Albion Lodge 196er Sep 01 2022 This book traces the history of Freemasonry in Barbados from its earliest times in 1740 through to the Consecration of Albion Lodge No. 196 E.R., in 1790 thereafter the reader will embark upon an exciting journey to the present day. There is also materials on the formation of the District Grand Lodge of Barbados and the Eastern Caribbean as it is now called, and a list of District Grand Masters, which should be of interest to members of Lodges that comprise the District. This is a must reader for every member of Albion Lodge 196 E.R., and masons of other Lodges meeting in Barbados and the Eastern Caribbean, who have a keen interest in understanding the several trials which Freemasonry had to overcome in order to become the vibrant organization it is today.

Written In the Sky Aug 08 2020 Since childhood, Mark Carr wanted to fly, and fly he did ... firstly as a naval aviator, a jet instructor and later, pilot with Cathay Pacific Airways. This 'techno-biography' is written for those who, like him, seemingly have hydraulic oil flowing through their veins. The book also gives readers of a non-flying background an insight into military and civil aviation. Sit in the cockpit with Mark and gain a rare insight into how these amazing machines work, and how the men and women in the cockpits and flight decks operate them safely and efficiently. His story is also entwined with historical context including his first-hand account of the infamous Australian Pilots' Dispute of 1989 and life as an expatriate in Hong Kong.

***From Traditional to Ecological* Jul 07 2020 The majority of research conducted in the field of Attention Deficit/Hyperactivity Disorder (AD/HD) has comprised laboratory-based psychological studies using highly repetitive and boring tasks. Hence, the generalisability of such work is somewhat limited. This book describes, in three sections, a unique research program which successfully sought to achieve ecological validity in research. Specifically, the three sections describe: the historical conceptualisation of AD/HD and the emergence of models of AD/HD; the development of a unique quantitative research program incorporating studies using a traditional approach through to those conducted in naturalistic settings; and the initiation of a related 'grounded theory' research approach to bringing about a fuller understanding of the everyday experiences of individuals with AD/HD.**
