**American Cars, 1946-1959** Aug 05 2020 From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955-1957

Chevrolets, the "Forward Look" Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

*American Cars in Prewar England* Feb 08 2021 After World War I, there was a great hunger for cars in Britain. Many servicemen had learned to drive and had money from their demobilization grants to spend, but British factories were not immediately able to get back into car production so they looked to America for automobiles. In 1919, two out of every five cars on British roads were Fords built in England, and in 1925, General Motors took over British manufacturer Vauxhall. Hudson also became a prolific assembler during this time and Chrysler built an assembly plant in Kew, west of London. This book features numerous photographs and commentary on many makes of American cars that could be seen on British roads before the beginning of World War II. Buick, Cadillac, Chevrolet, Chrysler, Dodge, Durant, Duryea, Essex, Ford, Hudson, Jewett, La Salle, Oldsmobile, Overland, Packard, Plymouth, Saxon, Stanley, Studebaker, Stutz and White are among the manufacturers whose cars are included. The author provides a concise description of each automobile he covers, and points out some interesting features and technical details (horsepower and engine size, for example).
