Saviour Siblings Oct 17 2021 Genetic screening technologies involving pre-implantation genetic diagnosis (PGD) raise particular issues about selective reproduction and the welfare of the child to be born. How does selection impact on the identity of the child who is born? Are children who are selected for a particular purpose harmed or treated as commodities? How far should the state interfere with parents' reproductive choices? Currently, concerns about the welfare of the child in selective reproduction have focused on the individual interests of the child to be born. This book re-evaluates the welfare of the child through the controversial topic of saviour sibling selection. Drawing on relational feminist and communitarian ethics, Michelle Taylor-Sands argues that the

welfare of the child to be born is inextricably linked with the welfare of his/her family. The author proposes a relational model for selective reproduction based on a broad conception of the welfare of the child that includes both individual and collective family interests. By comparing regulation in the UK and Australia, the book maps out how law and policy might support a relational model for saviour sibling selection. With an interdisciplinary focus, *Saviour Siblings: A Relational Approach to the Welfare of the Child in Selective Reproduction* will be of particular interest to academics and students of bioethics and law as well as practitioners and policymakers concerned with the ethics of selective reproduction.

Travellers through Empire Dec 27 2019 In the late eighteenth century and throughout the nineteenth century, an unprecedented number of Indigenous people - especially Haudenosaunee, Anishinaabeg, and Cree - travelled to Britain and other parts of the world. Who were these transatlantic travellers, where were they going, and what were they hoping to find? Travellers through Empire unearths the stories of Indigenous peoples including Mississauga Methodist missionary and Ojibwa chief Reverend Peter Jones, the Scots-Cherokee officer and interpreter John Norton, Catherine Sutton, a Mississauga woman who advocated for her people with Queen Victoria, E. Pauline Johnson, the Mohawk poet and performer, and many others. Cecilia Morgan retraces their voyages from Ontario and the northwest fur trade and details their efforts overseas, which included political negotiations with the Crown, raising funds for missionary work, receiving an education, giving readings and performances, and teaching international audiences about Indigenous cultures. As they travelled, these remarkable individuals forged new families and friendships and left behind newspaper interviews, travelogues, letters, and diaries that provide insights into their cross-cultural encounters. Chronicling the emotional ties, contexts, and desires for agency, resistance, and negotiation that determined their diverse experiences, Travellers through Empire provides surprising vantage points on First Nations travels and representations in the heart of the British Empire.

The Explosive Child Aug 23 2019 What's an explosive child? A child who responds to routine problems with extreme frustration-crying, screaming, swearing, kicking, hitting, biting, spitting, destroying property, and worse. A child whose frequent, severe outbursts leave his or her parents feeling frustrated, scared, worried, and desperate for help. Most of these parents have tried everything-reasoning, explaining, punishing, sticker charts, therapy, medication-but to no avail. They can't figure out why their child acts the way he or she does; they wonder why the strategies that work for other kids don't work for theirs; and they don't know what to do instead. Dr. Ross Greene, a distinguished clinician and pioneer in the treatment of kids with social, emotional, and behavioral challenges, has worked with thousands of explosive children, and he has good news: these kids aren't attention-seeking, manipulative, or unmotivated, and their parents aren't passive, permissive pushovers. Rather, explosive kids are lacking some crucial skills in the domains of flexibility/adaptability, frustration tolerance, and problem solving, and they require a different approach to parenting. Throughout this compassionate, insightful, and practical book, Dr. Greene provides a new conceptual framework for understanding their difficulties, based on research in the

neurosciences. He explains why traditional parenting and treatment often don't work with these children, and he describes what to do instead. Instead of relying on rewarding and punishing, Dr. Greene's Collaborative Problem Solving model promotes working with explosive children to solve the problems that precipitate explosive episodes, and teaching these kids the skills they lack.

Robert the Bruce Feb 09 2021 Robert the Bruce (1274–1329) famously defeated the English at Bannockburn and became the hero king responsible for Scottish independence. In this fascinating new biography of the renowned warrior, Michael Penman focuses on Robert's kingship in the fifteen years that followed his triumphant victory and establishes Robert as not only a great military leader but a great monarch. Robert faced a slow and often troubled process of legitimating his authority, restoring government, rewarding his supporters, accommodating former enemies, and controlling the various regions of his kingdom, none of which was achieved overnight. Penman investigates Robert's resettlement of lands and offices, the development of Scotland's parliaments, his handling of plots to overthrow him, his relations with his family and allies, his piety and court ethos, and his conscious development of an image of kingship through the use of ceremony and symbol. In doing so, Penman repositions Robert within the context of wider European political change, religion, culture, and national identity as well as recurrent crises of famine and disease.

The Global Family Planning Revolution Dec 19 2021 The striking upsurge in population growth rates in developing countries at the close of World War II gained force during the next decade. From the 1950s to the 1970s, scholars and advocacy groups publicized the trend and drew troubling conclusions about its economic and ecological implications. Private educational and philanthropic organizations, government, and international organizations joined in the struggle to reduce fertility. Three decades later this movement has seen changes beyond anyone's most optimistic dreams, and global demographic stabilization is expected in this century. The Global Family Planning Revolution preserves the remarkable record of this success. Its editors and authors offer more than a historical record. They discuss important lessons for current and future initiatives of the international community. Some programs succeeded while others initially failed, and the analyses provide valuable guidance for emerging health-related policy objectives and responses to global challenges.
