Just Cross References Oct 23 2019 Do you skip the cross references in Bible study? Wouldn't it save time if they were just right there with your Bible verses? Of course it would! Just Cross References, by Steve Flessner, is a completely new concept. It presents cross references right along with their Bible text. The author, like many other people, used to skip over the cross references when doing Bible study, but with this book, they are right there with his Bible. Now he is impressed with how much they add to his study; no more wasting time looking up a cross reference. It's like having a text for an individual mini-Bible study. Cross-references keep readers from taking isolated verses and giving them the wrong meaning. All in-depth study requires their use. Just Cross References is a book readers will enjoy when they are having a quiet time or just reading.

bookdown Sep 14 2021 bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.
