For Real May 30 2020 From Alison Cherry, author of Look Both Ways and Red, comes a terrific story that's "too fun to miss" (USA Today) about two sisters and one big question: how do you know who's for real? When Miranda discovers her boyfriend, Samir, cheating on her just after her college graduation, her sister, Claire, comes up with the perfect plan. They'll outshine Miranda's ex on Around the World, a reality TV show on which fame-obsessed Samir is already scheduled to compete. Claire expects the game to be simple: all they need to do is race around the world faster than Samir and they'll win a million bucks. But the show has a twist, and Claire is stunned to find herself in the middle of a reality-show romance that may be just for the cameras. In a world where drama is currency and manipulation is standard, this summer could end up being the highlight of her life . . . or an epic fail forever captured on film. Statistics for Real-Life Sample Surveys Sep 14 2021 Samples used in social and commercial surveys, especially of the general population, are usually less random (often by design) than many people using them realise. Unless it is understood, this 'non-randomness' can compromise the conclusions drawn from the data. This book introduces the challenges posed by less-than-perfect samples, giving background knowledge and practical guidance for those who have to deal with them. It explains why samples are, and sometimes should be, non-random in the first place; how to assess the degree of non-randomness; when correction by weighting is appropriate and how to apply it; and how the statistical treatment of these samples must be adapted. Extended data examples show the techniques at work. This is a book for practising researchers. It is a reference for the methods and formulae needed to deal with commonly encountered situations and, above all, a source of realistic and implementable solutions.

Common Sense, the Turing Test, and the Quest for Real AI Oct 03 2020 What artificial intelligence can tell us about the mind and intelligent behavior. What can artificial intelligence teach us about the mind? If AI's underlying concept is that thinking is a computational process, then how can computation illuminate thinking? It's a timely question. AI is all the rage, and the buzziest AI buzz surrounds adaptive machine learning: computer systems that learn intelligent behavior from massive amounts of data. This is what powers a driverless car, for example. In this book, Hector Levesque shifts the conversation to "good old fashioned artificial intelligence," which is based not on heaps of data but on understanding commonsense intelligence. This kind of artificial intelligence is equipped to handle situations that depart from previous patterns—as we do in real life, when, for example, we encounter a washed-out bridge or when the barista informs us there's no more soy milk. Levesque considers the role of language in learning. He argues that a computer program that passes the famous Turing Test could be a mindless zombie, and he proposes another way to test for intelligence—the Winograd Schema Test, developed by Levesque and his colleagues. "If our goal is to understand intelligent behavior, we had better understand the difference between making it and faking it," he observes. He identifies a possible mechanism behind common sense and the capacity to call on background knowledge: the ability to represent objects of thought symbolically. As AI migrates more and more into everyday life, we should worry if systems without common sense are making decisions where common sense is needed.

Gary Frazier helps readers: Discern what beliefs are based on fact or fiction Discover the truth in the midst of so much deception Understand the depth of Scripture that speaks of HELL more than HEAVEN. Hell is for Real is a clear search for truth, and truth matters for the simple reason that we all have a divine appointment with death. What if those who do not believe in HELL die one day and find they made a tragic and eternal mistake? Where do we turn for real answers? Should we look to movies, television, and stories of personal experiences, psychics, or religion? Cemeteries and mausoleums dot the landscape of America as evidence and reminders of the sad reality of death. The good news is there is a source of hope that provides answers for each and every one who cares to seek the truth. Join the search and choose wisely because, eternity is too long to be wrong and Hell is for Real.
