graduate course on psychological assessment." —Stephen E. Finn, PhD, Founder, Center for Therapeutic Assessment "A. Jordan Wright's *Conducting Psychological Assessment* is a comprehensive step-by-step guide to every aspect of psychological testing and assessment. Blending clinical wisdom with rigorous empirical evidence, the author guides readers through every phase of the assessment process, from selecting appropriate measures and collecting test data through writing assessment reports and providing feedback to clients. Experienced clinicians, early career psychologists, and students will all benefit from this important book; it should be on every clinician's bookshelf." —Robert F. Bornstein, PhD, Derner School of Psychology, Adelphi University "*Conducting Psychological Assessment* (2nd ed) provides a clear, concise, practical guide to essential aspects of clinical assessment. Dr. Wright presents scholarly research, draws on extensive clinical experience, and illustrates his guidelines with rich case examples. Much of this information is typically not included in other assessment books, such as how to select tests, strategies to integrate contradictory data, and how to work with clients who disagree with assessment results. Accordingly, I recommend this to all health professionals involved with clinical assessment." —Gary Groth-Marnat, PhD, ABPP, ABAP

The TRIPS Regime of Patents and Test Data Oct 24 2019 This preeminent work has proven the best practical commentary on the TRIPS agreement related to patents and test data. This fifth edition, in which the author has revised the whole text and updated various arguments, continues to articulate with unmatched clarity the specific steps that a government or a company must take, in a wide variety of possible contexts, to ensure that its patent-related obligations under TRIPS are met. The presentation is arranged in an article-by-article format, following the TRIPS Agreement itself as it relates to patents and test data. In this way, the author's incisive analysis covers every issue likely to arise in today's patent and test data administrative and legal practice, including the following: · significance of the recent entry into force of Article 31bis; · developments in enforcement of patent rights in the context of competition law; · the potential effects of Brexit and the new protectionist inclination of US trade policy; · expanded commentary on trade secrets and test data under Article 39; · alternate ways to transpose TRIPS obligations into national law; and · standards of intellectual property protection as a bargaining chip in international trade. The TRIPS Agreement has a direct impact on the daily activities of corporations, governments, and consumers. This book contains a very practical explanation of the meaning of the patent-related TRIPS provisions, how they should be reflected in national law, and how courts are expected to enforce them. For these reasons and more, the Fifth Edition is a crucially important resource for patent and public health lawyers seeking compliance as well as for government officials charged with the implementation of TRIPS obligations.
