Mother Son Journal Dec 02 2019 This journal, which is completed by mother and son, makes a great gift for your son or for a mom! The answers recorded will live on in time and make a wonderful keepsake for mother and son in years to come. PERFECT GIFT for mom and son - This 6" X 9" journal is the perfect opportunity to take turns recording an answer to the questions listed in the book. By answering the questions and prompts included in this journal, a mother and son can leave a lasting legacy recorded in their own handwriting. This journal serves to provide both thought-provoking and easy and fun questions that feel safe to open up the lines of communication between a mother and her son. Don't feel obligated to answer all the questions at once. Take your time and enjoy the journey. This journal makes a great Christmas, birthday, Valentine's, or Mother's Day gift! GUIDED QUESTIONS - This mother and son journal allows both to get to know one another better, especially at a time when a boy may not be as open and conversational with his mom. Best suited for ages 12 - 17 years old. For example, here's a small sample of fun and/or thought-provoking questions included in this journal: Son, what is the hardest thing about being a kid Mom, what was the hardest thing about being a kid? Son, if you could have one superpower, what would it be? Mom, if you could have one superpower, what would it be? Son, are you excited or fearful about going to college or university? Son, what hurts your feelings? Mom, what hurts your feelings? PERSONALIZED AND INTERACTIVE - The lined pages provide you with room to write your answers to the guided questions. There are also a few pages near the back of the book that you can personalize with your own questions. If you want, you can even paste a few photos in the book, or add whatever you want. The handsome cover comes in a glossy finish. HIGH-QUALITY - There are 120 pages (60 sheets) in this journal. The pages are made with high-quality white paper that provides good absorbency so you can feel confident using pens or gel pens without bleed-through. Make the decision

for mom and son to record their answers in a way that allows them to connect in a safe and fun way.

The Secrets of Picking a College (and Getting In!) Jul 29 2019 Two award-winning professors, a former admissions officer at a major university (now a counselor at a prestigious high school), and a gifted high school senior (now in the throes of the college admissions process himself) team up to offer you over 600 tips, techniques, and strategies to help you get in to the college of your choice. Comprehensive, yet easy-to-read, this book will teach you: How to size up the colleges you're considering—and come up with a coherent list. What are college nights, college fairs, and college rep visits—and how you can use each to your advantage. What are "holistic", "contextualized", and "legacy" admissions—and how each can work for you. How some schools count "demonstrated interest"—and how you can take advantage of this little-known fact. What are Early Decision, Early Action, and Single-Choice Early Action—and whether any is right for you. How to figure out the true costs of college, and what is the difference between "need-" and "merit-based" aid. What it means when colleges say they meet "100% of demonstrated financial aid" and what "loan-free" means. When and how to make campus visits—and what to do on each. How to prepare for each section of the ACT or SAT—and how to increase your scores. What admissions officers are looking for in your application—and how to give it to them. How to write the all-important Common App essay—and present your extra-curricular activities. How to prepare for an alumni interview—and present yourself in the best light. Whom to ask for letters-of-recommendation—and how to help them write the best possible letter. How to compare your final offers—and, in some cases, substantially improve them. When it's good to wait out the "wait list"—and when not. -and much, much more. When you understand the college admissions process, you can maximize your chance of success. Why not put yourself ahead of the pack?

The Black Swan Oct 04 2022 "Elie Ayache is the only person to present arguments about *The Black Swan* and rare events that I had not thought about. He does what philosophical inquiry has always done: to go the extra mile and look at the world in a deeply philosophical way." Nassim Nicholas Taleb, PhD, author of *The Black Swan*, Distinguished Professor, New York University Polytechnic Institute & Principal, Universa Investments. "Elie Ayache has uniquely straddled the down-to-earth world of money and complex financial derivatives and the abstract world of the mind and philosophy. Insightful and insane in equal measures, this book is not an easy read. I wouldn't recommend this for holiday reading on the beach but perhaps for while sitting in front of a log fire with a large Scotch, or probably several. ??? Paul Wilmott, author of *Frequently Asked Questions in Quantitative Finance* October 19th 1987 was a day of huge change for the global finance industry. On this day the stock market crashed, the Nobel Prize winning Black-Scholes formula failed and volatility smiles were born, and on this day Elie Ayache began his career, on the trading floor of the French Futures and Options Exchange. Experts everywhere sought to find a model for this event, and ways to simulate it in order to avoid a recurrence in the future, but the one thing that struck Elie that day was the belief that what actually happened on 19th October 1987 is simply non reproducible outside 19th October 1987 - you cannot reduce it to a chain of causes and effects, or even to a random generator, that can then be reproduced or represented in a theoretical framework. The

Blank Swan is Elie's highly original treatise on the financial markets – presenting a totally revolutionary rethinking of derivative pricing and technology. It is not a diatribe against Nassim Taleb's The Black Swan, but criticises the whole background or framework of predictable and unpredictable events – white and black swans alike – , i.e. the very category of prediction. In this revolutionary book, Elie redefines the components of the technology needed to price and trade derivatives. Most importantly, and drawing on a long tradition of philosophy of the event from Henri Bergson to Gilles Deleuze, to Alain Badiou, and on a recent brand of philosophy of contingency, embodied by the speculative materialism of Quentin Meillassoux, Elie redefines the market itself against the common perceptions of orthodox financial theory, general equilibrium theory and the sociology of finance. This book will change the way that we think about derivatives and approach the market. If anything, derivatives should be renamed contingent claims, where contingency is now absolute and no longer derivative, and the market is just its medium. The book also establishes the missing link between quantitative modelling (no longer dependent on probability theory but on a novel brand of mathematics which Elie calls the mathematics of price) and the reality of the market."
