The Economics of Property-Casualty Insurance Aug 28 2019 The Economics of Property-Casualty Insurance presents new research and findings on key aspects of the economics of the property-casualty insurance industry. The volume explores the industrial organization, regulation, financing, and taxation of this business. The first paper, on external financing and insurance cycles, contains a wealth of information on trends and patterns in the industry's financial structure. The last essay, which compares performance of stock and mutual insurance companies, takes a fresh look at the way a company's organizational structure affects its responses to different economic situations. Two papers focus on rate regulation in the auto insurance industry, and provide broad overviews of the structure and economics of the insurance industry as a whole. Also addressed are the system of regulating insurance companies in the United States, who insures the insurers, and the effects of tax law changes in the 1980s on the prices of insurance policies.

Spaces Speak, Are You Listening? May 06 2020 How we experience space by listening: the concepts of aural architecture, with examples ranging from Gothic cathedrals to surround sound home theater. We experience spaces not only by seeing but also by listening. We can navigate a room in the dark, and "hear" the emptiness of a house without furniture. Our experience of music in a concert hall depends on whether we sit in the front row or under the balcony. The unique acoustics of religious spaces acquire symbolic meaning. Social relationships are strongly influenced by the way that space changes sound. In *Spaces Speak, Are You Listening?*, Barry Blesser and Linda-Ruth Salter examine auditory spatial awareness: experiencing space by attentive listening. Every environment has an aural architecture. The audible attributes of physical space have always contributed to the fabric of human culture, as demonstrated by prehistoric multimedia cave paintings, classical Greek open-air theaters, Gothic cathedrals, acoustic geography of French villages, modern music reproduction, and virtual spaces in home theaters. Auditory spatial awareness is a prism that reveals a culture's attitudes toward hearing and space. Some listeners can learn to "see" objects with their ears, but even without training, we can all hear spatial geometry such as an open door or low ceiling. Integrating contributions from a wide range of disciplines—including architecture, music, acoustics, evolution, anthropology, cognitive psychology, audio engineering, and many others—*Spaces Speak, Are You Listening?* establishes the concepts and language of aural architecture. These concepts provide an interdisciplinary guide for anyone interested in gaining a better understanding of how space enhances our well-being. Aural architecture is not the exclusive domain of specialists. Accidentally or intentionally, we all function as aural architects.

Class Actions in Europe May 18 2021 Not so long ago, class actions were considered to be a textbook example of American exceptionalism; many of their main features were assumed to be incompatible with the culture of the civil law world. However, the tide is changing; while there are now trends in the USA toward limiting or excluding class actions, notorious cases like *Dieseltgate* are moving more and more European jurisdictions to extend the reach of their judicial collective redress mechanisms. For many new fans of class actions, collective redress has become a Holy Grail of sorts, a miraculous tool that will rejuvenate national systems of civil justice and grant them unprecedented power. Still, while the introduction of various forms of representative action has virtually become a fashion, it is anything but certain that attempting to transplant American-style class action will be successful. European judicial structures and legal culture(s) are fundamentally different, which poses a considerable challenge. This book investigates whether class actions in Europe are indeed a Holy Grail or just another wrong turn in the continuing pursuit of just and effective means of protecting the rights of citizens and businesses. It presents both positive and critical perspectives, supplemented by case studies on the latest collectivization trends in Europe's national civil justice systems. The book also shares the experiences of some non-European jurisdictions that have developed promising hybrid forms of collective redress, such as Canada, Brazil, China, and South Africa. In closing, a selection of topical international cases that raise interesting issues regarding the effectiveness of class actions in an international context are studied and discussed.

How to Pinstripe Jul 28 2019 Even before the heyday of Von Dutch and Big Daddy, the ultimate way to personalize your car or motorcycle was to lay some wicked lines on top of the paintwork. Done with a steady hand and an eye for style, pinstripes speak volumes. In *How to Pinstripe*, acclaimed veteran striper Alan Johnson teaches you everything you need to know to get started, to further your mastery of the form, or to simply understand how a good design comes together. Following a primer on the history and evolution of pinstriping, this book launches into a step-by-step guide to the pinstriping process--from choosing paint and brushes that suit your style and abilities, to preparing surfaces, experimenting with symmetrical and asymmetrical designs, striping freehand, and using grids and patterns. While stressing the importance of finding your own style and having fun with the hobby, Johnson also explains the basics of color theory and unique considerations for antique and classic cars, hot rods and customs, and motorcycles. For more advanced pinstripers, there's also tried-and-true advice on apprenticing and working car shows. Illustrated with color photography throughout, *How to Pinstripe* is the perfect source for beginners and veterans alike.

Criminal Capital Feb 01 2020 *Criminal Capital* is an engaging but authoritative account of how financial structures and products can and are being used to evade proper scrutiny and enable criminal activity and what can be done about it. Based on the analysis of the financial methods that are frequently used by criminals, it deals with the widespread abuse of financial systems.

Go Fast Or Go Home Aug 09 2020 "Garth Hogan is a man who has lived life the fast lane. [He became] the first New Zealander to drive at more than 200 miles per hour, something he achieved at "Thunderpark," Hastings in 1978 ... [30 years later] his Ford Roadster set a record when it clocked 193 miles per hour. While Garth's life in motor racing is well documented, perhaps less known are his business achievements, his passion for vintage and warbird aircraft, and his involvement with the governing body of world motorsport - the FIA"--Back cover.
