Successful Tourism Aug 22 2019 Tourism is the world's second largest industry employing on an average one out of twenty adult men and women world-wide and the

ratio is one out of ten when it comes to the developed countries like USA. The growing ranks of international leisure travellers are being influenced by business travellers who, are flooding into India as a result of economic liberalisation. It is thus imperative that our professional tourism corps be trained to meet these exacting requirements. Both in public and private sectors, the increasing understanding of these needs is leading to the development of institutes, training centres and academic programmes in tourism management. There is thus a great need for comprehensive professional literature. This two-volume series volume tells readers all that they want to know about tourism -- its history, networks and intricate operations. Volume Two discusses in detail how different tourism sectors operate and market themselves -- travel agencies, tour operators, hotels, restaurants, airlines -- as well as the impact of changing technology on their activities.

Preventing Tobacco Use Among Youth and Young Adults Jun 12 2021 NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT -- OVERSTOCK SALE -- Significantly reduced list price This Surgeon General s Report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco. This three volume set includes the following items: A booklet containing highlights from the 2012 Surgeon General s report on tobacco use among youth and teens ages 12 through 17 and young adults ages 18 through 26. This booklet provides an overview of tobacco use within this targeted age group. The second booklet is an Executive Summary with two messages. One message from for Kathleen Sebelius, Secretary of Health and Human Services and a second message from Howard Koh, Assistant Secretary of Health and

contains a brief introduction to the set and summary and conclusions for each chapter contained in the final volume. The final volume contains over 800 pages of documentation, interwoven with text and data addressing the adverse health consequences of tobacco use by children and young adults. It includes research on a variety of topics, including nicotine addiction, trends in cigarette smoking among young adults, trends in smokeless tobacco use and cigar smoking over time, genetic factors in tobacco use among youth, and mass media influence on smoking to this age group to name a few. This third volume is rich with table data research findings to support the Surgeon General's concerns with America's use and tobacco. " *Funding a Revolution* Mar 21 2022 The past 50 years have witnessed a revolution in computing and related communications technologies. The contributions of industry and university researchers to this revolution are manifest; less widely recognized is the major role the federal government played in launching the computing revolution and sustaining its momentum. *Funding a Revolution* examines the history of computing since World War II to elucidate the federal government's role in funding computing

research, supporting the education of computer scientists and engineers, and equipping university research labs. It reviews the economic rationale for government support of research, characterizes federal support for computing research, and summarizes key historical advances in which government-sponsored research played an important role. Funding a Revolution contains a series of case studies in relational databases, the Internet, theoretical computer science, artificial intelligence, and virtual reality that demonstrate the complex interactions among government, universities, and industry that have driven the field. It offers a series of lessons that identify factors contributing to the success of the nation's computing enterprise and the government's role within it.

Drawdown May 11 2021 NEW YORK TIMES BESTSELLER For the first time ever, an international coalition of leading researchers, scientists and policymakers has come together to offer a set of realistic and bold solutions to climate change. All of the techniques described here - some well-known, some you may have never heard of - are economically viable, and communities throughout the world are already enacting them. From revolutionizing how we produce and consume food to educating girls in lower-income countries, these are all solutions which, if deployed collectively on a global scale over the next thirty years, could not just slow the earth's warming, but reach drawdown: the point when greenhouse gasses in the atmosphere peak and begin

todecline. So what are we waiting for?

Main Street Oklahoma Oct 04 2020 Oklahoma historian Angie Debo once observed that all the forces of United States history have come to bear in the development of the Sooner State. This collection of essays provides a series of snapshots reflecting both the singularity of the Oklahoma experience and the state's connections to America's broader history. Spanning the Civil War era and the present, this book develops historic themes as varied as the causes of Indian land dispossession, the Statehood Day wedding ceremony, the oil industry's environmental impact, the Tulsa Race Riot, labor relations during the New Deal, the failure of the Equal Rights Amendment, the state's unique Native artistic traditions, and its musical landscape. Oklahomans have always represented multiple races and cultures, lived in big cities or small towns or on farms, and promoted prosperity and cultural achievement while battling poverty and ignorance. The American Main Street has been the site not only of the best principles of community spirit and traditional values but also of shocking cases of prejudice and violence. Rather than shrinking from difficult subjects, Main Street Oklahoma describes the state's abundant human, natural, and cultural resources, paying tribute to the true grit of Oklahomans, but also exploring some of the more troubling moments in Oklahoma's past. The editors and contributors provide engaging perspectives on the

state's rich and diverse history.

Front-of-Package Nutrition Rating Systems and Symbols Oct 28 2022 The federal government requires that most packaged foods carry a standardized label--the Nutrition Facts panel--that provides nutrition information intended to help consumers make healthful choices. In recent years, manufacturers have begun to include additional nutrition messages on their food packages. These messages are commonly referred to as 'front-of-package' (FOP) labeling. As FOP labeling has multiplied, it has become easy for consumers to be confused about critical nutrition information. In considering how FOP labeling should be used as a nutrition education tool in the future, Congress directed the Centers for Disease Control and Prevention to undertake a two-phase study with the IOM on FOP nutrition rating systems and nutrition-related symbols. The Food and Drug Administration is also a sponsor. In Phase 1 of its study, the IOM reviewed current systems and examined the strength and limitations of the nutrition criteria that underlie them. The IOM concludes that it would be useful for FOP labeling to display calorie information and serving sizes in familiar household measures. In addition, as FOP systems may have the greatest benefit if the nutrients displayed are limited to those most closely related to prominent health conditions, FOP labeling should provide information on saturated fats, trans fats, and sodium.

National Association of Broadcasters Engineering Handbook Mar 09 2021 The NAB Engineering Handbook provides detailed information on virtually every aspect of the broadcast chain, from news gathering, program production and postproduction through master control and distribution links to transmission, antennas, RF propagation, cable and satellite. Hot topics covered include HD Radio, HDTV, 2 GHz broadcast auxiliary services, EAS, workflow, metadata, digital asset management, advanced video and audio compression, audio and video over IP, and Internet broadcasting. A wide range of related topics that engineers and managers need to understand are also covered, including broadcast administration, FCC practices, technical standards, security, safety, disaster planning, facility planning, project management, and engineering management. Basic principles and the latest technologies and issues are all addressed by respected professionals with first-hand experience in the broadcast industry and manufacturing. This edition has been fully revised and updated, with 104 chapters and over 2000 pages. The Engineering Handbook provides the single most comprehensive and accessible resource available for engineers and others working in production, postproduction, networks, local stations, equipment manufacturing or any of the associated areas of radio and television.

The Essential Guide to Serial ATA and SATA Express Aug 14 2021 Used in laptop and

desktop computers, low-end servers, and mobile devices, Serial ATA (Advance Technology Attachment), or SATA, is the pervasive disk storage technology in use today. SATA has also penetrated the enterprise computing environment by adding hardware components for fail-over, extending command processing capabilities, and increasing device performance and link speeds. If you work in a data center or manage your company's storage resources, you will likely encounter storage solutions that require SATA software or hardware. In this book, leading storage networking technologist David Deming presents a comprehensive guide to designing, analyzing, and troubleshooting any SATA or SATA Express (SATAe) storage solution. Written by an engineer, this book is for those who aren't afraid of digging into the technical details. It explains how SATA/SATAe powers data center applications and how it influences and interacts with all protocol layers and system components. This book covers all of the tasks associated with installing, configuring, and managing SATA/SATAe storage applications. If you are a test engineer, design engineer, system architect, or even a technically skilled gamer who likes to build your own systems, this book will answer your technical questions about SATA/SATAe. With this book, you should have everything you need to implement a SATA or SATAe storage solution.

Global Innovation Index 2020 Mar 29 2020 The Global Innovation Index 2020 provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges – including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.

The Future of Nursing Jul 13 2021 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance

improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

UML Distilled Sep 15 2021 More than 300,000 developers have benefited from past editions of UML Distilled . This third edition is the best resource for quick, no-nonsense insights into understanding and using UML 2.0 and prior versions of the

UML. Some readers will want to quickly get up to speed with the UML 2.0 and learn the essentials of the UML. Others will use this book as a handy, quick reference to the most common parts of the UML. The author delivers on both of these promises in a short, concise, and focused presentation. This book describes all the major UML diagram types, what they're used for, and the basic notation involved in creating and deciphering them. These diagrams include class, sequence, object, package, deployment, use case, state machine, activity, communication, composite structure, component, interaction overview, and timing diagrams. The examples are clear and the explanations cut to the fundamental design logic. Includes a quick reference to the most useful parts of the UML notation and a useful summary of diagram types that were added to the UML 2.0. If you are like most developers, you don't have time to keep up with all the new innovations in software engineering. This new edition of Fowler's classic work gets you acquainted with some of the best thinking about efficient object-oriented software design using the UML--in a convenient format that will be essential to anyone who designs software professionally.

The International Cocoa Trade Jul 01 2020 First imported to America more than five hundred years ago and propagated on a small scale until the eighteenth century, cocoa is now one of the most heavily traded food commodities in the world. While potentially

very lucrative, trading in cocoa remains a highly complex—and risky—venture, rendered even more so today by a sweeping tide of changes that has dramatically altered its landscape. In *The International Cocoa Trade*, the first comprehensive resource of its kind, commodity expert Robin Dand provides an all-encompassing guide to the global cocoa industry, delineating and clarifying its various intricacies for all who operate and trade within it. Far more sophisticated than it was just a decade ago, the cocoa market has undergone major shifts—low prices, a decrease in the number of companies trading, and an increase in risk levels—that have not only altered the manner in which its key players conduct business, but have necessitated a better grasp of industry fundamentals by all those involved in the production, trading, and distribution of cocoa. As Dand points out, "The requirement of understanding the cocoa trade is not limited to those in the string of buyers and sellers. There are others outside this chain that now have larger roles in cocoa than in the past, in particular the banks, but also the shipping companies and warehousekeepers." In this complete resource, Dand helps all links in this "chain"—exporters, dealers, brokers, bankers—achieve a better understanding of the market by providing a complete and accessible survey of all its essential components. Casting a wide net, *The International Cocoa Trade* offers a wealth of information on a variety of important topics, including the history and

agronomics of cocoa, exchange rules, trading procedures, prices, and contract specifications. Here's where you'll find in-depth coverage of: Cocoa production—its history, evolution, and recent trends Quality assessment—the cut-test, fault definition and standards, methods of achieving quality cocoa The actuals market—export marketing, trade associations, marketing boards, processing Terminal markets—organization of futures markets, players, trading techniques, options, strike prices, regulatory bodies Contracts—weight and delivery terms, physical option contracts, forms and performance Consumption and stocks—the uses of cocoa, factors affecting consumption, assessment of stock levels, visible and invisible stocks, the International Cocoa Organization and the Buffer Stock. Packed with numerous charts, graphs, and tables, and supported by a complete appendix that covers such vital cocoa contracts as AFCC, CAL, and CMAA, *The International Cocoa Trade* provides an up-to-date and incisive overview of a market that has grown and changed considerably over the past few years. An indispensable resource for everyone involved in the international trade of cocoa. "Over the past few years the cocoa market has had to alter its manner of operation. . . . [A]ll those in the chain of trade, from the exporter, dealer, broker through to the factory not only have to improve their understanding of the market but also some of the difficulties faced by others in the commodity. It is hoped

that this book will help all involved in the international trade of cocoa to achieve this."—from the Preface. The first comprehensive guide of its kind, *The International Cocoa Trade* provides an in-depth overview of one of the most heavily traded and lucrative commodities on the market, with complete details on: The history and origins of cocoa Agronomics and production Consumption and stocks Physical and terminal markets Trade and contract rules Quality assessment of beans Cocoa bean processing The manufacture of chocolate.

The Vinyl Dialogues Volume III Feb 26 2020 Full of interviews with the artists who made some of the most memorable - and a few not-so-memorable - albums of the

1970s, the third book in The Vinyl Dialogues series by award-winning journalist Mike Morsch offers more backstories on the music of the decade as told by the artists themselves. Art Garfunkel details how a song written by his former partner Paul Simon made its way onto Garfunkel's solo album "Breakaway" and why the cover photo on that album is still special to him; Daryl Hall reveals what song on "The Silver Album" was considered for the theme song to one of the decade's most famous movies; Natalie Cole, in one of her last interviews, admits that she didn't think she was that great of a singer on her first album; Dionne Warwick confirms that she didn't initially like the song that would eventually become her only No. 1 hit after it appeared on an album by the Spinners; and Kinky Friedman reveals what it's like to fail at something long enough to become a legend. It's all here in "The Vinyl Dialogues Volume III: Stacks of Wax." So take a peek behind the curtain, dust off your wax collection and relive the soundtrack of your life.
