Research Methods in English Medium Instruction Nov 11 2020 In this special edited volume, the editors and invited English Medium Instruction (EMI) researchers, from different parts of the world, outline the latest EMI research methods. Providing academic instruction using English is rapidly spreading in many countries where English is a second or foreign language, and there is a growing interest in researching the effectiveness and effects of EMI across different educational levels. This volume includes chapters on everything from research into classroom interaction to teachers' and students' perceptions and motivations to language challenges and strategies and the pedagogical implications of translanguaging in EMI classrooms. These specific topics were chosen to reflect different approaches to researching EMI. Each chapter focuses on a specific type of research methodology. It begins with an overview of the literature of the topic under discussion. Then an example study is provided to illustrate how this methodology can be used to investigate EMI. Each chapter identifies the process that the EMI researcher used to conduct their research and discusses key dilemmas they faced, focusing particularly on the methodological issues they encountered. By exploring these issues, this volume hopes to inform theory (or the lack thereof) underlying research into the phenomenon of EMI. This volume is indispensable for EMI tutors, curriculum developers, policymakers, and teachers, as well as students at both undergraduate and postgraduate levels. It is particularly valuable for researchers from across the globe working in the fields of applied linguistics, language education, English for Academic Purposes (EAP), English Language Teaching (ELT), and Teaching English to Speakers of Other Languages (TESOL).

Evolution Education Around the Globe Jun 18 2021 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: (a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to peoples' views about evolution, (b) designing, implementing, evaluating evolution education curriculum that reflects contemporary evolution understanding, and (c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

Language Across the Curriculum & CLIL in English as an Additional Language (EAL) Contexts Feb 12 2021 This book will be of interest to a broad readership, regardless of whether they have a background in sociolinguistics, functional linguistics or genre theories. It presents an accessible "meta-language" (i.e. a language for talking about language) that is workable and usable for teachers and researchers from both language and content backgrounds, thus facilitating collaboration across content and language subject panels. Chapters 1 to 3 lay the theoretical foundation of this common meta-language by critically reviewing, systematically presenting and integrating key theoretical resources for teachers and researchers in this field. In turn, Chapters 4 to 7 focus on issues in pedagogy and assessment, and on school-based approaches to LAC and CLIL, drawing on both research studies and the experiences of front-line teachers and school administrators. Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals, where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society, and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge. In closing, Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry.

He'll Be OK Apr 16 2021 The 10th anniversary edition of the iconic book that takes parents into the mysterious world of boys, with new foreword, introduction and tribute to the author. THE TENTH ANNIVERSARY EDITION OF A PARENTING CLASSIC How do you raise boys to men in a world where trouble beckons at every turn? How do you make sure they learn the 'right' lessons, stay out of danger, find a path to follow? How do you ensure they'll be OK? Celia Lashlie has some of the answers. After years working in the prison service, she knows what can happen when boys make the wrong choices. She also knows what it's like to be a parent - she raised a son on her own and feared for his survival. As a crucial part of the Good Man Project, she talked to 180 classes of boys. Her insights into what boys need - and what parents can do to help them - are ground-breaking. In this new edition of her honest, no-nonsense and best-selling book, Celia reveals what goes on inside the world of boys. With clarity and insight, she offers parents - especially mothers - practical and reassuring advice on raising their boys to become good, loving, articulate men. "Celia did an enormous amount of work, particularly standing up for at risk young people, and she made an enormous contribution." - New Zealand Prime Minister John Key

Relationality and Learning in Oceania Jan 02 2020 Relationality and Learning in Oceania: Contextualizing Education for Development critically engages debates in comparative education and international development relating to context, culture, language and indigenous epistemologies. It draws on experiences of a south-north research-practice team in Solomon Islands and Tonga.

Multidisciplinary scientific notes. Theory, history and practice Jun 06 2020 Proceedings of the VI International Scientific and Practical Conference Misconceptions in Biology Apr 28 2022 Public exam is not just a game of scoring the most points; it is also a game of making the least errors and mistakes. The purpose of public exam is to distinguish good students from the bad ones. And to do this, the examiners need to set up many pitfall traps. You must prepare yourself to jump over these traps. Otherwise, you may have a hard time scoring marks, which will sadly cost you the exam or even your future. This book aims to teach you how to avoid making fatal mistakes in Biology exams. The authors will dig into and dissect the common misconceptions in Biology. Features * 5-in-1 exam guide: Exam Practice, Misconception, Misconception Analysis, Concept Review and Exam Drill * 240 most common errors and misconceptions distilled from MiB database, which includes 1,300 errors and mistakes in 20 years of Markers' Report * Bonus material: List of commonly misspelled biological terms * Suitable for HKDSE, IB, IGCSE, GCSE, GCE, O-level and A-level Biology * Available in ePub and PDF format #hkdse #biology #bio #sba #exam #bioexam #exercise #guide #test

English Language Assessment and the Chinese Learner Jan 14 2021 Building on current theoretical and practical frameworks for English language assessment and testing, this book presents a comprehensive, up-to-date, relevant picture of English language assessment for students in China (Mainland China, Hong Kong and Taiwan) and for Chinese learners of English around the world.

Oct 23 2021 The World of Science Education Dec 25 2021 Each volume in the 7-volume series The World of Science Education reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe and Israel, Arab States, and Sub-Saharan Africa. The focus of this Handbook is on science education in Asia and the scholarship that most closely supports this program.

Applied Computer Sciences in Engineering Dec 01 2019 This volume constitutes the refereed proceedings of the 8th Workshop on Engineering Applications, WEA 2021, held in Medellin, Colombia, in October 2021. Due to the COVID-19 pandemic the conference was held in a hybrid mode. The 33 revised full papers and 11 short papers presented in this volume were carefully reviewed and selected from 127 submissions. The papers are organized in the following topical sections: computational intelligence; bioengineering; Internet of Things (IoT); optimization and operations research; engineering applications.

Hong Kong DSE Biology Critical Guide (Yellowreef) Sep 21 2021 • important for accurate self-education • provide expert guidance • enable students to acquire competence as fast as

'dual Mol streaming' policy since September 1998. The book provides a critical review of the significant milestones and key policy documents from the early 1990s, and outlines the concerns of stakeholders at the receiving end. Another Mol debate concerns the feasibility and desirability of teaching Chinese in Putonghua (TCP). Based on a critical review of the TCP literature and recent psycholinguistic and neuroscience research, the language-in-education policy implications are discussed, followed by a few recommendations. Hongkongers of South Asian descent saw their life chances curtailed as a result of the post-1997 changes in the language requirements for gaining access to civil service positions and higher education. Based on a study of 15 South Asian undergraduate students' prior language learning experiences, recommendations are made to help redress that social inequity problem. Public Examinations Examined Jul 20 2021 High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

IGCSE Cambridge International Mathematics (0607) Extended Jul 28 2019
 Ready to Write More Feb 01 2020 AutoCAD 2015 for Interior Design and Space Planning helps students understand the commands and features of AutoCAD 2015 and demonstrates how to use the program to complete interior design and space planning projects. Covering both two- and three-dimensional drawings, the text provides abundant exercises that walk students step-by-step through the use of AutoCAD prompts and commands. Using numerous illustrations, the text captures the essence of this powerful program and the importance it plays in the interior design, architecture and space planning professions. Features include: · Covers new AutoCAD 2015 interface · Progresses from basic commands to complex drawing exercises. · Provides over 100 exercises and projects. · Highlights seven projects appropriate for interior design, space planning and architecture students. · Includes coverage of the AutoCAD DesignCenter · Covers solid modeling in two chapters

EBOOK: Beginning Teaching, Beginning Learning: In Early Years and Primary Education Aug 21 2021 This bestselling textbook provides an introduction to the fundamentals of teaching and learning in early years and primary education. If you are training to work in schools or other educational settings, the book offers a wide range of practical and straightforward guidance, covering essential topics such as safeguarding; attachments and relationships; assessment; the indoor and outdoor environment; new technologies; behaviour management; and well-being. Thoroughly updated throughout and retaining its lively and engaging style, this new fifth edition extends your knowledge and understanding of working and playing effectively with young children. Enlivened by thought-provoking cameos and reflective questions, the book gives you the confidence to reflect upon, challenge and enhance your own pedagogies. Key features include: • Real life cameos drawn from schools and settings • Questions to promote thinking included in each chapter • Suggested further reading including a range of annotated references • Up-to-date research and issues that teachers may face Beginning Teaching, Beginning Learning is essential reading for student and newly qualified early years and primary teachers and practitioners, as well as those who educate and train them. "This outstanding book should be a core text for beginning teachers working in the birth to 11 age range. It places Early Years and Primary education in the historical context and encourages new teachers to become reflective practitioners by adopting a questioning approach based on thoughtful comparative experiences. One aspect which makes this stand out from other similar texts is the focus it has on developing a deep understanding of the partnership between children's learning and the beginner teacher. Contributors, many of whom have been teachers themselves, include experts not only in their specific fields of interest but also in teacher education more broadly so understand what is relevant for those on initial teacher education courses and those in the early stages of their teaching career." Jane Warwick, Primary PGCE Course Manager, University of Cambridge, UK "Beginning Teaching, Beginning Learning should be a core text on all birth to 11 years ITT courses. The book neatly combines grounded cameos of actual teaching experience with real life questions and dovetails these with a thoroughly referenced scholarly critique. Through its engaging style and approach the book speaks clearly and directly to the inquisitive, curious and professional novice teacher who wishes to be both thoroughly reflective and knowledgeable of the latest research. This book is hugely successful as it manages to be both very wide in its content whilst encouraging a questioning and in-depth critical thinking throughout". Guy Roberts-Holmes, MA Early Years Education Programme Director, UCL Institute of Education, UK
