Culture, Ritual and Revolution in Vietnam Feb 08 2021 Originally published in 2002 *Culture, Ritual and Revolution in Vietnam* is a study of the history and consequences of the revolutionary campaign to transform culture and ritual in northern Vietnam. Based upon official documents and several years of field research in Tinh Liet Commune, a Red River delta community near Hanoi, it provides the first detailed account of the nature of revolutionary cultural reforms in Vietnam as how those reforms continue to animate contemporary socio-cultural life. The study examines the key foci of revolutionary cultural change, such as the articulation of a new moral system, the attempts to eliminate explanations that invoke supernatural causality, the creation of socialist weddings and funerals, and the development of innovation ties to commemorate war dead. By examining debates over culture, ritual, and morality that have emerged between residents, notably between men and women, and party members and non-party members, the study shows how ideas and values that preceded the revolution have entered into a creative dialogue with those that were articulated by the revolution, and how this has produced an innovative set of ritual and other practices, particularly since the relaxation of the cultural reform agenda in the post-1986 period.

Revolution at the Grassroots May 31 2020 The book outlines the history of the revolutionary process at the national level and as it was experienced in one major Portuguese city. While generally little known, the achievements of grassroots organizations in Portugal far exceeded those of other developed countries, and their examination provides insights, poses important questions and suggests unexpected answers relevant far beyond Portugal. The Portuguese revolution provides a unique window through which to examine, not only the role of community organizations in a time of revolutionary change, but also the dynamics, potential, and limitations of majority participation. Over a period of nineteen months – beginning with a military coup which ended the longest lasting European dictatorship (the period brought to a close 500 years of colonialism in Africa) and ending with another military coup – the Portuguese society and political debate were significantly transformed, largely by the unanticipated development of mass movements advocating direct democracy and social, economic, and political change.

Battle Tactics of the American Revolution Nov 17 2021 The American Revolution presented a series of unique tactical challenges to its competing factions. For Britain, the Army would be forced to re-learn many of the lessons from the Seven Years' War. After the debacle of Concord and Bunker Hill, the British implemented a range of changes throughout the Army, including the modification of accepted tactical doctrine. Additionally, the British formed alliances with various independent German states. The soldiers they provided thus answered to different armies. How much their tactics adapted during the war, therefore varied from state to state. The Continental Army was founded in 1775 and was initially heavily styled on its British opponents. That began to change in 1778 thanks to the efforts of Prussian officer Baron Friedrich Wilhelm von Steuben. Following their formal alliance with the colonies in 1778, France deployed military assets to North America. French officers also provided tactical advice to the Continental Army, and vice versa, particularly when they worked together successfully during the siege of Yorktown in 1781. Featuring specially commissioned artwork, this absorbing study investigates the various participants' battlefield tactics, casting light on how tactical theory and battlefield experience shaped the conduct of battle in the American Revolution.

Intellectual Foundations of the Nicaraguan Revolution Mar 21 2022 In this critical study of the thought of Augusto Cesar Sandino and his followers, Donald C. Hodges has discovered a coherent ideological thread and political program, which he succeeds in tracing to Mexican

and Spanish sources. Sandino's strong religious inclination in combination with his anarchosyndicalist political ideology established him as a religious seer and moral reformer as well as a political thinker and is the prototype of the curious blend of Marxism and Christianity of the late twentieth-century Nicaraguan government, the Frente Sandinista de Liberación Nacional.

Philosophy and Revolution Nov 24 2019 Few thought systems have been as distorted and sometimes misconstrued as those of Marx and Hegel. *Philosophy and Revolution*, presented here in a new edition, attempts to save Marx from interpretations which restrict the revolutionary significance of the philosophy behind his theory. Developing her breakthrough on Hegel's Absolute Idea, Raya Dunayevskaya, who died in the June of 1987, aims at a total liberation of the human person--not only from the ills of a capitalist society, but also from the equally oppressive state capitalism of established communist governments. She assumes within her theory of class struggle issues as diverse as feminism, black liberation, and even the new nationalism of third world countries. Moreover, Dunayevskaya combines within herself an incorruptible objectivity with a passionate political attitude, making this work a vibrant and concrete discussion of the vicissitudes of society, justice, equality, and existence.

A concluding section analyzes major works of political sociology in the light of contemporary ideas. Many chapters have been revised to include recent data. Origins of the French Revolution Jan 07 2021 First published in 1980, this book rapidly established itself as the indispensable guide to what brought about the French Revolution, and to the debates of historians about the issue. It combined a full critical account of recent controversies with a fresh interpretation taking stock of where the debate had led. Since 1980 discussion among historians has continued as lively as ever, and has moved in directions scarcely explored at that time. The 'revisionist' criticism which destroyed the classic mid-century consensus emphasizing the Revolution's social and economic origins has opened the way to a 'post-revisionist' approach focused on cultural change. This new edition brings the subject up to date with an extensively rewritten survey of the historiography up to the present day, and a revised interpretation modified in the light of research by a new generation of scholars. It will thus remain the starting point for any serious study of the greatest of all revolutions, which lies at the root of the modern political world. 'important book . . . readable and perceptive analysis', *Times Higher*

Chinese Martial Arts Training Manuals Jul 01 2020 Secret training manuals, magic swords, and flying kung fu masters—these are staples of Chinese martial arts movies and novels, but only secret manuals have a basis in reality. Chinese martial arts masters of the past did indeed write such works, along with manuals for the general public. This collection introduces Western readers to the rich and diverse tradition of these influential texts, rarely available to the English-speaking reader. Authors Brian Kennedy and Elizabeth Guo, who coauthor a regular column for Classical Fighting Arts magazine, showcase illustrated manuals from the Ming Dynasty, the Qing Dynasty, and the Republican period. Aimed at fans, students, and practitioners, the book explains the principles, techniques, and forms of each system while also placing them in the wider cultural context of Chinese martial arts. Individual chapters cover the history of the manuals, Taiwanese martial arts, the lives and livelihoods of the masters, the Imperial military exams, the significance of the Shaolin Temple, and more. Featuring a wealth of rare photographs of great masters as well as original drawings depicting the intended forms of each discipline, this book offers a multifaceted portrait of Chinese martial arts and their place in Chinese culture.

The Third Revolution Feb 26 2020 This volume examines the leading professional societies since World War II – those in the free market economies of the United States, Britain, France, West Germany and Japan, and those in the collapsed command economies of East Germany and the Soviet Union. It praises their achievements, but also warns of

the greed and corruption of their elites, asking whether corruption rather than ideology caused the collapse of the Soviet Union and Eastern Europe, and if Anglo-American capitalism is likely to go the same way.

Revolution and Reflection Aug 02 2020 THE PROBLEM AND THE APPROACH
The abortive revolutions of 1848 have been widely regarded by historians as a watershed not only in the political but also in the intellectual development of modern Europe. Before 1848, according to the traditional view, the prevalent climate of opinion was idealistic, hopeful, humane, and progressive. Afterwards, it was empirical, pessimistic, cynical, and obsessed with power. As Hans Kohn put it in his essay "Mid-century: The Turning Point," "In 1848 the foundations of Western civilization—intellectual belief in the objectivity of truth and justice, ethical faith in mercy and tolerance—were still unshaken. . . . In the spring of 1848 mankind was full of glowing hope, but the end of 1848 dashed the hopes, and the century which 1848 inaugurated appears to have led slowly but surely to decay and disaster." 1 Germany, a prime culprit in the debacle which marked the last third of that century, has been seen as the country in which the events of 1848-49 had the most profound impact. Although few

historians have gone as far as Kohn in linking the failures experienced by mid-nineteenth-century Germans to the horrors perpetrated by some of their twentieth-century descendants, it has long been common to think of Germany's response to her defeated revolution as a process of attitudinal preparation for Otto von Bismarck's authoritarian solution to the national question in the period between 1864 and 1871 - which in turn was fraught with ominous long-range significance.

Women's Liberation and the Dialectics of Revolution Dec 26 2019 This collection of 35 years of Dunayevskaya's writings, based on active participation, interviews, and meetings develops the dialectics of revolution which emerges from masses in motion, including not only women and men, but the forces of labour, youth, the black dimension and women's liberation.

Karl Marx's Theory of Revolution III Dec 18 2021 In this third volume of his definitive study of Karl Marx's political thought, Hal Draper examines how Marx, and Marxism, have dealt with the issue of dictatorship in relation to the revolutionary use of force and repression, particularly as this debate has centered on the use of the term "dictatorship of the proletariat." Writing with his usual wit and perception, Draper strips away the layers of misinterpretation and misinformation that have accumulated over the years to show what Marx and Engels themselves really meant by the term.

Historicising the French Revolution May 11 2021 Three decades ago, François Furet famously announced that the French Revolution was over. Napoleon's armies ceased to march around Europe long ago, and Louis XVIII even returned to occupy the throne of his guillotined brother. And yet the Revolution's memory continues to hold sway over imaginations and cultures around the world. This sway is felt particularly strongly by those who are interested in history: for the French Revolution not only altered the course of history radically, but became the fountainhead of historicism and the origin of the historical mentality. The sixteen essays collected in this volume investigate the Revolution's intellectual and material legacies. From popular culture to education and politics, from France and Ireland to Poland and Turkey, from 1789 to the present day, leading historians expose, alongside graduate students, the myriad ways in which the Revolution changed humanity's possible futures, its history, and the idea of history. They attest to how the Revolution has had a continuing global significance, and is still shaping the world today.
