A Companion to Heritage Studies Jan 03 2020 *A Companion to Heritage Studies* BLACKWELL

COMPANIONS TO ANTHROPOLOGY *A Companion to Heritage Studies* "This Companion provides a gateway to heritage studies for students and scholars alike. Taken together, the essays testify to how exciting

and dynamic this field has become.” Valdimar Tr. Hafstein, University of Iceland “Interdisciplinary and international in scope, *A Companion to Heritage Studies* succeeds in bringing together critical and practical, historicizing and future-oriented scholarship on what has become an all-pervasive global interest and industry, passion and resource.” Regina F. Bendix, Göttingen University, Germany “A vast and complete overview of the contemporary challenges of heritage preservation and management. This is an important book for practitioners, planners, and policy makers. The Companion fills a gap and helps address many of the uncomfortable questions heritage preservation is facing today.” Francesco Bandarin, Special Advisor to UNESCO for Heritage and Professor, University Iuav of Venice *A Companion to Heritage Studies* is a comprehensive, state-of-the-art survey of the interdisciplinary study of cultural heritage. Featuring a substantial framework-setting essay by the editors, and contributions from an international array of scholars, including some with extensive experience in heritage practice through UNESCO, the World Heritage Centre, ICOMOS and national heritage systems, this Companion offers a cutting-edge guide to this emergent and increasingly important field that is global in scope, cross-cultural in focus, and critical in approach. The selected essays have been innovatively organized into three sections on the expansion, use and abuse, and the recasting of heritage. The Companion covers all of the key themes in research, including old and new outlooks on cultural heritage and its management, heritage as a form of cultural politics, the emergence of critical heritage studies, the role of heritage in times of rapid change and conflict, heritage in environmental protection, the rise of intangible heritage, museums and digital heritage, World Heritage and tourism, and heritage ethics and human rights. *A Companion to Heritage Studies* will be an invaluable resource for students and scholars of anthropology, archeology, and cultural studies, as well as anyone interested in better understanding the historical, social, and political significance of heritage.

Methodological issues in accounting research Aug 10 2020 What is my theory? How do I choose a theory? Why and how should I employ a particular method for collecting the empirical data? These basic questions concern everyone involved in research. A research study can be a voyage of discovering or choice of theoretical perspective as well as gathering empirics or facts on a problem or situation. This book provides a good guideline as to why and how to choose a particular theory or method to study an organisational phenomenon such as accounting. All the chapters provide both retrospective and contemporary views by scholars in the field. Each chapter documents the latest developments and research in accounting and control systems and provides valuable insights into methodological perspectives in accounting research. This second edition has also introduced a number of new chapters covering strategy-management control as practice, grounded theory approach, institutional logic and rhetoric, social interaction theory, actor-network theory and practice theory. The book is primarily intended for research students and academic researchers. It can also be used for undergraduate Honours course as well as postgraduate accounting and business methodology courses. Research organisations and consulting firms in accounting and business fields may also find this book useful. The principal aims of this second edition are (1) to update the chapters previously published in 2006 and (2) to introduce new chapters documenting recent developments in accounting research.

Management Accounting in Support of Strategy Oct 12 2020 In the 1980's and 1990's management accounting was criticised for being too operationally focused and failing to aid strategic decision making. As a response the term strategic management accounting, along with new techniques, were promoted to address the issue. Despite the emergence of articles and books explaining the strategic management concepts and techniques, the term has not become an accepted element in the lexicon of accounting practitioners. Research, however, suggests that practitioners do use a variety of management accounting techniques to support the achievement of strategic objectives. This book, rather than just explain the techniques, takes a different approach and utilises the strategic management framework to indicate how management accounting can aid the strategic management process and hence strategic decision making. It takes the view that management accounting should aid management decision making whether it be operational, business or strategic. A range of strategy models and accounting techniques are covered in the book together with an explanation of how they can be combined to aid the analysis, development, implementation and evaluation of strategy. The book will aid students who are studying accounting courses as well as those studying courses for which business strategy forms a part of the content. There are books that cover accounting techniques, and books that cover strategy models, but few that emphatically link the two together to provide guidance on how management accounting can aid the strategic management process. The book will also benefit practitioners wishing to understand how the accountant can make a significant contribution to the strategic management of an organisation to ensure its continued success.

Management Control Theory Jan 15 2021 First published in 1998, this volume of readings provides an overview of the development of the study of Management Control theory over the past 35 years. The period encompasses the publication of a major and seminal text by Anthony and Dearden in 1965, which acted as a touchstone in defining the range and scope of management control systems. This laid management control's foundations in accounting-based mechanisms of control, an element which has been seen as both a strength and a constraint. A good deal of work has followed, providing both a development of the tradition as well as a critique. In this volume we attempt to provide a range of readings which will illustrate the variety of possibilities that are available to researchers, scholars and practitioners in the area. The readings illustrate the view that sees control as goal directed and integrative. They go on to explore the idea of control as adaption, consider its relationship with social structure and survey the effects of the interplay between the organisation and the environment. The essays included are not intended to lead the reader through a well-ordered argument which concludes with a well reasoned view of how management control should be. Instead it seeks to illustrate the many questions which have been posed but not answered and to open up agendas for future research.

Soulful Corporations Jun 19 2021 In the light of multiple corporate debacles, financial crises and environmental disasters across the globe, the need for corporate goals to transition from simply maximising shareholder wealth to optimising stakeholder welfare is being echoed in various quarters. This book makes a distinct contribution by looking at Corporate Social Responsibility (CSR) from a values-based perspective with a focus on providing a balance between corporate success and social well-being. The book emphasizes that corporations need to redefine their purposes to co-create long-term, sustainable and win-win solutions for multiple stakeholders through mutually-fulfilling and value-adding collaborative efforts. Through the ideal of 'A Soulful Corporation', the book proposes a new story where corporations, as associations of individuals, can identify their 'collective spirits' in terms of environmentally-aware, socially-inclusive and financially-rewarding missions. Some of the unique features of the book include: · A detailed study of the evolution of CSR from the ancient to contemporary times · Insights gained through empirical research and personal interviews with over 100 industry captains, CEOs, MDs and heads of the CSR function across companies and industries · Case studies on CSR practices and processes in leading Indian companies including the Tata Group, TVS Motor, HUL, Wipro, L&T, Bharat Petroleum, HDFC Bank, Birla Group, Reliance Industries and others. · Cases on unique social welfare projects in the areas of education, healthcare and drinking water supply · A 'Society and Local Community Welfare Framework' and a '12-point Agenda for Affirmative Action' that propose policy recommendations and provide corporations with a roadmap for their CSR journey in the light of the mandatory CSR spending introduced by the Government of India. The book has relevance to multiple stakeholders: students, academics, CSR researchers, policy-makers, industry captains, business managers and entrepreneurs.

Determinants and Consequences of the Use of Budgets Dec 02 2019 The alteration of the business environment has heightened the role of management accounting and control systems (MACS). Not only the design of MACS has gained increased relevance but also the ways in which MACS are used. Based upon empirical data from 69 German manufacturing companies of different industries testing the developed research model, the evidence reinforces the knowledge concerning budgets and their use and essentially bridges the gap in understanding the relationship between budgeting and strategy by revealing the positive effects formal MACS perform. This book is important reading for graduate students of business administration and executives with focus on budgeting management accounting and strategic management.

Globalisation of Accounting Standards Sep 22 2021 In this book, Jayne Godfrey and Keryn Chalmers explore the intricacies of the globalisation of accounting standards - arguably one of the most significant business developments of the wider globalisation process during the past two decades. They examine the key issues and implications of this harmonization of accounting standards from the perspectives of a diverse range of worldwide stakeholders. "Globalisation of Accounting Standards" shows that globalisation approaches differ significantly because countries seek to maintain varying degrees of sovereignty over their regulations. International differences in economic, political, legal, religious and social characteristics also affect globalisation approaches and, in turn, influence national accounting standard-setting agendas. The book explores why countries relinquish their existing national accounting standard-setting regimes to join the global movement. It also seeks to resolve questions such as: To what extent are national incentives altruistic, economic, political or social? Who are the winners and losers in the process? This authoritative book is thoroughly researched and expertly informed. Written by both academics and regulators, it tackles a critical and controversial issue in the globalisation movement. As such, it will be of great interest to a wide-ranging audience including: international, national, private and public sector standard-setters, economic regulators, accounting academics and political economists and strategists.
