[Landscape Urbanism and Green Infrastructure](#) Oct 30 2019 This volume examines the applicability of landscape urbanism theory in contemporary landscape architecture practice by bringing together ecology and architecture in the built environment. Using participatory planning of green infrastructure and application of nature-based solutions to address urban challenges, landscape urbanism seeks to reintroduce critical connections between natural and urban systems. In light of ongoing developments in landscape architecture, the goal is a paradigm shift towards a landscape that restores and rehabilitates urban ecosystems. Nine contributions examine a wide range of successful cases of designing livable and resilient cities in different geographical contexts, from the United States of America to Australia and Japan, and through several European cities in Italy, Portugal, Estonia, and Greece. While some chapters attempt to conceptualize the interconnections between cities and nature, others clearly have an empirical focus. Efforts such as the use of ornamental helophyte plants in

bioretention ponds to reduce and treat stormwater runoff, the recovery of a poorly constructed urban waterway or participatory approaches for optimizing the location of green stormwater infrastructure and examining the environmental justice issue of equitable availability and accessibility to public open spaces make these innovations explicit. Thus, this volume contributes to the sustainable cities goal of the United Nations.

The Light and Smith Manual Apr 04 2020 An immensely useful manual with many attractive features: comprehensive and lucid keys, precise diagrams, annotated checklists and up-to-date references. ... there is no doubt that it should be seen as an example of the type of manual which is so badly needed in the study of the fauna of many shores around the world.--Journal of Animal Ecology
Congratulations to the editors, contributors, and publisher for a job well done. The third edition has been rewritten, corrected, and enlarged, so that while retaining the basic organization of the earlier ones, it is more useful, informative and up-to-date. The meticulous scholarship of Smith and Carlton is just what the revision needed.--Systematic Zoology This revision should serve for many years. It is therefore particularly commendable that the editing has been meticulous, perhaps flawless. ... thanks are due to the many contributors for a job well done.--The Quarterly Review of Biology
As the Pacific Coast intertidal zone undergoes increasingly profound changes, knowing the sentinel invertebrates can foretell the future of the sea, and hence, of our species. Jim Carlton's hefty new update of The Light & Smith Manual, the comprehensive compendium of who's who between the tides, is the best and quickest way to do so.--Elliot A. Norse, President, Marine Conservation Biology Institute
This much-anticipated modernization of Light's Manual is an astonishing accomplishment, blending state-of-the-art taxonomy with profusely illustrated and user-friendly keys to who's whom on marine shores from its stated boundaries of mid-California through Oregon, and clearly, much further north. It's also an informative, well referenced read. Marine biologists should not leave home without it.--Robert Paine, Professor Emeritus of Biology, University of Washington
At this time of environmental change and loss of biodiversity, species identification has never been more important. The fourth edition of Light and Smith is more than just a field guide--it is a masterwork of research and description with a strong focus on morphological detail. No other book has such a broad scope, newly expanded to include even the most obscure taxa. The revised keys and beautiful anatomical illustrations make this classic guide more indispensable than ever. As taxonomists become extinct, there are fewer students to receive the vast body of knowledge accumulated by generations of careful study. I hope that the beauty and depth of this guide will inspire a generation of young scientists to continue this critical taxonomic work. It will have a place of honor in all marine labs.--Paul K. Dayton, Scripps Institution of Oceanography

The Education of d/Deaf and Hard of Hearing Children Jun 06 2020 A significant number of d/Deaf and hard of hearing (d/Dhh) children and adolescents experience challenges in acquiring a functional level of English language and literacy skills in the United States (and elsewhere). To provide an understanding of this issue, this book explores the theoretical underpinnings and synthesizes major research findings. It also covers critical controversial areas such as the use of assistive hearing devices, language, and literacy assessments, and inclusion. Although the targeted population is children and adolescents who are d/Dhh, contributors found it necessary to apply our understanding of the development of English in other populations of struggling readers and writers such as children with language or literacy disabilities and those for whom English is not the home language. Collectively, this information should assist scholars in conducting further research and enable educators to develop general instructional guidelines and strategies to improve the language and literacy levels of d/Dhh students. It is clear that there is not a 'one-size-fits-all' concept, but, rather, research and instruction should be differentiated to meet the needs of d/Dhh students. It is our hope that this book stimulates further theorizing and research and, most importantly, offers evidence- and reason-based practices for improving language and literacy abilities of d/Dhh students.

The Timing of Income Recognition in Tax Law and the Time Value of Money Aug 09 2020 Time itself creates advantages and disadvantages in the field of taxation. The timing of the recognition of income and expenses for tax purposes has two main implications: firstly, for the timing of the collection of tax, and secondly, for the question of quantification, i.e., how to ensure that the difference between the timing of the recognition of income or expenses, as opposed to the respective dates on which the amounts are actually received or paid, does not distort the determination of the amount of chargeable income. The time component is a weapon in the confrontation between the opposing motivations of the taxpayers and the tax authorities. In any given fiscal year, taxpayers seek to present a minimal picture of their chargeable income, by "deferring" the recognition of income or "advancing" the recognition of expenses. As opposed to this, the tax authorities adopt the opposite strategy: maximizing taxable "profit" in any given year. This book critically examines the various approaches that have been adopted in the tax systems in the UK, the US and Israel in relation to the timing of income recognition and expenses for tax purposes. It suggests an innovative tax model that identifies the advantages that arise to the taxpayer as a result of the differences between the timing of the recognition of income and expenses, and the timing of the receipt of the revenue or the payment of a liability, and taxes only that advantage.

Interviewing of Suspects with Mental Health Conditions and Disorders in England and Wales

May 06 2020 Interviewing of Suspects with Mental Health Conditions and Disorders in England and Wales explores cutting-edge research that focuses specifically on these adults (including their cognitive needs and psychological vulnerabilities), the impact on the investigative interview, and existing legislation, guidance and practice. The book opens with a historical overview of the move from interrogation to investigative interviewing, including the impact of well-known miscarriages of justice and the inquiry that led to the development of current best practice interviewing. Further chapters focus on the concept of vulnerability within current theoretical frameworks, with a particular emphasis on mental health conditions and disorders, including how they are constructed, understood, and identified within legislation and by those working at the forefront of the criminal justice system. The book also examines current safeguards available to the suspect with mental health conditions and disorders, such as the Appropriate Adult; contemporary research explores their involvement with vulnerable suspects and whether it is sufficient, as well as how the Appropriate Adult understands and experiences their role. Final chapters scrutinise current best practice investigative interviewing of suspects with mental health conditions and disorders, and a paradigm shift towards an emerging evidence-based interview model that considers the vulnerabilities associated with suspects with mental health conditions and disorders in the investigative interview. Examining current psychological theory, contemporary research and existing legislation and guidance including authorised professional practice, this book will be of interest to those working within the criminal justice system, as well as policing and forensic psychology students. In particular, it is essential reading for all serving and trainee police officers, those delivering investigative interviewing training, and interviewing personnel, such as Appropriate Adults.

Gunning For Ramirez Vol. 1 Sep 29 2019 What if the deadliest assassin in all of Mexico, a man with dozens of kills to his name, was actually a vacuum repairman in Arizona? Falcon City, Arizona. Jacques Ramirez works at Robotop, the leading home appliance company in the Southwest United States. Jacques is efficient, thorough, and discreet. That last one is easy: he's also mute. But everything changes when two members of one of Paso del Rio's largest drug cartels stumble upon Jacques and believe him to be the deadly hitman who betrayed them in the past: the ruthless Ramirez. Could it be that the cartel's legendary clean-up man is really a legendary vacuum cleaner expert? NICOLAS PETRIMAUX presents the first in a trilogy a tribute to the action thrillers of the 1980s and '90s, a brutal narrative with never a dull moment. GUNNING FOR RAMIREZ is as much a descendant of Friedkin's *To Live and Die in L.A.* as it is Tarantino's *Pulp Fiction* or Rodriguez's *Mexico Trilogy*.

Measuring and Controlling Sustainability Sep 21 2021 Efforts to establish the measurement and control of sustainability have produced notable tools, but those instruments lack applicability in practice. Increasing the level of standardization of such tools also seems difficult to achieve, because

the contexts surrounding the focal organizations differ considerably. Therefore, what we need is a systematic, interdisciplinary assessment of how to measure and control sustainability, so that we can establish an essential definition and up-to-date picture of the field. *Measuring and Controlling Sustainability* attempts to provide such an assessment in 17 chapters, organized into four main topic sections: (a) organizations and social value creation: concepts, responsibilities, and barriers; (b) accounting, measurement, performance, and diffusion of social value; (c) practical and managerial insights from real-life cases; and (d) choices, incentives, guidance, and ethics. This research anthology provides a comprehensive collection of cutting-edge theories and research that will further the development and advancement of measuring and controlling sustainable efforts in theory and managerial practice.

Natural and Engineered Solutions for Drinking Water Supplies Mar 16 2021 *Illuminating opportunities to develop a more integrated approach to municipal water system design, Natural and Engineered Solutions for Drinking Water Supplies: Lessons from the Northeastern United States and Directions for Global Watershed Management* explores critical factors in the decision-making processes for municipal water system delivery. The book offers vital insights to help inform management decisions on drinking water supply issues in other global regions in our increasingly energy- and carbon-constrained world. The study evaluates how six cities in the northeastern United States have made environmental, economic, and social decisions and adopted programs to protect and manage upland forests to produce clean drinking water throughout their long histories. New York, New York; Boston and Worcester, Massachusetts; New Haven and Bridgeport, Connecticut; and Portland, Maine have each managed city watersheds under different state regulations, planning and development incentives, biophysical constraints, social histories, and ownerships. Some of the overarching questions the book addresses relate to how managers should optimize the investments in their drinking water systems. What is the balance between the use of concrete/steel treatment plants (gray infrastructure) and forested/grassland/wetland areas (green infrastructure) to protect surface water quality? The case studies compare how engineered and/or natural systems are employed to protect water quality. The conclusions drawn establish that it makes environmental, economic, and social sense to protect and manage upland forests to produce water as a downstream service. Such stewardship is far more preferable than developing land and using engineering, technology, and artificial filtration as a solution to maintaining clean drinking water. Lessons learned from this insightful study provide effective recommendations for managers and policymakers that reflect the scientific realities of how forests and engineering can be best integrated into effective watershed management programs and under what circumstances.

Early Medical Abortion, Equality of Access, and the Telemedical Imperative Oct 23 2021 Telemedicine has recently become a key focus of healthcare systems globally, heavily influenced by the COVID-19 pandemic and the increased need for remote care pathways. Implementing telemedicine can bring myriad benefits for both patients and providers, and has the potential to make a huge impact by improving access to abortion care. In both the United Kingdom and United States, abortion is heavily regulated--exceptionally so when compared to other routine healthcare. This regulation has had the impact of exacerbating the social and geographical circumstances that can make access to abortion services difficult. This book examines telemedical provision of early medical abortion, alongside the access barriers created by laws in the United Kingdom and United States. It critically appraises a series of developments in this rapidly evolving subject, providing an up-to-date and well-informed analysis. In doing so, it argues that there is a moral imperative to introduce, retain, or reinstate (as applicable) telemedical early medical abortion.
