[Improving Research-Based Knowledge of College Promise Programs](#)

Jun 17 2021 Also known as [free tuition] and [free college] programs, college promise programs are an emerging approach for increasing higher education attainment of people in particular places. To

maximize the effectiveness of their efforts and investments, program leaders and policymakers need research-based evidence to inform program design, implementation, and evaluation. With the goal of addressing this knowledge need, this volume presents a collection of research studies that examine several categories and variations of college promise programs. These theoretically grounded empirical investigations use varied data sources and analytic techniques to examine the effects of college promise programs that have different design features and operate in different places. Individually and collectively, the results of these studies have implications for the design and implementation of promise programs if these programs are to create meaningful improvements in attainment for people from underserved groups. The authors' efforts also provide a useful foundation for the next generation of college promise research.

Building Bilingual Education Systems Mar 27 2022 A collaborative series with the University of Cambridge Faculty of Education highlighting leading-edge research across Teacher Education, International Education Reform and Language Education.

Education in Cambodia Jul 07 2020 This book is the most comprehensive account yet published about the education system in Cambodia. It covers all system levels and draws upon the knowledge and insights of a wide range of leading Cambodian and foreign scholars. The book focuses on how the system has developed and is making progress. Significant achievements over the past two decades are evident, but many problems remain, including the poor quality of teaching, research and institutional management. Under-funding is an ongoing obstacle, but so too is a bureaucratic culture of resistance to

change, a history of weak governance, and an anti-reform sentiment deriving from a teacher-centred and exam-driven curriculum. Achieving international standards must now be the system's highest priority. To this end, the system must rid itself of conservatism, complacency and manipulation by parochial vested interests. [Beyond the Common Core \[Leader's Guide\]](#) Sep 08 2020 Focus your curriculum to heighten student achievement. Learn 10 high-leverage team actions for mathematics instruction and assessment. Discover the actions your team should take before a unit of instruction begins, as well as the actions and formative assessments that should occur during instruction. Examine how to most effectively reflect on assessment results, and prepare for the next unit of instruction.

Young Adult Development at the School-to-Work Transition Jan 25 2022 The school-to-work transition is a critical part of the human life-span for young adults, their families, and society. The timing of the transition varies greatly and its co-occurrence with a number of other life transitions make it challenging to summarize or generalize. Individual differences and normative developmental factors, as well as external contextual factors such as global pandemics, changing economic circumstances, workplace demands, and cultural shifts, intersect to create a range of challenges and opportunities for those navigating this transition. Written by internationally renowned scholars in developmental psychology, applied psychology, counseling, and sociology, the chapters in this book highlight the trends, issues, and actions that researchers, academics, practitioners, and policy makers need to consider in order to effectively support young adults' transition to work pathways. This volume provides an explicitly

international perspective on this area, broad coverage of psychological topics on the school-to-work transition, and an inclusive focus on sub-groups and minority groups, making it a must-read for those who support young adults as they move from school to work.

Adoption and impact of OER in the Global South Sep 01 2022 Education in the Global South faces several key interrelated challenges, for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include: unequal access to education; variable quality of educational resources, teaching, and student performance; and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice and research in developing countries.

7500+ Objective Questions of SSC Reasoning (Chapterwise & Typewise Questions) 1999 to till date - Bilingual Mar 03 2020 Whenever a student decides to prepare for any examination, her/his first and foremost curiosity arises about the type of questions that he/she has to face. This becomes more important in the context of competitive exams where there is a neck-to-neck race. For this purpose, we feel great pleasure to present this book before you. Students must attempt these questions immediately after they complete the chapter in their class/school/home during their preparation.

A Guide to Ontario School Law Oct 29 2019 A Guide to Ontario School Law is a comprehensive, non-partisan, fair-reading of provincial educational statutes, regulations, and relevant policies that will be a first-aid and reference to the lay reader. Our goal is to provide an up-to-date, accessible, and user-friendly guide to various legal parameters for teachers, aspiring teachers, trustees, school administrators, central office administration, parents and interested community members. In particular, the resources and insights in this guide are aimed at helping teacher candidates to develop literacy in educational law and

policy and, ultimately, to successfully transition from teacher education programs into teaching careers.

Palestine (West Bank and Gaza) Education System and Policy Handbook Volume 1 Strategic Information and Developments

Feb 23 2022 Palestine Education System and Policy Handbook
Science Education in Canada Jan 13 2021 This book offers a meso-level description of demographics, science education, and science teacher education. Representing all 13 Canadian jurisdictions, the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada's successes. The book highlights commonalities, consistencies, and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction-specific chapters. Although the analysis indicates a network of policy and practice issues warranting further consideration, the diverse nature of Canadian science education makes simple identification of causal relationships elusive. Canada has a reputation for strong science achievement. However, there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education. This book fills that gap by presenting a thorough description of science education at the provincial/territorial level, as well as a more holistic description of pressing issues for Canadian science education.

Visual and Cultural Identity Constructs of Global Youth and Young Adults May 05 2020 This collection brings together the ideas of key global scholars focusing on the lives of youth and young adults, examining their visual and cultural identity constructs. Embracing an international perspective encompassing the Global North and Global South, chapters explore expressions and performances of youth and young adults as shifting and entangled, in and through the clothed body, gender, sexuality, race, artistic and pedagogical making practices, in spaces and places, framed by new materialism, social media, popular and material culture. The overarching emphasis of the collection is on youth and young adults' strategies for engaging in and with the world, becoming a someone, and belonging, in settings that include a juvenile arbitration program, an artist community, high schools, universities, families and social media. This truly interdisciplinary and international collection will have resonance not just within cultural and media studies, but also in education, anthropology, sociology, gender studies, child and youth studies, visual culture, and communication studies.

Values Education on Human Sexuality Apr 15 2021 SPECIAL QUESTIONS (FOR GRADE 11, THE AGE OF DEEPENING) The book series is all about education in human sexuality, based on the nourishment and cultivation of the natural gift of a person's character. The series is based on the premise that SEXUALITY EDUCATION is, basically, CHARACTER EDUCATION, which in turn is founded on human dignity and encompasses formation in moral standards and human conduct; hence, covering the key elements of "life and love, and everything in between". Comprising an introductory volume for

parents and teachers; a volume for classroom use of teachers; a volume for parents; and eight volumes for Grades 5 to 12, respectively, this current volume is specifically addressed to Grade 6 pupils, about 17 to 18 year olds in their late adolescence. It talks about SPECIAL QUESTIONS: on issues concerning life; sex; marriage; and human identity. Since men and women have been gifted with intellect and will, one becomes highly capable of using well or abusing these powers for the good or damage of self and fellowmen. It is thus extremely important that students at this age have a deep appreciation of the issues confronting the modern world, especially in the realm of sexuality and the channels of its development. The book series is characterized by sound, perennial concepts and by teaching and learning tools geared towards the age group being addressed.

Oxford Textbook of Neurological Surgery Jan 01 2020 Neurosurgery is a rapidly developing and technically demanding branch of surgery that requires a detailed knowledge of the basic neuro-sciences and a thorough clinical approach. The Oxford Textbook of Neurological Surgery is an up-to-date, objective and readable text that covers the full scope of neurosurgical practice. It is part of the Oxford Textbooks in Surgery series, edited by Professor Sir Peter Morris. The book is split into 20 overarching sections (Principles of Neurosurgery, Neuro-oncology of Intrinsic Tumours; Extra-axial Tumours and Skull Lesions; Cerebro-Pontine Angle Tumours; Sellar and Supra-Sellar Tumours; Posterior Fossa Tumours; Pineal tumours; Uncommon Tumours and Tumour Syndromes; Neurotrauma and Intensive Care; Vascular Neurosurgery; Principles of Spinal Surgery; Spinal Pathology; Spinal Trauma; Peripheral Nerve Surgery; Functional Neurosurgery; Epilepsy; Paediatric Neurosurgery; Neurosurgery for Cerebrospinal Fluid Disorders and Neurosurgical Infection). Each section takes a dual approach with, 'Generic Surgical Management' chapters that focus on specific clinical problems facing the neurosurgeon (e.g. sellar/supra-sellar tumour, Intradural Spinal Tumours etc.) and 'Pathology-Specific' chapters (e.g. Glioma, Meningeal Tumours, Scoliosis and Spinal Deformity, Aneurysm etc.). Where appropriate, this division provides the reader with easily accessible information for both clinical problems which present in a regional fashion and specific pathologies. The generic chapters cover aspects such as operative approaches, neuroanatomy and nuances. Specifically each chapter in the book incorporates several strands. Firstly the fundamental neuroscience (anatomy, pathology, genetics etc.) that underlies the clinical practice. Secondly, a review of the requisite clinical investigations (e.g. angiography, electrodiagnostics, radiology). Thirdly, a thorough evidence based review of clinical practice. Following this a consideration of the key debates and controversies in the field with 'pro-' and 'con-' sections (e.g. minimally invasive spine surgery, microsurgical treatment of aneurysms) is provided. A summary of the key papers and clinical scales relevant to neurosurgery form the concluding part. The book is a 'one-stop' text for trainees and consultants in neurosurgery, residents, those preparing for sub-specialty exams and other professionals allied to surgery who need to gain an understanding of the field. It acts as both

a point of reference to provide a focussed refresher for the experienced neurosurgeon as well as a trusted training resource.

Internationaler Stahlvergleich Feb 11 2021 Der Internationale Stahlvergleich ermöglicht auf der Basis von chemischen Analysewerten eine übersichtliche Gegenüberstellung von weltweit über 1.600 Stahlsorten, die mit deutschen und europäischen Erzeugnissen vergleichbar sind. Das zweisprachig (deutsch/englisch) konzipierte Nachschlagewerk wurde grundlegend überarbeitet und stark erweitert und enthält Angaben zu den aktuellen relevanten Normen und Standards. Die jeweilige Europäische Werkstoffnummer dient als Indexziffer für die gesamte Auflistung und für die länderübergreifenden Stahlsorten-Bezeichnungen vergleichbarer chemischer Zusammensetzungen. Aus dem Inhalt: Stahlsortenvergleich mit chemischer Analyse // Werkstoffkurznamen alphanumerisch mit Index-Nummer (EU/DE Werkstoff-Nr.) // Verzeichnis zitierter Werkstoff-Normen (ISO-, EN- und DIN-Normen, Nationale Normen aus China, Indien, Japan, Russland und USA).

Discourses of Globalisation, and the Politics of History School Textbooks Mar 15 2021 This book focuses on discourses of the politics of history education and history textbooks. It offers a new insight into understanding of the nexus between ideology, the state, and nation-building, as depicted in history education and school textbooks. It especially focuses on the interpretation of social and political change, significant events, looking for possible biases and omissions, leadership and the contribution of key individuals, and continuities. The book discusses various aspects of historical narratives, and some selected key events in defining identity and nation-building. It considers the role of historiography in dominant historical narratives. It analyses history education, in both local and global settings, and its significance in promoting values education and intercultural and global understanding. It is argued that historical narratives add pedagogies, grounded in constructivist, metacognitive and transformational paradigms, have the power to engage the learner in significant and meaningful learning experiences, informed by multiple discourses of our historical narratives and those of other nations.

The Palgrave Handbook of Race and Ethnic Inequalities in Education Jul 31 2022 This authoritative, state-of-the-art reference work builds on its first edition to provide a cutting-edge systematic review of the relationship between race/ethnicity and educational inequality. Studying 25 different national contexts drawn from every inhabited continent on earth and building upon material from the earlier edition, the work analyses educational policies, practices and research on minority students, immigrants and refugees. The editors and contributors explore principal research traditions from countries as diverse as Argentina, China, Norway and South Africa, examining the factors promoting social cohesion as well as considerations regarding the use of international test score data. Seamlessly integrating findings of national reviews, the editors and contributors

analyse how national contexts of race/ethnic relations shape the character and content of educational inequalities, and deftly map out new directions for future research in the area. Global in its perspective and definitive in content, this one-stop volume will be an indispensable reference resource for a wide range of academics, students and researchers in the fields of education, sociology, race and ethnicity studies and social policy. Chapter 20 of this book is available open access under a CC BY 4.0 license at SpringerLink (https://link.springer.com/chapter/10.1007/978-3-319-94724-2_20)

India Connected Nov 30 2019 A first-of-its-kind analysis of the growth of new media in Digital India from a broad communications and interdisciplinary perspective Can new media help in bringing about development or contribute to social movements? Who is left out of the new media equation? How is the public sphere affected by it? How will it be regulated? Providing answers to these important questions, this book critically examines the growth of new media in India. It looks at how new media can be theorized in the Indian context and offers a perspective on the opportunities and challenges this poses to governance, development, and businesses as well as in social marketing efforts. With the government and the corporate sector's growing emphasis on 'Digital India', India Connected creatively delves into various aspects such as digitization, convergence, interactivity, and ubiquity, which are affecting the Indian media landscape.

Quarterly Review of Distance Education May 17 2021 The Quarterly Review of Distance Education is a rigorously refereed journal publishing articles, research briefs, reviews, and editorials dealing with the theories, research, and practices of distance education. The Quarterly Review publishes articles that utilize various methodologies that permit generalizable results which help guide the practice of the field of distance education in the public and private sectors. The Quarterly Review publishes full-length manuscripts as well as research briefs, editorials, reviews of programs and scholarly works, and columns. The Quarterly Review defines distance education as institutionally-based formal education in which the learning group is separated and interactive technologies are used to unite the learning group.

OECD Reviews of Vocational Education and Training A Skills beyond School Review of Kazakhstan Apr 27 2022 This report on vocational education and training programmes in Kazakhstan examines how employers and unions can be engaged, how workbased learning can be used and how teachers and trainers can be prepared.

Research for Educational Change Nov 03 2022 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research-generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the

first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data, collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research-generated insights have a tangible, beneficial impact on what is happening in mathematical classrooms. Combining two discourses – that of researchers speaking to one another, and that of researchers communicating their insights to those responsible for educational practice – the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and undergraduate students interested in educational research.

Policies and Politics of Teaching Religion Jun 05 2020 In states in which the public role of religion is controversial, religious instruction becomes both a means and an end of politics. This groundbreaking collection of case studies drawn from Arab, Asian and European countries examines different aspects of religious instruction: how it is regulated, who decides its content, the values it imparts and, in particular, whether it triggers, deepens or reduces conflict.

Postphenomenological Methodologies Sep 20 2021 This volume contributes to postphenomenological research into human-technology relations with essays reflecting on methodological issues through empirical studies of education, digital media, biohacking, health, robotics, and skateboarding. This work provides new perspectives that call for a comprehensive postphenomenological research methodology.

Handbook of Teen and Novice Drivers Oct 22 2021 Despite a growing body of research and targeted remediation, teenage and novice drivers continue to be six to nine times more likely to die in a crash than they are when they are just a few years older. The World Health Organization reports that road traffic injuries are the leading cause of death globally among 15 to 19 year olds. In light of these crash statistics, understanding the teen driver problem remains of paramount public health importance around the world. The Handbook of Teen and Novice Drivers: Research, Practice, Policy, and Directions provides critical knowledge for a broad range of potential readers, including students, teachers, researchers in academics, industry and the federal government, public policy makers at all levels, insurance companies and automobile manufacturers, driving instructors, and parents and their teens.

Identity and Symbolic Interaction Jul 27 2019 This book examines identity theory's centrality within social psychology and its foundations within structural symbolic interaction, highlighting its links not only to other prominent sociological subfields, but also to other theoretical

perspectives within and beyond sociology. The book provides a synthetic overview outlining the intellectual lineage of identity theory within structural symbolic interactionism, and how the “Indiana School” of identity theory and research, associated especially with Sheldon Stryker, relates to other symbolic interactionist traditions within sociology. It also analyses the latest developments in response to the push to integrate identity theory, which initially focused on role identities, with the study of personal, group and social identities. Further, it discusses the relationship between identity theory and affect control theory, providing a sense of the many substantive topics within sociology beyond social psychology for which the study of identity has important, sometimes underappreciated implications. The book concludes with a chapter summarizing the interrelated lessons learned while also reflecting on remaining key questions and challenges for the future development of identity theory.

Education during the Time of the Revolution in Egypt Jun 29 2022

Since the 25th January 2011 revolution, Egyptians experienced and engaged in a daily debate. Controversially, some argued that the conflict and revolts in Egypt, and the Arab region, were neither coincidental, nor the result of a “domino effect” of collective actions by oppressed people against autocratic regimes. Rather, these revolts were the result of mobilization efforts made over decades by several activist groups, as well as national and international non-governmental organizations. Contrary to this view, others claim that despite the rapid economic growth of Egypt in the 2000s, there was a wide gap in the distribution of wealth and economic return, which left the majority of Egyptians suffering from poverty and high rate of unemployment, especially among youth. Obviously, while national and international economic and political dynamics dominated the daily debate, education remains the forgotten arena amidst conflict. With the exacerbation of conflict between militant extremists and modern states in the region, and most recently in many European countries, it became more important than ever before to understand the dialectics of education in conflict in different local contexts, starting in this book by the Egyptian context. The book focuses on education in Egypt during the time of the revolution as perceived by university students, youth activists, educational professionals, government officials and civil society organizations. Its chapters reveal the tension, contradiction and/or coherence among different players as related to their respective role in education for civic engagement, national identity, global citizenship, peace-building, teacher professional development, and women's and students' empowerment. The book illustrates the dialectics of education in conflict by articulating diverse meanings and perspectives given by Egyptian stakeholders when describing their actions and reality(ies) during the time of the revolution and its aftermath.

Science Education in Countries Along the Belt & Road Nov 22 2021 This book aims to highlight science education in countries along the Belt and Road. It consists of 30 chapters divided into three main parts, namely Arab and African countries, Asian countries and

European countries,. We invited science education experts from 29 "Belt and Road" countries to introduce the current status of science education in their countries and the new requirements with the rapid evolution of Information Technology. The major contributions of this book include: 1) Provide the current status of science education in countries along the Belt and Road as well as the requirement for developing and improving science education in these countries; 2) Discuss new insights of science education in future years; 3) Inspire stakeholders to take effective initiatives to develop science education in countries along the Belt and Road. .

Digital Governance of Education Dec 24 2021 Digital Governance of Education explores the multiple ways in which digital technologies are changing the experience of education. With much of the contemporary education practice either taking place or being documented digitally, a huge amount of data is constantly being collected and analysed to give sophisticated and up-to-date accounts of education practice in contemporary societies. Such 'datafication' of education, mediated through technology, gives rise to what the author defines as 'digital governance' of education - a transnational assemblage of people, technologies and policies that increasingly affects how national education systems are organized and managed. Paolo Landri argues that the emergence of digital governance is closely related to the new wave of standardization in education, exemplified by the shift towards what is measurable (for example focus on 'learning outcomes') and towards transparency in education practice - a shift that is both facilitated and augmented by digital technologies. The author places the digital governance of education within the framework of Europeanization of education, exploring how it contributes to the creation and regulation of European education arena through consolidation of digital space and tools introduced in this process (such as guidelines, country reports and online dashboards). Adopting a sociomaterial approach to education policy and drawing on actor-network theory, Paolo Landri uses empirical data to investigate how the digitization of education policy and practice is occurring in Italy, and to what extent it contributes to the growth of the digital governance of education. Pointing out the variety of risks and opportunities, he indicates future directions of critical research and the wider international implications of this global trend.

Oxford Textbook of Oncology Apr 03 2020 This textbook provides current information on best practice in multidisciplinary cancer care. Divided into six sections, the contributors look at the aetiology of cancer, patient care, population health and the management of specific types of disease. Written and edited by internationally recognised leaders in the field, the new edition of the Oxford Textbook of Oncology has been fully revised and updated, taking into consideration the advancements in each of the major therapeutic areas, and representing the multidisciplinary management of cancer. Structured in six sections, the book provides an accessible scientific basis to the key topics of oncology, examining how cancer cells grow and function, as well as discussing the aetiology of cancer, and the general principles governing modern approaches to oncology treatment. The book examines the challenges presented by the treatment of cancer on a larger scale within population groups, and the importance of recognising and supporting the needs of individual patients, both during and after treatment. A series of disease-oriented, case-based chapters, ranging from acute leukaemia to colon cancer, highlight the various approaches available for managing the cancer patient, including the translational application of cancer science in order to personalise treatment. The advice imparted in these cases has relevance worldwide, and reflects a modern approach to cancer care. The Oxford Textbook of Oncology provides a comprehensive account of the multiple aspects of best practice in the discipline, making it an indispensable resource for oncologists of all grades and subspecialty interests. Review: Each chapter is nicely illustrated with schemes, cartoons and images. The text, although written by top oncologists, is readily understandable for a non-expert. Thus, the textbook will no doubt be appreciated by a broader audience. * Recent Patents on Anti-Cancer Drug Discovery Vol. 11 Issue No. 4, Alexander Shtil * I recommend this book highly to all oncology and oncologists in training as a thorough, informative, and readable reference. Every large intuitional library and every oncology library should have it. * NEJM,

2002 * This comprehensive textbook of oncology is the first new major textbook on cancer to appear in a decade and is designed for a broad audience of clinicians, oncologists in training, and academics. The coverage is comprehensive...The overall appearance of the book is outstanding. It is a welcome combination of epidemiology, aspects of basic science, pharmacology and radiation therapy that trainees will find a nice change...should enjoy a wide readership...because of its appealing design and comprehensive approach to oncology. It is the most user-friendly comprehensive text currently available. The pathology, basic science, epidemiology, and radiation therapy sections are all presented with extreme clarity. * Doody's Journal, 2002 * A landmark reference...It sets new standards for publishing in oncology offering a ground-breaking innovative approach to the field combined with the quality, accuracy, and intellectual rigour you have come to expect from the world's most prestigious reference publisher. * Biomedicine and Pharmacotherapy, 2002 * Under new editorship, the second edition is far more than an updated version of the first...the prose in the Oxford Textbook is exemplary...this textbook is unique among its peers in giving the sense that the authors are addressing the reader personally...an exception level of quality...Respect for the evidence-based medicine is apparent throughout the text...illustrative and anatomical drawing...of remarkable high quality...excellent discussion of doctor-patient communication in relation to genetic counselling, psychological issues, and terminal cancers. * JAMA, Volume 287, Issue 24, 2002 * The Oxford Textbook of Oncology covers virtually the entire spectrum of malignant diseases in adults and children. It meets very high editorial and production standards: the organization, illustrations, and eye-pleasing typography are outstanding... I have high praise for this textbook. * NEJM, Volume 347, Number 2, 2002 * Review from previous edition The Oxford

Textbook of Oncology is a classic and fresh approach to the field. It is a must for all libraries and all those who like to have a single up-to-date reference book that contains sufficient detail for the clinician in all subspecialties: surgery and chapters are sufficiently detailed to provide a reference for trainees in the field. * Oncology, Volume 63, 2002 * The Oxford Textbook of Oncology is what it is meant to be: a textbook with comprehensive information of the actual status of oncology... an indispensable and attractive source of information. * Professor Jaak Ph. Janssens, European Journal of Cancer Prevention * This volume provides a comprehensive account of the multiple aspects of best practice in the discipline, making it an indispensable resource for oncologists of all grades and subspecialty interests. * Anticancer Research Vol. 36 (2016) * An outstanding gift to the international scientific community... The new textbook is an excellent demonstration of this multifaceted and astonishingly variable problem, as well as of the latest achievements in its understanding and practical management. * Alexander A. Shtil, Recent Patents on Anticancer Drug Discovery * I would recommend anyone considering buying an oncology textbook, and particularly those who work in oncology support services, to consider this textbook as it is well set out, easy to read, easy to comprehend, and covers all of the important aspects of modern day oncology. * Dr Andrew Davies, Consultant in Palliative Medicine, Royal Surrey County Hospital; Review for Supportive Care in Cancer * [Ableism in Education: Rethinking School Practices and Policies \(Equity and Social Justice in Education\)](#) Aug 08 2020 How we organize children by ability in schools is often rooted in ableism. Ability is so central to schooling—where we explicitly and continuously shape, assess, measure, and report on students' abilities—that ability-based decisions often appear logical and natural. However, how schools respond to ability results in very real, lifelong social and economic

consequences. Special education and academic streaming (or tracking) are two of the most prominent ability-based strategies public schools use to organize student learning. Both have had a long and complicated relationship with gender, race, and class. In this down-to-earth guide, Dr. Gillian Parekh unpacks the realities of how ability and disability play out within schooling, including insights from students, teachers, and administrators about the barriers faced by students on the basis of ability. From the challenges with ability testing to gifted programs to the disability rights movement, Parekh shows how ableism is inextricably linked to other forms of bias. Her book is a powerful tool for educators committed to justice-seeking practices in schools.

Law, Society and Transition in Myanmar Jul 19 2021 This edited volume addresses the dynamics of the legal system of Myanmar/Burma in the context of the dramatic but incomplete transition to democracy that formally began in 2011. It includes contributions from leading scholars in the field on a range of key legal issues now facing Myanmar, such as judicial independence, constitutional law, human rights and institutional reform. It features chapters on the legal history of Myanmar; electoral reform; the role of the judiciary; economic reforms; and the state of company law. It also includes chapters that draw on the experiences of other countries to contextualise Myanmar's transition to democracy in a comparative setting, including Myanmar's participation in regional bodies such as ASEAN. This topical book comes at a critical juncture in Myanmar's legal development and will be an invaluable resource for students and teachers seeking greater understanding of the legal system of Myanmar. It will also be vital reading for a wide range of government, business and civil society organisations seeking to re-engage with Myanmar, as it navigates a difficult transition toward democracy and the rule of law.
