Writers of the Black Chicago Renaissance Sep 15 2021 Writers of the Black Chicago Renaissance comprehensively explores the contours and content of the Black Chicago Renaissance, a creative movement that emerged from the crucible of rigid segregation in Chicago's "Black Belt" from the 1930s through the 1960s. Heavily influenced by the Harlem Renaissance and the Chicago Renaissance of white writers, its participants were invested in political activism and social change as much as literature, art, and aesthetics. The revolutionary writing of this era produced some of the first great accolades for African American literature and set up much of the important writing that came to fruition in the Black Arts Movement. The volume covers a vast collection of subjects, including many important writers such as Richard Wright, Gwendolyn Brooks, and Lorraine Hansberry as well as cultural products such as black newspapers, music, and theater. The book includes individual entries by experts on each subject; a discography and filmography that highlight important writers, musicians, films, and cultural presentations; and an introduction that relates the Harlem Renaissance, the white Chicago Renaissance, the black Chicago Renaissance, and the Black Arts Movement. Contributors are Robert Butler, Robert H. Cataliotti, Maryemma Graham, James C. Hall, James L. Hill, Michael Hill, Lorraine King, Lawrence Jackson, Angelene Jamison-Hall, Keith Leonard, Lisbeth Lipari, Bill V. Mullen, Patrick Naick, William R. Nash, Charlene Register, Kimberly Ruffin, Elizabeth Schultz, Joyce Hope Scott, James Smethurst, Kimberly M. Stanley, Kathryn Waddell Takara, Steven C. ***Paving the Way for Reagan*** Jul 21 2019 From 1964 to 1980, the United States was buffeted by a variety of international crises, including the nation's defeat in Vietnam, the growing aggression of the Soviet Union, and Washington's inability to free the fifty two American hostages held by Islamic extremists in Iran. Through this period and in the decades that followed, *Commentary*, *Human Events*, and *National Review* magazines were critical in supporting the development of GOP conservative positions on key issues that shaped events at home and abroad. These publications and the politicians they influenced pursued a fundamental realignment of US foreign policy that culminated in the election of Ronald Reagan. *Paving the Way for Reagan* closely examines the ideas and opinions conveyed by the magazines in relationship to their critiques of the dominant liberal foreign policy events of the 1960s and 1970s. Revealed is how the journalists' key insights and assessments of the US strategies on Vietnam, China, the Strategic Arms Limitations Talks (SALT), the United Nations, the Panama Canal, Rhodesia, and the Middle East applied pressure to leaders on the Right within the GOP who they believed were not being faithful to conservative principles. Their views were ultimately adopted within the conservative movement, and subsequently, helped lay the foundation for Reagan's "peace through strength" foreign policy. Incorporating primary sources and firsthand accounts from writers and editors, Jurdem provides a comprehensive analysis of how these three publications played a fundamental role influencing elite opinion for a paradigm shift in US foreign policy during this crucial sixteen-year period.

***The Global Culture of Bullying*** Oct 24 2019 This book explicates "bullying" as a concept and as a social and cultural phenomenon that has become a defining reality of the times in which we live. The author begins in the arena where it is first, and most acutely individually, experienced—in school—and expands to other institutions and areas of social life—the family, the workplace, and the local, national, and international spheres, extending the concept of bullying to the global arena to uncover the social and institutional root causes of the extreme forms of bullying such as trafficking, torture, terrorism, and genocide. The book discusses the steps taken to address these issues and analyzes their efficacy. It explores the concept of epigenetics, brain development, childhood experiences, and other psychological factors that contribute to bullying behaviors and predispositions. The book investigates and compares anti-bullying and anti-violence initiatives taken particularly in the U.S, the U.K., and India to address the issue and create community-wide resilience practices. It also describes the current trends in decisions from international, regional, and domestic law, and offers evidence-based policy recommendations to establish a culture of respect for human dignity. An interdisciplinary, intercultural exploration, and analysis of the phenomenon of bullying, this book will be of interest to students, teachers, and researchers of psychology, sociology, anthropology, social justice and law, human rights, and cultural studies. It will also be useful for academic libraries, academicians, policy planners, school administration, government officials, and readers interested in reading about bullying.

***Beyond Territoriality*** Sep 03 2020 This book traces the evolution of transnational legal authority in the course of globalization. Representative case studies buttress its conclusion that today transnational authority is multifaceted, a phenomenon that renders unreliable the concepts of territoriality/extraterritoriality as global governance markers.

***Non-State Actors in International Law*** Nov 24 2019 The role and position of non-state actors in international law is the subject of a long-standing and intensive scholarly debate. This book explores the participation of this new category of actors in an international legal system that has historically been dominated by states. It explores the most important issues, actors and theoretical approaches with respect to these new participants in international law. It provides the reader with a comprehensive and state-of-the-art overview of the most important legal and political developments and perspectives. Relevant non-state actors discussed in this volume include, in particular, international governmental organisations, international non-governmental organisations, multinational companies, investors and armed opposition groups. Their legal position is considered in relation to specific issue-areas, such as humanitarian law, human rights, the use of force and international responsibility. The main legal theories on non-state actors' position in international law – neo-positivism, the policy-oriented approach and transnational law – are covered at the beginning of the book, and the essential political science perspectives – on non-state actors' role in international politics and globalisation, as well as their soft power – are presented at the end.
