Imperialism: The Highest Stage of Capitalism Mar 29 2022 Vladimir Lenin created this hugely significant Marxist text to explain fully the inevitable flaws and destructive power of Capitalism: that it would lead unavoidably to imperialism, monopolies and colonialism. He prophesied that those third world countries used merely as capitalist labour would have no choice but to join the Communist revolution in Russia. GREAT IDEAS. Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.

The Changing Face of Imperialism Sep 03 2022 This volume reiterates the relevance of imperialism in the present, as a continuous arrangement, from the early years of empire-colonies to the prevailing pattern of expropriation across the globe. While imperialism as an arrangement of exploitation has sustained over ages, measures deployed to achieve the goals have gone through variations, depending on the network of the prevailing power structure. Providing a historical as well as a conceptual account of imperialism in its 'classical' context, this collection brings to the fore an underlying unity which runs across the diverse pattern of imperialist order over time. Dealing with theory, the past and the contemporary, the study concludes by delving into the current conjuncture in Latin America, the United States and Asia. The Changing Face of Imperialism will provide fresh ideas for future research into the shifting patterns of expropriation - spanning the early years of sea-borne plunder and the empire-colonies of nineteenth-century to contemporary capitalism, which is rooted in neoliberalism, globalization and free market ideology. With contributions from major experts in the field, this book will be a significant intervention. It will be of interest to scholars and researchers of economics, politics, sociology and history, especially those dealing with imperial history and colonialism.

An Analysis of John A. Hobson's Imperialism Nov 05 2022 English economist John Hobson's 1902 *Imperialism: A Study* was an epoch-making study of the politics and economics of imperialism that shook imperialist beliefs to their core. A committed liberal, Hobson was deeply sceptical about the aims and claims of imperialistic thought at a time when Britain's empire held sway over a vast portion of the globe. In order to critique what he saw as a falsely reasoned and immoral political view, Hobson's book took a cuttingly analytical approach to the idea of imperialism - setting out to dissect and understand the arguments for empire before subjecting them to withering evaluation - a process that led him to the key insight that the then widely-accepted claim that imperialism was essentially a question of nationalism was, in fact, quite weak. Instead, Hobson's close analysis of the implicit and hidden reasons for imperialist projects demonstrated that, at root, they were all products of capitalism. It became increasingly clear to him that imperialism was less a political ideology, and more the product of the urgent need to open up new markets and remedy economic stagnation at home. Deeply provocative at the time, Hobson's book shows just how powerful the critical

thinking skills of analysis and evaluation can be when applied to deconstruction of even the most widely accepted of ideas.

Empires Aug 10 2020 Although empires have shaped the political development of virtually all the states of the modern world, "imperialism" has not figured largely in the mainstream of scholarly literature. This book seeks to account for the imperial phenomenon and to establish its importance as a subject in the study of the theory of world politics. Michael Doyle believes that empires can best be defined as relationships of effective political control imposed by some political societies—those called metropolises—on other political societies—called peripheries. To build an explanation of the birth, life, and death of empires, he starts with an overview and critique of the leading theories of imperialism. Supplementing theoretical analysis with historical description, he considers episodes from the life cycles of empires from the classical and modern world, concentrating on the nineteenth-century scramble for Africa. He describes in detail the slow entanglement of the peripheral societies on the Nile and the Niger with metropolitan power, the survival of independent Ethiopia, Bismarck's manipulation of imperial diplomacy for European ends, the race for imperial possession in the 1880s, and the rapid setting of the imperial sun. Combining a sensitivity to historical detail with a judicious search for general patterns, *Empires* will engage the attention of social scientists in many disciplines.

Imperialism in the Twenty-First Century Nov 24 2021 Winner of the first Paul A. Baran-Paul M. Sweezy Memorial Award for an original monograph concerned with the political economy of imperialism, John Smith's *Imperialism in the Twenty-First Century* is a seminal examination of the relationship between the core capitalist countries and the rest of the world in the age of neoliberal globalization. Deploying a sophisticated Marxist methodology, Smith begins by tracing the production of certain iconic commodities—the T-shirt, the cup of coffee, and the iPhone—and demonstrates how these generate enormous outflows of money from the countries of the Global South to transnational corporations headquartered in the core capitalist nations of the Global North. From there, Smith draws on his empirical findings to powerfully theorize the current shape of imperialism. He argues that the core capitalist countries need no longer rely on military force and colonialism (although these still occur) but increasingly are able to extract profits from workers in the Global South through market mechanisms and, by aggressively favoring places with lower wages, the phenomenon of labor arbitrage. Meticulously researched and forcefully argued, *Imperialism in the Twenty-First Century* is a major contribution to the theorization and critique of global capitalism.

Imperialism Aug 02 2022 John Atkinson Hobson (1858 - 1940) was an English social scientist and economist most famous for his work on imperialism—which notably had an influence on Vladimir Lenin—as well as his theory of underconsumption. His early work also questioned the classical theory of rent and predicted the Neoclassical "marginal productivity" theory of distribution. In Hobson's seminal study "Imperialism - A Study", he explores the roles of patriotism, philanthropy, and the spirit of adventure in the light of modern imperialism. This fascinating and influential study is highly recommended for those with an interest in history and social science. Contents include: "The Economics of Imperialism" and "The Politics of Imperialism". Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this volume now in an affordable, modern, high-quality edition complete with an excerpt from "Imperialism, The Highest Stage of Capitalism" by V. I. Lenin.

The Shadows of Empire Oct 24 2021 A masterful, thought-provoking, and wide-ranging study of how the vestiges of the imperial era shape society today. In this groundbreaking narrative, *The Shadows of Empire* explains (in the vein of *The Silk Roads* and *Prisoners of Geography*) how the world's imperial legacies still shape our lives—as well as the thorniest issues we face today. For the first time in millennia we live without formal empires. But that doesn't mean we don't feel their presence rumbling through history. From Russia's incursions in the Ukraine to Brexit; from Trump's America-First policy to China's forays into Africa; from Modi's India to the hotbed of the Middle East, Samir Puri provides a bold new framework for understanding the world's complex rivalries and politics. Organized by region, and covering vital topics such as security, foreign policy, national politics and commerce, *The Shadows of Empire* combines gripping history and astute analysis to explain why the history of empire affects us all in profound ways; it is also a plea for greater awareness, both as individuals and as nations, of how our varied imperial pasts have contributed to why we see the world in such different ways.

Islamic Imperialism Jul 09 2020 From the first Arab-Islamic Empire of the mid-seventh century to the Ottomans, the last great Muslim empire, the story of the Middle East has been the story of the rise and fall of universal empires and, no less important, of imperialist dreams. So argues Efraim Karsh in this highly provocative book. Rejecting the conventional Western interpretation of Middle Eastern history as an offshoot of global power politics, Karsh contends that the region's experience is the culmination of long-existing indigenous trends, passions, and patterns of behavior, and that foremost among these is Islam's millenarian imperial tradition. The author explores the history of Islam's imperialism and the persistence of the Ottoman imperialist dream that outlasted World War I to haunt Islamic and Middle Eastern politics to the present day. September 11 can be seen as simply the latest expression of this dream, and such attacks have little to do with U.S. international behavior or policy in the Middle East, says Karsh. The House of Islam's war for world mastery is traditional, indeed venerable, and it is a quest that is far from over.

The Fiction of Imperialism Dec 14 2020 This book examines a range of fiction and criticism as it pertains to colonialism, the North/South engagement and contemporary Third World politics. The Fiction of Imperialism attempts to promote dialogue between international relations and postcolonialism. It addresses the value of fiction to an understanding of the imperial relationship between the West and Asia and Africa. A wide range of fiction and criticism is examined as it pertains to colonialism, in North/South engagement and contemporary Third World politics. The book begins by contrasting the treatment of cross-cultural relations in political studies and literary texts. It then examines the personal as a metaphor for the political in fiction depicting the imperial connection between Britain and India. This is paired with an analysis of African literary texts which takes as its theme the relationship between culture and politics. The concluding chapters approach literature from the outside, considering its apparent silence on economics and realpolitik, and assessing the utility of postcolonial reconceptualization.-- Renewal of interest in imperialism and literary texts about imperialism-- Examines a range of fiction and criticism as it pertains to colonialism, the North/South engagement and contemporary Third World politics.-- First volume in a new series which deals with the differences between culture and politics as well as in ways of seeing and the sources that can be drawn on.

Colonization Nov 12 2020 This is an extremely wide-ranging and interdisciplinary survey of colonization from its origins to the post-colonial world. Original and lively, it offers the student: * a wide focus featuring Africa, America, Asia, Australia, Europe, Japan and the USSR * an interpretation drawn from cultural and social history, with sections on myth, literature, film and philosophy * constant reference to implications for the present world situation * a comprehensive synthesis of the background, context and expansion of colonization * a comparative thematic discussion of the impact of imperialism * extensive coverage and analysis of decolonization. Very simply, a key publication for the study of colonization.

Imperialism and Postcolonialism Jan 15 2021 This account of imperialism explores recent intellectual, theoretical and conceptual developments in imperial history, including interdisciplinary and post-colonial perspectives. Exploring the links between empire and domestic history, it looks at the interconnections and comparisons between empire and imperial power within wider developments in world history, covering the period from the Roman to the present American empire. The book begins by examining the nature of empire, then looks at continuity and change in the historiography of imperialism and theoretical and conceptual developments. It covers themes such as the relationship between imperialism and modernity, culture and national identity in Britain. Suitable for undergraduates taking courses in imperial and colonial history.

How to Hide an Empire Apr 05 2020 'Wry, readable and often astonishing... A provocative and absorbing history of the United States' New York Times The United States denies having dreams of empire. We know America has spread its money, language and culture across the world, but we still think of it as a contained territory, framed by Canada above, Mexico below, and oceans either side. Nothing could be further from the truth. This is the story of the United States outside the United States - from nineteenth-century conquests like Alaska and Puerto Rico to the catalogue of islands, archipelagos and military bases dotted around the globe. Full of surprises and previously forgotten episodes, this fascinating book casts America's history, and its present, in a revealing new light.

Settler Colonialism Dec 02 2019 A vivid exploration of the history of a very powerful and long lasting idea: building European worlds outside of Europe. Veracini outlines how the founding of new societies was envisaged and practiced and explores the specific ways in which settler colonial projects tried to establish ideal and regenerated political bodies.

Ancient Egyptian Imperialism Aug 22 2021 Offers a broad and unique look at Ancient Egypt during its long age of imperialism. Written for enthusiasts and scholars of pharaonic Egypt, as well as for those interested in comparative imperialism, this book provides a look at some of the most intriguing evidence for grand strategy, low-level insurgencies, back-room deals, and complex colonial dynamics that exists for the Bronze Age world. It explores the actions of a variety of Egypt's imperial governments from the dawn of the state until 1069 BCE as they endeavored to control fiercely independent mountain dwellers in Lebanon, urban populations in

Canaan and Nubia, highly mobile Nilotic pastoralists, and predatory desert raiders. The book is especially valuable as it foregrounds the reactions of local populations and their active roles in shaping the trajectory of empire. With its emphasis on the experimental nature of imperialism and its attention to cross-cultural comparison and social history, this book offers a fresh perspective on a fascinating subject. Organized around central imperial themes—which are explored in depth at particular places and times in Egypt’s history—Ancient Egyptian Imperialism covers: Trade Before Empire—Empire Before the State (c. 3500-2686); Settler Colonialism (c. 2400-2160); Military Occupation (c. 2055-1775); Creolization, Collaboration, Colonization (c. 1775-1295); Motivation, Intimidation, Enticement (c. 1550-1295); Organization and Infrastructure (c. 1458-1295); Outwitting the State (c. 1362-1332); Conversions and Contractions in Egypt’s Northern Empire (c. 1295-1136); and Conversions and Contractions in Egypt’s Southern Empire (c. 1550-1069). Offers a wider focus of Egypt’s experimentation with empire than is covered by general Egyptologists. Draws analogies to tactics employed by imperial governments and by dominated peoples in a variety of historically documented empires, both old world and new. Answers questions such as “how often and to what degree did imperial blueprints undergo revisions?” Ancient Egyptian Imperialism is an excellent text for students and scholars of history, comparative history, and ancient history, as well for those interested in political science, anthropology, and the Biblical World.

Imperialism and Resistance Dec 26 2021 A unique critique of the new economic and military imperialism of the United States and its allies in the twenty-first century. Inspired by the anti-globalization and anti-war movements, in which the author himself has played a crucial role, this is also an accessible introduction to the huge changes in global politics since the dominance of the American Empire with the end of the Cold War. It covers the key areas of: the nature of the new imperialism the economic power of the US globalization and inequality wars in the post Cold War era oil and empire resisting the new imperialism. This lively, provocative and practical book is an essential guide to the politics of the new world order, which also offers constructive suggestions on how the global resistance movement should develop. It is important new reading for activists, students and all those wanting to understand and challenge the new imperialism.

Empireland Jul 01 2022 WINNER OF THE 2022 BRITISH BOOK AWARD FOR NARRATIVE NONFICTION ***THE BOOK THAT INSPIRED THE CHANNEL 4 DOCUMENTARY 'EMPIRE STATE OF MIND'*** THE SUNDAY TIMES BESTSELLER 'The real remedy is education of the kind that Sanghera has embraced - accepting, not ignoring, the past' Gerard deGroot, The Times _____ EMPIRE explains why there are millions of Britons living worldwide. EMPIRE explains Brexit and the feeling that we are exceptional. EMPIRE explains our distrust of cleverness. EMPIRE explains Britain's particular brand of racism. Strangely hidden from view, the British Empire remains a subject of both shame and glorification. In his bestselling book, Sathnam Sanghera shows how our imperial past is everywhere: from how we live and think to the foundation of the NHS and even our response to the COVID-19 crisis. At a time of great division, when we are arguing about what it means to be British, Empireland is a groundbreaking revelation - a much-needed and enlightening portrait of contemporary British society, shining a light on everything that usually gets left unsaid. _____ 'Empireland takes a perfectly-judged approach to its contentious but necessary subject' Jonathan Coe 'I only wish this book has been around when I was at school' Sadiq Khan, Mayor of London 'This remarkable book shines the brightest of lights into some of the darkest and most misunderstood corners of our shared history' James O'Brien

Culture and Imperialism Jan 27 2022 A landmark work from the author of Orientalism that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from Mansfield Park to Heart of Darkness and Aida. Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, Culture and Imperialism reopens the dialogue between literature and the life of its time.

Potential History May 07 2020 A passionately urgent call for all of us to unlearn imperialism and repair the violent world we share, from one of our most compelling political theorists In this theoretical tour-de-force, renowned scholar Ariella Aïsha Azoulay calls on us to recognize the imperial foundations of knowledge and to refuse its strictures and its many violences. Azoulay argues that the institutions that make our world, from archives and museums to ideas of sovereignty and human rights to history itself, are all dependent on imperial modes of thinking. Imperialism has segmented populations into differentially governed groups, continually emphasized the possibility of progress while it tries to destroy what came before, and voraciously seeks out the new by sealing the past away in dusty archival boxes and the glass vitrines of museums. By practicing what she calls potential history, Azoulay argues that we can still refuse the original imperial violence that shattered communities, lives, and worlds, from native peoples in the Americas at the moment of conquest to the Congo ruled by Belgium's brutal King Léopold II, from dispossessed Palestinians in 1948 to displaced refugees in our own day. In Potential History, Azoulay travels alongside historical companions—an old

Palestinian man who refused to leave his village in 1948, an anonymous woman in war-ravaged Berlin, looted objects and documents torn from their worlds and now housed in archives and museums—to chart the ways imperialism has sought to order time, space, and politics. Rather than looking for a new future, Azoulay calls upon us to rewind history and unlearn our imperial rights, to continue to refuse imperial violence by making present what was invented as “past” and making the repair of torn worlds the substance of politics.

Imperialism and the Developing World Oct 04 2022 How did Western imperialism shape the developing world? In *Imperialism and the Developing World*, Atul Kohli tackles this question by analyzing British and American influence on Asia, Africa, the Middle East, and Latin America from the age of the British East India Company to the most recent U.S. war in Iraq. He argues that both Britain and the U.S. expanded to enhance their national economic prosperity, and shows how Anglo-American expansionism hurt economic development in poor parts of the world. To clarify the causes and consequences of modern imperialism, Kohli first explains that there are two kinds of empires and analyzes the dynamics of both. Imperialism can refer to a formal, colonial empire such as Britain in the 19th century or an informal empire, wielding significant influence but not territorial control, such as the U.S. in the 20th century. Kohli contends that both have repeatedly undermined the prospects of steady economic progress in the global periphery, though to different degrees. Time and again, the pursuit of their own national economic prosperity led Britain and the U.S. to expand into peripheral areas of the world. Limiting the sovereignty of other states—and poor and weak states on the periphery in particular—was the main method of imperialism. For the British and American empires, this tactic ensured that peripheral economies would stay open and accessible to Anglo-American economic interests. Loss of sovereignty, however, greatly hurt the life chances of people living in Asia, the Middle East, Africa, and Latin America. As Kohli lays bare, sovereignty is an economic asset; it is a precondition for the emergence of states that can foster prosperous and inclusive industrial societies.

A Theory of Imperialism Oct 12 2020 In *A Theory of Imperialism*, economists Utsa Patnaik and Prabhat Patnaik present a new theory of the origins and mechanics of capitalism that sounds an alarm about its ongoing viability. Their theory centers on trade between the core economies of the global North and the tropical and subtropical countries of the global South and considers how the Northern demand for commodities (such as agricultural products and oil) from the South has perpetuated and solidified an imperialist relationship. The Patnaiks explore the dynamics of this process and discuss innovations that could allow the economies of the South to achieve greater prosperity without damaging the economies of the North. The result is an original theory of imperialism that brings to light the crippling limitations of neoliberal capitalism. *A Theory of Imperialism* also includes a response by David Harvey, who interprets the agrarian system differently and sees other factors affecting trade between the North and the South. Their debate is one of the most provocative exchanges yet over the future of the global economy as resources grow thin, populations explode, and universal prosperity becomes ever more elusive.

British Imperialism Feb 25 2022 A milestone in the understanding of British history and imperialism, this ground-breaking book radically reinterprets the course of modern economic development and the causes of overseas expansion during the past three centuries. Employing their concept of 'gentlemanly capitalism', the authors draw imperial and domestic British history together to show how the shape of the nation and its economy depended on international and imperial ties, and how these ties were undone to produce the post-colonial world of today. Containing a significantly expanded and updated Foreword and Afterword, this third edition assesses the development of the debate since the book's original publication, discusses the imperial era in the context of the controversy over globalization, and shows how the study of the age of empires remains relevant to understanding the post-colonial world. Covering the full extent of the British empire from China to South America and taking a broad chronological view from the seventeenth century to post-imperial Britain today, *British Imperialism: 1688-2015* is the perfect read for all students of imperial and global history.

The Age of Imperialism Feb 02 2020 Magdoff's analysis is the foundation upon which the work of an entire tradition of Monthly Review authors rests.

Imperialism May 31 2022 This volume contains a series of essays aimed at illuminating the theory, history, and roots of imperialism, which extend the analysis developed in Magdoff's *The Age of Imperialism*.

Japanese Imperialism, 1894-1945 Mar 05 2020 A study of the origins and nature of Japanese imperialism from the Sino-Japanese War until its collapse following World War II. The author describes how Japan's aims were influenced by growing industrialization and its experience of Western imperialism.

Capital and Imperialism Jul 21 2021 A comprehensive survey of capitalism's colonialist roots and uncertain future. Those who control the world's commanding economic heights, buttressed by the theories of mainstream economists, presume that capitalism is a self-contained and self-generating system. Nothing could be further from the truth. In this pathbreaking book—winner of the Paul A. Baran-Paul M. Sweezy Memorial Award—radical political economists Utsa Patnaik and Prabhat Patnaik argue that the accumulation of capital has always required the taking of land, raw materials, and bodies from noncapitalist modes of production. They begin with a thorough debunking of mainstream economics. Then, looking at the history of capitalism, from the beginnings of colonialism half a millennium ago to today's neoliberal regimes, they discover that, over the long

haul, capitalism, in order to exist, must metastasize itself in the practice of imperialism and the immiseration of countless people. A few hundred years ago, write the Patnaiks, colonialism began to ensure vast, virtually free, markets for new products in burgeoning cities in the West. But even after slavery was generally abolished, millions of people in the Global South still fell prey to the continuing lethal exigencies of the marketplace. Even after the Second World War, when decolonization led to the end of the so-called "Golden Age of Capitalism," neoliberal economies stepped in to reclaim the Global South, imposing drastic "austerity" measures on working people. But, say the Patnaiks, this neoliberal economy, which lives from bubble to bubble, is doomed to a protracted crisis. In its demise, we are beginning to see – finally – the transcendence of the capitalist system.

Pulp Empire Jul 29 2019 "Paul Hirsch's revelatory book opens the archives to show the complex relationships between comic books and American foreign relations in the mid-twentieth century. Scourged and repressed on the one hand, yet co-opted and deployed as propaganda on the other, violent, sexist comic books were both vital expressions of American freedom and upsetting depictions of the American id. Hirsch draws on previously classified material and newly available personal records to weave together the perspectives of government officials, comic-book publishers and creators, and people in other countries who found themselves on the receiving end of American culture"--

The New Age of Empire Feb 13 2021 "If you want to get beyond gestures and slogans and to the truth, this is the book to get you there" Russell Brand "Kehinde Andrews is a crucial voice walking in a proud tradition of Black radical criticism and action" Akala "An uncompromising account of the roots of racism today" Kimberlé Crenshaw "This clear-eyed analysis insists upon the revolutionary acts of freedom we will need to break out of these systems of violence" Ibram X. Kendi The New Age of Empire takes us back to the beginning of the European Empires, outlining the deliberate terror and suffering wrought during every stage of the expansion, and destroys the self-congratulatory myth that the West was founded on the three great revolutions of science, industry and politics. Instead, genocide, slavery and colonialism are the key foundation stones upon which the West was built, and we are still living under this system today: America is now at the helm, perpetuating global inequality through business, government, and institutions like the UN, the IMF, the World Bank and the WTO. The West is rich because the Rest is poor. Capitalism is racism. The West congratulates itself on raising poverty by increments in the developing world while ignoring the fact that it created these conditions in the first place, and continues to perpetuate them. The Enlightenment, which underlies every part of our foundational philosophy today, was and is profoundly racist. This colonial logic was and is used to justify the ransacking of Black and brown bodies and their land. The fashionable solutions offered by the white Left in recent years fall far short of even beginning to tackle the West's place at the helm of a racist global order. Offering no easy answers, The New Age of Empire is essential reading to understand our profoundly corrupt global system. A work of essential clarity, The New Age of Empire is a groundbreaking new blueprint for taking Black Radical thought into the twenty-first century and beyond.

Empire's Children Mar 17 2021 First Published in 2001.

Neo-Colonialism Jun 19 2021 Kwame Nkrumah NEO-COLONIALISM THE LAST STAGE OF IMPERIALISM This is the book which, when first published in 1965, caused such an uproar in the US State Department that a sharp note of protest was sent to Kwame Nkrumah and the \$25million of American "aid" to Ghana was promptly cancelled.

Romantic Imperialism Jan 03 2020 Analyses Romantic literary culture in the context of imperialism, capitalism, and the emergent culture of modernisation.

The New Imperialism Sep 10 2020 People around the world are confused and concerned. Is it a sign of strength or of weakness that the US has suddenly shifted from a politics of consensus to one of coercion on the world stage? What was really at stake in the war on Iraq? Was it all about oil and, if not, what else was involved? What role has a sagging economy played in pushing the US into foreign adventurism and what difference does it make that neo-conservatives rather than neo-liberals are now in power? What exactly is the relationship between US militarism abroad and domestic politics? These are the questions taken up in this compelling and original book. Closely argued but clearly written, 'The New Imperialism' builds a conceptual framework to expose the underlying forces at work behind these momentous shifts in US policies and politics. The compulsions behind the projection of US power on the world as a 'new imperialism' are here, for the first time, laid bare for all to see. This new paperback edition contains an Afterword written to coincide with the result of the 2004 American presidential election.

The League Against Imperialism Oct 31 2019 The League against Imperialism: Lives and Afterlives explores the dramatic and engaging story of a global institution that brought together activists across geographical and political borders for the goal of eradicating colonial rule worldwide. The League against Imperialism attracted anticolonial activists like India's Jawaharlal Nehru, Indonesia's Sukarno, and Kenya's Jomo Kenyatta, as well as prominent figures like Albert Einstein, Ernst Toller, Romain Rolland, Upton Sinclair, Mohandas Gandhi, and Madame Sun Yat-Sen. This volume is the first to capture the global history of the LAI by bringing together contributions by scholars researching the movement from various regions, languages, and archives. Told primarily from the perspectives of those on the peripheries of empires, the volume argues that interwar anti-

imperialism was central to the story of transnational activism during the interwar years and remained an inspiration for many who took on leadership roles during decolonization across the global south.

Imperialism in Southeast Asia Jun 07 2020 One of the few studies of imperialism to concentrate on Southeast Asia, Tarling's work focuses on the establishment of political control from 1870 to 1914 and analyses attempts to re-establish control after the Second World War.

The Heritage of Imperialism Apr 29 2022

The Cambridge Handbook of Language Policy Aug 29 2019 Over the last 50 years, language policy has developed into a major discipline, drawing on research and practice in many nations and at many levels. This is the first Handbook to deal with language policy as a whole and is a complete 'state-of-the-field' survey, covering language practices, beliefs about language varieties, and methods and agencies for language management. It provides a historical background which traces the development of classical language planning, describes activities associated with indigenous and endangered languages, and contains chapters on imperialism, colonialism, effects of migration and globalization, and educational policy. It also evaluates language management agencies, analyzes language activism and looks at language cultivation (including reform of writing systems, orthography and modernized terminology). The definitive guide to the subject, it will be welcomed by students, researchers and language professionals in linguistics, education and politics.

Marxist Theories of Imperialism Apr 17 2021 For Marxists, imperialism is the highest stage of capitalism. Critical analysis of imperialism has been a feature of Marxist thought throughout the twentieth century. The conceptualising and theorising of imperialism by Marxists has evolved over time in response to developments in the global capitalist economy and in international politics. Murray Noonan here provides the first complete analysis of Marxist theories of imperialism in over two decades. Presenting three phases of imperialist theories, he analyses and compares 'Classical', 'Neo' and 'Globalisation-era' Marxist theories of imperialism. The book moves chronologically, tracking the origins of imperialism theorised by J.A. Hobson at the beginning of the twentieth century up to the present day. He critically identifies and engages with a new 'Globalisation-era' phase of Marxist imperialism theory. Through a detailed scholarly analysis of the history and evolution of these theories, Noonan offers vital new perspectives on imperialist theory and its relevance and application in the twenty-first century.

Colonialism and the Emergence of Science Fiction Jun 27 2019 This is the first full-length study of emerging Anglo-American science fiction's relation to the history, discourses, and ideologies of colonialism and imperialism. Nearly all scholars and critics of early science fiction acknowledge that colonialism is an important and relevant part of its historical context, and recent scholarship has emphasized imperialism's impact on late Victorian Gothic and adventure fiction and on Anglo-American popular and literary culture in general. John Rieder argues that colonial history and ideology are crucial components of science fiction's displaced references to history and its engagement in ideological production. He proposes that the profound ambivalence that pervades colonial accounts of the exotic "other" establishes the basic texture of much science fiction, in particular its vacillation between fantasies of discovery and visions of disaster. Combining original scholarship and theoretical sophistication with a clearly written presentation suitable for students as well as professional scholars, this study offers new and innovative readings of both acknowledged classics and rediscovered gems. Includes discussion of works by Edwin A. Abbott, Edward Bellamy, Edgar Rice Burroughs, John W. Campbell, George Tomkyns Chesney, Arthur Conan Doyle, H. Rider Haggard, Edmond Hamilton, W. H. Hudson, Richard Jefferies, Henry Kuttner, Alun Llewellyn, Jack London, A. Merritt, Catherine L. Moore, William Morris, Garrett P. Serviss, Mary Shelley, Olaf Stapledon, and H. G. Wells.
