Focussing on Australia, Canada, New Zealand, South Africa, the United Kingdom and the United States, this comparative 2011 study explores four major issues affecting the judicial institution. These issues relate to the appointment and discipline of judges; judges and freedom of speech; the performance of non-judicial functions by judges; and judicial bias and recusal, and each is set within the context of the importance of maintaining public confidence in the judiciary. The essays highlight important episodes or controversies affecting members of the judiciary to illustrate relevant principles.

The Oxford Handbook of Fiduciary Law Oct 24 2021 The Oxford Handbook of Fiduciary Law provides a comprehensive overview of critical topics in fiduciary law and theory through chapters authored by leading scholars. The Handbook opens with surveys of the many fields of law in which fiduciary duties arise, including agency law, trust law, corporate law, pension law, bankruptcy law, family law, employment law, legal representation, health care, and international law. Drawing on these surveys, the Handbook offers a synthetic analysis of fiduciary law's key concepts and principles. The volume also provides numerous comparative perspectives on fiduciary law from eminent legal historians and from scholars with deep expertise in a diverse array of the world's legal systems. Finally, the Handbook lays the groundwork for future research on fiduciary law and theory by highlighting cross-cutting themes, identifying persistent theoretical and practical challenges, and exploring how the field could be enriched through empirical analysis and interdisciplinary insights from economics, philosophy, and psychology. Unparalleled in its breadth and depth of coverage, The Oxford Handbook of Fiduciary Law represents an invaluable resource for practitioners, policymakers, scholars, and students in this essential field of law.

The Public Affairs Faculty Manual Oct 12 2020 While public affairs faculty study administration and management techniques, few administrators of public affairs programs receive formal training in the nuts and bolts of academic administration. Even those faculty who come to academia after distinguished careers in managerial positions may not be ready for the very different (and difficult) environment of university administration. The Public Affairs Faculty Manual argues that public affairs as a field needs to ensure that knowledge about administration and management is applied to the running of its academic programs, and brings together major leaders in the discipline to explore key features of academic administration. Many of these leaders have served as Master of Public Administration (MPA) directors, chairs, and deans at the nation's top public affairs programs. Crucial issues of academic administration discussed include the basics of public affairs programs, models of governance, roles of different administrative leaders, planning and budgeting for programs, navigating the accreditation process, assessing and improving student learning, ensuring social equity and cultural competency, mentoring faculty, developing curriculum, and helping provide service and applied

research to community partners. Contributors have served as MPA directors, chairs, and deans at the nation's topic public affairs programs. Themes running throughout the book's chapters are examined, and additional resources to help manage public affairs programs are offered. This collection of essays and the strategies within it are designed to encourage faculty to assume positions of leadership in their programs and manage those programs in an effective, efficient, and fair manner. The Public Affairs Faculty Manual is required reading for new, seasoned, and aspiring academic administrators in public administration, public policy, and nonprofit management programs, as well as schools of government.
