**The Difficult Case in Head and Neck Cancer Surgery** Nov 04 2020 A single-volume resource for managing the most difficult cases in head and neck cancer. Authoritative and lavishly illustrated, this book is a valuable compendium of surgical techniques for the most complex oncologic problems in the head and neck patient. It distills the author's decades of experience in the surgical management of cases in which the excision of complex lesions is difficult and reconstruction is problematic. In the first half of the book, each chapter addresses cancer in a different region of the head and neck. Each chapter provides discussion of etiology, pathology, pathophysiology, and surgical anatomy, providing the necessary background for diagnostic evaluation, surgical treatment as well as nonsurgical treatment, including chemotherapy and radiation. Additional chapters cover such important topics as care for the pediatric patient, radiotherapy, restoration secondary to tumor ablation, and speech, voice, and swallowing implications following ablative procedures. Features: Detailed descriptions that guide the clinician through each surgical procedure. Comprehensive discussion of management strategies that provides clinicians with a solid understanding of the available treatments and the possibilities and limitations of each. Nearly 1,000 high-quality illustrations, photographs, and radiographic images that demonstrate pathologic and surgical concepts in precise detail. Coverage of the latest techniques in skull base surgery and laryngeal surgery. Valuable discussion of nursing care, nutrition, and speech therapy. An essential resource for optimizing the care of patients with advanced cancer, this book is ideal for clinicians and residents in otolaryngology-head and neck surgery, facial plastic and reconstructive surgery, oral and maxillofacial surgery, oncology, and general surgery.

Label Writing and Planning May 10 2021 The label on your product is the most important document you produce. Ask any customer; it is often the only communication they have with you. This book is about getting your labeling and product information right, and that is more important than getting customers to buy your products. It is about ensuring that they buy them again, and again. Written primarily for the fast moving consumer goods industries such as food, chemicals, cosmetics and health, this book is also essential reading for anyone involved in label writing and design, or product information in any context. Tony Holkham is a consultant providing expertise to a range of industries. He has written in-house labeling manuals, published articles and runs training courses on the subject.

**Surgery of the Lumbar Spine** Sep 02 2020 "Larson and Maiman have pioneered both the study of the lumbar spine, as well as the surgical and

non-surgical management of lumbar spine pathology. A comprehensive treatise... clearly enhances the surgeon's ability to care for patients with lumbar spine pathology; most importantly; it significantly advances the field." -- Edward C. Benzel, MD (from the foreword) Written by two of the most distinguished leaders in modern spine surgery, this book provides "everything you need to know" regarding surgery of the lumbar spine. Throughout, you will find an emphasis on incorporating biomechanics into clinical decision-making, with detailed coverage of anatomy and pathology, fusion principles, and surgical approaches. Lumbar spine-specific pathology is addressed from an anatomical, clinical, and therapeutic point of view. Plus, you will benefit from the authors' frank discussions of techniques, complications, and surgical "pearls." The numerous high-quality drawings aid the discussion in providing a thorough understanding of the surgical procedures used in the lumbar spine. Surgery of the Lumbar Spine is an invaluable book for resident and experienced surgeon alike. Highlights of this outstanding work include: Provides a comprehensive view of lumbar-spine pathology and treatment Straight talk from experienced surgeons on techniques and complications A unique approach to clinical decision making that stresses biomechanics Hundreds of clear photographs and descriptive surgical drawings

*Information Technology and Product Development* Jun 18 2019 Information Technology and Product Development: A Research Agenda presents important new research from varied disciplines aimed at developing new theoretical concepts and insights on the application of IT in product and service innovation. Drawing on the work of researchers in such varied management areas as information services, technology management, marketing, operations, business strategy and organizational behavior, the book redefines the role of IT in product and service development and the organizational and management issues underlying the successful deployment of IT in innovation contexts, and provides a foundation for future

research on the diverse types of IT applications in product development and their potential impact on both product and service innovation. Reflecting two critical shifts in the service sector – the increased complexity and convergence in products and services, along with the rise of the Internet and rapid digitization of products and services – the book is organized into three sections. Section 1 presents four chapters that focus on the traditional areas of project and process management; Section 2 presents four chapters focusing on the emerging areas of collaborative innovation and knowledge co-creation; and Section 3 presents one chapter that draws it all together and identifies some of the important themes and issues for future research. This important new work has much to offer academic researchers in management in its in-depth theoretical analysis of the wide range of organizational and management issues associated with the application of IT in product and service development. It will also appeal to researchers and thought-leaders in consulting organizations whose primary area of interest is product development or IT applications.

**The Future of Eco-labelling** Sep 14 2021 Eco-labelling is one of the key tools used by policy-makers in many parts of the world to encourage more sustainable production and consumption. By providing environmental information on products and services, eco-labels address both business users and consumers and range from mandatory approaches, such as required product declarations, to voluntary approaches, such as national eco-labels. Eco-labels can play an important role in environmental policy. They reward and promote environmentally superior goods and services and offer information on quality and performance with respect to issues such as health and energy consumption. Eco-labels fit well into a

multi-stakeholder policy framework – as promulgated recently by the EU's integrated product policy (IPP) – since the development of criteria for labels and the acceptance in the market requires the involvement of a wide range of different parties, from government and business, to consumers and environmental organisations. However, many eco-labelling schemes have had troubled histories, and questions have been raised about their effectiveness. So, are eco-labels an effective tool to foster the development, production, sale and use of products and to provide consumers with good information about the environmental impacts of those products? Is eco-labelling useful to business as a marketing tool? What factors contribute to the development of successful schemes? More than ten years after its establishment, can the EU Flower be considered a success? Are national eco-labels such as the German Blue Angel and the Norwegian White Swan more effective? Should eco-labels be harmonised? Are eco-labels achieving their original aim of fostering sustainable production and consumption? For which product groups are ISO type I eco-labels appropriate and inappropriate? Are other labels, such as mandatory, ISO type II and ISO type III labels more effective in some cases? Are eco-labels focusing on the main environmental policy targets or just on "low-hanging fruit"? Are eco-labels really linked to other tools of IPP? The Future of Eco-labelling provides answers to all of these questions. Based on a major EU research exercise, the book plots a course for policy-makers to address some of the historic problems with eco-labelling, to learn what works and what doesn't and to move forward with schemes that can make a real difference to sustainable production and consumption. The book analyses the conditions under which eco-labelling schemes-both mandatory and voluntary-are or can become an efficient and effective tool to achieve given objectives; assesses previous experiences with eco-labels in different European countries and the relationship of these schemes with business strategies, IPP and market conditions; defines strategies aimed at linking eco-labels with other IPP measures; explores how eco-labels can be used to encourage sustainable consumption patterns, create green markets, foster innovation and development of green products and services, and implement multi-stakeholder initiatives; and sets out detailed recommendations for the future of eco-labelling. The book will be required reading for policy-makers, businesses involved with eco-labelling schemes and researchers interested in the development of sustainable production and consumption and IPP worldwide.
