Prealgebra May 11 2021 "Prealgebra is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students with diverse backgrounds and learning styles. Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Prealgebra follows a nontraditional approach in its presentation of content. The beginning, in particular, is presented as a sequence of small steps so that students gain confidence in their ability to succeed in the course. The order of topics was carefully planned to emphasize the logical progression throughout the course and to facilitate a thorough understanding of each concept. As new ideas are presented, they are explicitly related to previous topics."--BC Campus website.

Climbing the Stairs Jan 07 2021 During World War II and the last days of British occupation in India, fifteen-year-old Vidya dreams of attending college. But when her forward-thinking father is beaten senseless by the British police, she is forced to live with her grandfather's large traditional family, where the women live apart from the men and are meant to be married off as soon as possible. Vidya's only refuge becomes her grandfather's upstairs library, which is forbidden to women. There she meets Raman, a young man also living in the house who relishes her intellectual curiosity. But when Vidya's brother makes a choice the family cannot condone, and when Raman seems to want more than friendship, Vidkya must question all she has believed in. Padma Venkatraman's debut novel poignantly shows a girl struggling to find her place in a mixedup world. *Climbing the Stairs* is a powerful story about love and loss set against a fascinating historical backdrop.
