[Principles of Helicopter Aerodynamics with CD Extra](#) Oct 31 2022 Written by an internationally recognized teacher and researcher, this book provides a thorough, modern treatment of the aerodynamic principles of helicopters and other rotating-wing vertical lift aircraft such as tilt rotors and autogiros. The text begins with a unique technical history of helicopter flight, and then covers basic methods of rotor aerodynamic analysis, and related issues associated with the performance of the helicopter and its aerodynamic design. It goes on to cover more advanced topics in helicopter aerodynamics, including airfoil flows, unsteady aerodynamics, dynamic stall, and rotor wakes, and rotor-airframe aerodynamic interactions, with final chapters on autogiros and advanced methods of helicopter aerodynamic analysis. Extensively illustrated throughout, each chapter includes a set of homework problems. Advanced undergraduate and graduate students, practising engineers, and researchers will welcome this thoroughly revised and updated text on rotating-wing aerodynamics.

Sunbeam Aero Engines Mar 24 2022 The first great British aircraft engine manufacturer, the Sunbeam Motor Car Company turned to the sunrise industry of aviation in 1912, and was among the first to buy an aircraft to test their engines, flown by a full-time test pilot, the famous Jack Alcock. Through the First World War Sunbeam was a vital supplier, of both engines and aircraft, particularly to the Royal Naval Air Service. Consistently Sunbeams were the most powerful British engines available, and they were fitted to the first aircraft to torpedo an enemy ship, the only aircraft to fly at the Battle of Jutland, and the first seaplanes to operate in the heart of Africa. After the War they powered the greatest of British Airships the R.34, the first aircraft to fly the Atlantic east to west, and the first to make the double crossing, and the R.33, the British dirigible with the highest flying hours. As Sunbeam reverted to car manufacture their aero engines were fitted to a succession of land speed record-breaking cars, including the first to exceed 150 mph and the first to exceed 200 mph, ironically, faster than any Sunbeam-powered aircraft.
