Justice, Crime, and Citizenship in Eurasia Jul 12 2021 What role does law play in post-communist societies? This book examines the law as a social institution in Eurasia, exploring how it is shaped in everyday interactions between state and society, organisations and individuals, and between law enforcement and other government entities. It bridges the gap between theoretically rich work on law-in-action and the empirical reality of Eurasia. The contributions in this volume include research on policing, the legal profession, public attitudes towards law, regime support and oppositional mobilisation, crime policy, and property rights, among others. The studies shift away from the common perception that, in Eurasia, the law exists only as a tool for the state to enforce order and suppress dissent. Instead, they show, through empirical analyses, that citizens evade, use, reinterpret and shape

the law even in authoritarian contexts—sometimes containing state violence and challenging the regime, and other times reinforcing state capture from below. The chapters in this book were originally published as a special issue of the journal Europe-Asia Studies.

The papers contain all the new variety of questions being asked in the new JEE.

The Language Situation in China Dec 05 2020 China, with the world's largest population, numerous ethnic groups and vast geographical space, is also rich in languages. Since 2006, China's State Language Commission has been publishing annual reports on what is called "language life" in China. These reports cover language policy and planning initiatives at the national, provincial and local levels, new trends in language use in a variety of social domains, and major events concerning languages in mainland China, Hong Kong, Macau and Taiwan. Now for the first time, these reports are available in English for anyone interested in Chinese language and linguistics, China's language, education and social policies, as well as everyday language use among the ordinary people in China. The invaluable data contained in these reports provide an essential reference to researchers,

professionals, policy makers, and China watchers.

Language Across the Curriculum & CLIL in English as an Additional Language (EAL) Contexts Mar 08 2021 This book will be of interest to a broad readership, regardless of whether they have a background in sociolinguistics, functional linguistics or genre theories. It presents an accessible “meta-language” (i.e. a language for talking about language) that is workable and usable for teachers and researchers from both language and content backgrounds, thus facilitating collaboration across content and language subject panels. Chapters 1 to 3 lay the theoretical foundation of this common meta-language by critically reviewing, systematically presenting and integrating key theoretical resources for teachers and researchers in this field. In turn, Chapters 4 to 7 focus on issues in pedagogy and assessment, and on school-based approaches to LAC and CLIL, drawing on both research studies and the experiences of front-line teachers and school administrators. Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals, where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society, and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge. In closing, Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry.
