Methods of Research in Psychotherapy Mar 29 2022 The prospective reader may well ask about the particular merits of this volume, especially in view of several dozen similar offerings, each with its own excellences, and of the easy availability of symposia, conferences, conventional reviews, abstract journals, and serial research reports. In spite of such other attractions, it seems to me that these 34 essays are among the most informative and stimulating which are now available in the areas covered. The editors have been successful in attracting new articles from many of the most prominent investigators now actively working at research in psychotherapy, who can therefore

speak for themselves about what they are doing. Several of the articles have been in the preparatory stage for numerous years. Not only do they represent the vanguard of research, but because of the introduction of relatively new concepts in communication theory in the clinical setting which can be implemented by the new technology (specifically the use of sound-films and tape), they probably presage the shape of much that is to come. It is commonplace that the history of a science is closely allied to the history of the tools available. Here we see the concepts, attitudes, and working methods on this frontier being set forth frankly and concretely in ways which avoid many of the deficiencies and evasions of previous clinical research.

Survey Research in the Social Sciences Apr 17 2021 Survey research was for a long time thought of primarily as a sociological tool. It is relatively recently that this research method has been adopted by other social sciences and related professional disciplines. The amount and quality of its use, however, vary considerably from field to field. This volume describes the elementary logic of survey design and analysis and provides, for each discipline, an evaluation of how survey research has been used and conceivably may be used to deal with the central problems of each field.

Child Protective Services Oct 24 2021 From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in *A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice*. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Research Handbook on Street-Level Bureaucracy Jul 09 2020 When the objectives of public policy programmes have been formulated and decided upon, implementation seems just a matter of following instructions. However, it is underway to the realization of those objectives that public policies get their final substance and form. Crucial is what happens in and around the encounter between public officials and individual citizens at the street level of government bureaucracy. This Research Handbook addresses the state of the art while providing a systematic exploration of the theoretical and methodological issues apparent in the study of street-level bureaucracy and how to deal with them.
