Conflict Resolution in Africa

Apr 12 2021 While dramatic changes are taking place on the international scene and among the major powers, Africa continues to suffer from a multitude of violent conflicts.

The toll of these conflicts is monumental in terms of war damage to productivity, scarce resources diverted to armaments and military organizations, and the resulting insecurity, displacement, and destruction. At the same time,

Africans, in response to internal demands as well as to international changes, have begun to focus their attention and energies on these problems and are trying innovative ways to resolve differences by nonviolent

means. The outcomes of these attempts have urgent and complex implications for the future of the continent with respect to human rights, principles of democracy, and economic development. In this book, African, European, and U.S. experts examine these important issues and the prospects for conflict management and resolution in Africa. They review the scholarship in resolution in light of international changes now taking place. Addressing the undying, internal causes of conflict, they question whether global events will promote peace or threaten to unleash even more conflict. The authors focus their analysis on the

issues involved in African conflicts and examine the areas in need of the most dramatic changes. They offer specific recommendations for dealing with current problems, but caution that unless policymakers confront the security situation in Africa, further destruction to national unity and political and economic stability is imminent. Case studies and themes for further, long-term research are recommended.

The Handbook of Conflict Resolution Feb 08 2021 The Handbook of Conflict Resolution, Second Edition is written for both the seasoned professional and the student who wants to deepen their

understanding of the processes involved in conflicts and their knowledge of how to manage them constructively. It provides the theoretical underpinnings that throw light on the fundamental social psychological processes involved in understanding and managing conflicts at all levels—interpersonal, intergroup, organizational, and international. The Handbook covers a broad range of topics including information on cooperation and competition, justice, trust development and repair, resolving intractable conflict, and working with culture and conflict. Comprehensive in scope, this new edition includes chapters

that deal with language, emotion, gender, and personal implicit theories as they relate to conflict.

Contemporary Conflict

Resolution Jun 22 2019 Since the end of the Cold War, conflict prevention and resolution, peacekeeping and peacebuilding have risen to the top of the international agenda. The fourth edition of this hugely popular text explains the key concepts, charts the development of the field, evaluates successes and failures, and assesses the main current challenges and debates in the second decade of the twenty-first century. In response to ongoing changes in the dynamics of global conflict,

including the events and consequences of the Arab revolutions, the rise of the self-styled Islamic State, the conflict in Ukraine, and the continued evolution of conflict resolution theory and practice, this edition provides a fresh assessment of the contemporary conflict landscape. Comprehensively updated and illustrated with new case studies, the book identifies a new pattern of transnational conflicts and argues for a response based on cosmopolitan conflict resolution, defined as the promotion of the cosmopolitan values on which the welfare and life hopes of future generations depend. Part I

offers a comprehensive survey of the theory and practice of conflict resolution. Part II sets the field within the context of rapid global change and addresses the controversies that have surrounded conflict resolution as it has entered the mainstream. Contemporary Conflict Resolution is essential reading for students of peace and security studies, conflict management and international politics, as well as for those working in non-governmental organizations and think-tanks. **Conflict Resolution Beyond the Realist Paradigm** Jun 26 2022 Conflict Resolution holds the promise of freeing approaches and policies with regard to politics of identity

from the fatalistic grip of realism. While the conceptual literature on identity and conflicts has moved in this alternative direction, conflict resolution practice continues to rely on realist frames and acts as an unwanted auxiliary to traditional international relations. Perpetuation of conflict discourses, marginalization, and exclusion of affected populations are widespread. They are caused by the overreliance of conflict resolution practice on the binary frames of classic IR paradigms and also by the competitive and hierarchical relationships within the field. Philip Gamaghelyan relies on participatory action research

and collective autoethnography to expose patterns of exclusion and marginalization as well as the paradoxical reproduction of conflict-promoting frames in current conflict-resolution practice applied to the Nagorno-Karabakh and Syrian crises. He builds on the work of postmodernist scholars, on reflective practice, and on discourse analysis to explore alternative and inclusive strategies with a transformative potential. The IR discipline that has dominated policymaking is only one possible lens, and often a deficient one, for defining, preventing, or resolving contemporary conflicts wrapped in identity politics.

Other conceptual frameworks can help to rethink our understanding of identity and conflicts and reconstruct them as performative and not static phenomena. These transformative frameworks are increasingly influential in the conflict resolution field and can be applied to policymaking.

The chapters in this volume navigate the relationship between human rights and conflict resolution by fleshing out practical, conceptual, and institutional encounters of the two agendas and engaging with lessons learned and windows of opportunities for mutual learning. Recognizing the increasing relevance of this debate and important gaps in the current research on the topic, this book addresses the following questions: How can we improve our practical and

How are international, regional, and national organizations promoting, implementing, and/or adapting to better coordinate between human rights and conflict resolution? The main premise is that water can and should be used as a catalyst for peace and cooperation rather than conflict. Evidence is provided to support this claim through detailed case studies from the Middle East and the Lesotho Highlands in Africa. These

international cases - including bilateral water treaties and their development and formation process and aftermath - are analyzed to draw conclusions about the outcomes as well as the processes by which these outcomes are achieved. It is demonstrated that the perception of a particular treaty as being equitable and fair is mainly shaped by the negotiation process used to reach certain outcomes, rather than being determined mechanistically by the quantitative allocation of water to each party. The processes and perceptions leading to international water conflict resolutions are emphasized as

key issues in advancing cooperation and robust implementation of international water treaties. The key messages of the book are therefore relevant to the geo-political and hydro-political aspects of water resources in the context of bilateral and multilateral conflicts, and the trans-boundary management of water resources, which contributes insights to political ecology, geo-politics, and environmental policy. *Conflict Resolution Using the Graph Model: Strategic Interactions in Competition and Cooperation* May 14 2021 This cutting-edge book presents the theory and practice of the Graph Model for Conflict

Resolution (GMCR), which is used for strategically investigating disputes in any field to enable informed decision making. It clearly explains how GMCR can determine what is the best a particular decision maker (DM) can independently achieve in dynamic interaction with others. Moves and counter-moves follow various stability definitions reflecting human behavior under conflict. The book defines a wide range of preference structures to represent a DM's comparisons of states or scenarios: equally preferred; more or less preferred; unknown; degrees of strength of preference; and hybrid. It vividly describes how

GMCR can ascertain whether a DM can fare even better by cooperating with others in a coalition. The book portrays how a conflict can evolve from the status quo to a desirable resolution, and provides a universal design for a decision support system to implement the innovative decision technologies using the matrix formulation of GMCR. Further, it illustrates the key ideas using real-world conflicts and supplies problems at the end of each chapter. As such, this highly instructive book benefits teachers, mentors, students and practitioners in any area where conflict arises.

Democracy and Conflict Resolution May 26 2022

Studies of the Israeli-Palestinian conflict typically focus on how international conditions drive the likelihood of conflict resolution. By contrast, *Democracy and Conflict Resolution* considers the understudied impact of domestic factors. Using the contested theory of "democratic peace" as a foundational framework, the contributors explore the effects of various internal influences on Israeli government practices related to peace-making: electoral systems, political parties, identity, leadership, and social movements. Most strikingly, *Democracy and Conflict Resolution* explores the possibility that features of

democracy inhibit resolution of conflict, a possibility that resonates far outside the contested region. In reflecting on how domestic political configurations matter in a practical sense, this book offers policy-relevant and timely suggestions for advancing Israel's capacity to pursue effective peacemaking policies. From Conflict Resolution to Reconciliation May 02 2020
This volume represents an important new step forward in the fields of conflict resolution and peace studies. Its essays argue that, while conflict

resolution is well equipped to bring about temporary settlements and brief periods of peace in volatile situations, conventional conflict resolution techniques are not capable of building long-term stability. Instead, the authors contend, practitioners of conflict resolution need to focus more on reconciliation (the restoration of confidence, friendship, and harmony between rivals) than on mere conflict resolution. Whereas traditional conflict resolution has focused primarily on halting quarrels with agreements between leaders on each side of a conflict, reconciliation techniques shift the focus in two ways. First,

they take more of a grassroots approach, building agreement among the members of rival communities, not only between leaders. Second, reconciliation takes a long-term view of dispute resolution. While the authors acknowledge that the role of traditional conflict resolution is important in stopping violence and tension, they argue that, in order to achieve stable peace, negotiators and practitioners of conflict resolution must focus much more on what is to be done after an agreement among leaders is reached. [Handbook of Regional Conflict Resolution Initiatives in the Global South](#) Oct 26 2019 During the first half of the

twentieth century, the international system was largely dominated by the USA and the colonial powers of western Europe. After the two world wars, the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics. However, as it is the norm in the international system, power structures are not immutable. After the end of the Cold War, rapid changes to the existing international hierarchies took place, as new countries from the so-called “developing world” began to emerge as crucial actors capable of questioning and altering the power dynamics of the world. It

is therefore unthinkable to ignore emerging countries such as Russia, the People’s Republic of China, India, Brazil or South Africa in the decision-making process in today’s world order. In addition, there is a group of smaller, yet increasingly important countries that, while acknowledging their inability radically to change the rules of the international system, are still eager to shift power relations and enhance their influence in the world. Argentina, Colombia, Egypt, Indonesia, Iran, South Korea, Mexico, Nigeria, Pakistan, Saudi Arabia, Turkey and Vietnam are generally recognised as part of this

grouping of emerging powers from the Global South. While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions, previous analyses have focused primarily on the impact that emerging powers have had in their own regions' conflict resolution initiatives. This volume, instead, aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers. In other words, this book explores the relation between a country's involvement in conflict

resolution initiatives and its positioning in the international system. The volume will contribute to this approach using the perspective of academics and practitioners from countries of the Global South, particularly from states that have strengthened - or sometimes weakened - their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives.

Fostering a philosophy of mediation as a culture and a “co-entrepreneurial” business model, Doherty and Guyler consider what mediation is, why it is necessary and how it works, including the main principles of operation and the 6-step structure of a mediation meeting. They analyze the reasons for conflict and suggest useful everyday communication skills to help defuse anger or aggression. Real case studies look at
