for long the definitive history of the city. The volume is illustrated throughout with a wealth of paintings, maps and photographs. The book is written for the general reader as well as academics.

The Changing Face of Corporate Ownership Apr 04 2020 This book examines the shareholder activism of institutional investors, and the effect of this

activism on portfolio performance. By focusing on 118 institutional investors headquartered in the United States, the book is unique in addressing the shareholder activism of a large sample. Institutional shareholder activism is defined to include both traditional mechanisms of influence (i.e. filing shareholder proposals) and relationship investing. Institutional owners included private and public pension funds, mutual funds, bank trusts, insurance companies, endowments, and foundations. These institutional owners differ substantially, and these differences lead institutions to use their ownership power to pursue different philosophies and actions. Some institutions follow a passive governance policy, While others adopt an activist role. This book seeks to answer four questions: (1) Are institutional owners actively involved in the strategic affairs of companies in their portfolios? (2) Which forms of activism do institutional owners employ (either confrontational mechanisms, such as filing shareholder proposals, or relationship building mechanisms)? (3) Which forms of activism employed are most effective? and (4) Does the institutional type affect its pursuit of shareholder activism? In answering these questions the author suggests new important results that in many cases are contrary to what prior reports of the activities by a small number of institutional owners may intimate.

The Italian City Republics Apr 16 2021 Daniel Waley and Trevor Dean illustrate how, from the eleventh century onwards, many dozens of Italian

towns achieved independence as political entities, unhindered by any centralising power. Until the fourteenth century, when the regimes of individual 'tyrants' took over in most towns, these communes were the scene of a precocious, and very well-documented, experiment in republican self-government. Focusing on the typical medium-sized towns rather than the better-known cities, the authors draw on a rich variety of contemporary material (both documentary and literary) to portray the world of the communes, illustrating the patriotism and public spirit as well as the equally characteristic factional strife which was to tear them apart. Discussion of the artistic and social lives of the inhabitants shows how these towns were the seed-bed of the cultural achievements of the early Renaissance. In this fourth edition, Trevor Dean has expanded the book's treatment of religion, women, housing, architecture and art, to take account of recent trends in the abundant historiography of these topics. A new selection of illuminating images has been included, and the bibliography brought up to date. Both students and the general reader interested in Italian history, literature and art will find this accessible book a rewarding and fascinating read.
