Genomics Research on Non-Model Plant Pathogens: Delivering Novel Insights into Rust Fungus Biology Apr 30 2020 Fungi of the order Pucciniales cause rust diseases on many plants including important crops and trees widely used in Agriculture, forestry and bioenergy programs; these encompass gymnosperms and angiosperms, monocots and dicots, perennial and annual plant species. These fungi are obligate biotrophs and -except for a few cases- cannot be cultivated outside their hosts in a laboratory. For this reason, standard functional and molecular genetic approaches to study these pathogens are very challenging and the means to study their biology, i.e. how they infect, develop and reproduce on plant hosts, are rather limited, even though they rank among the most devastating pathogens. Among fungal plant pathogens, rust fungi display the most complex lifecycles for with up to five different spore forms and for many rust fungi, alternate hosts on which sexual and clonal reproduction are achieved. The genomics revolution and particularly the application of new generation sequencing technologies have greatly changed the way we now address biological studies and has in particular accelerated and made feasible, molecular studies on non-model species, such as rust fungi. The goal of this research topic is to gather articles that present recent advances in the understanding of rust fungus biology, their complex lifecycles and obligate biotrophic interactions with their hosts, through the means of genomics. This includes genome sequencing and/or resequencing of isolates, RNA-Seq or large-scale transcriptome analyses, genome-scale detailed annotation of gene families, conformation of genes and/or expression of gene complements via proteomics, and comparative analyses among the various rust fungi and, where feasible, with other obligate biotrophs or fungi displaying distinct trophic modes. This Research Topic provides a great opportunity to provide an up-to-date account of rust fungus biology through the lens of genomics, including state-of-the-art technologies developed to achieve this knowledge.

Criminal Law Principles and the Enforcement of EU and National Competition Law Jul 26 2022 Although Article 23(5) of EU Regulation 1/2003 provides that competition law fines 'shall not be of a criminal law nature', this has not prevented certain criminal law principles from finding their way into European Union (EU) competition law procedures. Even more significantly, the deterrent effect of competition law fines has led courts in the Netherlands and the United Kingdom (UK), as well as the European Court of Human Rights, to conclude that competition law proceedings can lead to a criminal charge. This book offers the first book-length study of whether courts do indeed apply criminal law principles in competition law proceedings and, if so, how these principles are adapted to the needs and characteristics of competition law. Focusing on competition law developments (both legislative and judicial) over a period of twenty years in three jurisdictions – the Netherlands, the UK and the EU – the author compares how each of the following (criminal law) principles has emerged and been interpreted in each jurisdiction's proceedings: freedom from self-incrimination; non bis in idem; burden and standard of proof; legality and legal certainty; and proportionality of sanctions. The author offers proposals involving both legislative and judicial actions, with examples of judges invoking criminal law principles to develop an appropriate level of safeguards in competition law proceedings. The book shows that criminal law can provide a rich source of inspiration for the judiciary on the appropriate level of legal safeguards in competition law proceedings. As such, it provides an important source of information and guidance for lawyers and judges dealing with competition law matters.

Race and Football in America Jan 28 2020 As the first African American player to be drafted by the NFL and the first African American to play quarterback, George Taliaferro was a trailblazer whose athletic prowess earned him accolades throughout his football career. Instrumental in leading Indiana University to an undefeated season and undisputed Big Ten championship in 1945, Taliaferro was a star when many major universities had no black players on their rosters and others were stacking black players behind white starters. George Taliaferro would later rack up impressive statistics while playing professionally for the New York Yanks, Dallas Texans, Baltimore Colts, and Philadelphia Eagles. His athletic prowess did little to prevent him from facing segregation and discrimination on a daily basis, but his popularity as an athlete also gave him a platform. Playing professionally gave Taliaferro more opportunity to use football to fight oppression and to interact with other important trailblazers, like Joe Louis, Nat King Cole, Muhammad Ali, and Congressman John Lewis. Race and Football in America tells Taliaferro's story and profiles the experiences of other athletes of color who were recognized for their athleticism yet oppressed for their skin color, as they fought (and continue to fight) for equal rights and opportunities. Together these stories provide an insightful portrait of race in America.

Advances in Battery Technologies for Electric Vehicles Jun 20 2019 Advances in Battery Technologies for Electric Vehicles provides an in-depth look into the research being conducted on the development of more efficient batteries capable of long distance travel. The text contains an introductory section on the market for battery and hybrid electric vehicles, then thoroughly presents the latest on lithium-ion battery technology. Readers will find sections on battery pack design and management, a discussion of the infrastructure required for the creation of a battery powered transport network, and coverage of the issues involved with end-of-life management for these types of batteries. Academic Research Systems Jul 14 2021 This book is a comprehensive examination system. However, for-profit college students should have approved writing and are habituated on training. It's been a proportion of the constitution that organized authored journals. Its guidelines are the recovering of the microelectronic redundant vacating as an organization concerning reservation of the circumstantial as well as for-profit college journals and research documents. However, this is a new tactic. Many college students are not regular in study and use daily journal and researches. This book is systematically superfluous in State of Somalia College and in African colleges. There were no past studies in primary and high schools for journal and research. For-profit college journals, however, were present, as well as student-building professional academics. You must have those structures daily, if God wills you.

Crisis and Ontological Insecurity Oct 25 2019 This book develops a novel way of thinking about crises in world politics. By building on ontological security theory, this work conceptualises critical situations as radical disjunctions that challenge the ability of collective agents to 'go on'. These ontological crises bring into the realm of discursive consciousness four fundamental questions related to existence, finitude, relations and autobiography. In times of crisis, collective agents such as states are particularly attached to their ontic spaces, or spatial extensions of the self that cause collective identities to appear more firm and continuous. These theoretical arguments are illustrated in a case study looking at Serbia's anxiety over the secession of Kosovo. The author argues that Serbia's seemingly irrational and self-harming policy vis-à-vis Kosovo can be understood as a form of ontological self-help. It is a rational pursuit of biographical continuity and a healthy sense of self in the face of an ontological crisis triggered by the secession of a province that has been constructed as the ontic space of the Serbian nation since the late 19th century.

The Amicus Curiae in International Criminal Justice Apr 23 2022 The amicus curiae – or friend of the court – is the main mechanism for actors other than the parties, including civil society actors and states, to participate directly in proceedings in international criminal tribunals. Yet reliance on this mechanism raises a number of significant questions concerning: the functions performed by amici, which actors seek to intervene and why, and the influence of amicus interventions on judicial outcomes. Ultimately, the amicus curiae may have a significant impact on the fairness, representativeness and legitimacy of the tribunals' proceedings and decisions. This book provides a comprehensive examination of the amicus curiae practice of the International Criminal Court and other major international criminal tribunals and offers suggestions for the role of the amicus curiae. In doing so, the authors develop a framework to augment the potential contributions of amicus participation in respect of the legitimacy of international criminal tribunals and their decisions, while minimising interference with the core judicial competence of the tribunal and the right of the accused to a fair and expeditious trial.

The Falling Sky Feb 27 2020 Anthropologist Bruce Albert captures the poetic voice of Davi Kopenawa, shaman and spokesman for the Yanomami of the Brazilian Amazon, in this unique reading experience—a coming-of-age story, historical account, and shamanic philosophy, but most of all an impassioned plea to respect native rights and preserve the Amazon rainforest.

India's Vaccine Growth Story Dec 07 2020 Did you know that vaccines save 3 million lives annually? This potent group of weapons has notably annihilated smallpox, pushed polio to the verge of elimination and is now taking on COVID-19 as the dreaded virus keeps changing forms to survive in its fierce battle with humankind. Indians practised inoculation centuries before the West discovered vaccines in 1796. India's Vaccine Growth Story charts the journey of vaccines from the Jennerian era to the COVID-19 pandemic, covering multiple facets of vaccines, from the Indian and global perspective. Apart from discussing vaccine leadership, vaccine nationalism, vaccine hesitancy, eagerness and equity, as well as the latest diplomatic currency—the vaccine-maitri, the book also tracks the decade-long vaccine development cycle that was drastically cut short to a few months, taking readers through India's exciting and meticulously-planned sojourn of executing the world's largest vaccination drive.

The Persistence of Violence Nov 25 2019 Colombia's headline story, about the peace process with guerrilla and its attendant controversies, does not consider the fundamental contradiction of a nation that spans generosity and violence, warmth and hatred—products of its particular pattern of invasion, dispossession, and enslavement. The Persistence of Violence fills that gap in understanding. Colombia is a place that is two countries in one—the ideal and the real—summed up in the idiomatic expression, not unique to Colombia, but particularly popular there, "Hecha la ley, hecha la trampa" (When you pass a law, you create a loophole). Less cynically, and more poetically, the Nobel Laureate Gabriel García Márquez deemed Colombians capable of both the most noble acts and the most abject ones, in a world where it seems anyone might do anything, from the beautiful to the horrendous. The Persistence of Violence draws on those contradictions and paradoxes to look at how violence—and resistance to it—characterize Colombian popular culture, from football to soap opera to journalism to tourism to the environment.

The 2000s: A Decade of Contemporary British Fiction Jun 25 2022 How did social, cultural and political events in Britain during the 2000s shape contemporary British fiction? The means of publishing, buying and reading fiction changed dramatically between 2000 and 2010. This volume explores how the socio-political and economic turns of the decade, bookended by the beginning of a millennium and an economic crisis, transformed the act of writing and reading. Through consideration of, among other things, the treatment of neuroscience, violence, the historical and youth subcultures in recent fiction, the essays in this collection explore the complex and still powerful relation between the novel and the world in which it is written, published and read. This major literary assessment of the fiction of the 2000s covers the work of newer voices such as Monica Ali, Mark Haddon, Tom McCarthy, David Peace and Zadie Smith as well as those more established, such as Salman Rushdie, Hilary Mantel and Ian McEwan making it an essential contribution to reading, defining and understanding the decade.

Reimagining Global Health Oct 05 2020 Bringing together the experience, perspective and expertise of Paul Farmer, Jim Yong Kim, and Arthur Kleinman, *Reimagining Global Health* provides an original, compelling introduction to the field of global health. Drawn from a Harvard course developed by their student Matthew Basilio, this work provides an accessible and engaging framework for the study of global health. Insisting on an approach that is historically deep and geographically broad, the authors underline the importance of a transdisciplinary approach, and offer a highly readable distillation of several historical and ethnographic perspectives of contemporary global health problems. The case studies presented throughout *Reimagining Global Health* bring together ethnographic, theoretical, and historical perspectives into a wholly new and exciting investigation of global health. The interdisciplinary approach outlined in this text should prove useful not only in schools of public health, nursing, and medicine, but also in undergraduate and graduate classes in anthropology, sociology, political economy, and history, among others.

Radical Belonging Oct 17 2021 "Belonging has been a formative struggle for me. Like most people with marginalized identities, my experience has taught me that it's hard to be yourself and feel like you belong in a culture that is hostile to your existence. That's why my body of work as a scientist, author, professor, speaker, and advocate for body liberation always comes back to the impact of belonging or not belonging. *Radical Belonging* is my manifesto, helping us heal from the individual and collective trauma of injustice and support our transition from a culture of othering to one of belonging." —Lindo Bacon Too many of us feel alienated from our bodies. This isn't your personal failing; it means that our culture is failing you. We are in the midst of a cultural moment. #MeToo. #BlackLivesMatter. #TransIsBeautiful. #AbleismExists. #EffYourBeautyStandards. Those of us who don't fit into the "mythical norm" (white, male, cisgender, able-bodied, slender, Christian, etc.)—which is to say, most of us—are demanding our basic right: To know that who we are matters. To belong. Being "othered" and the body shame it spurs is not "just" a feeling. Being erased and devalued impacts our ability to regulate our emotions, our relationships with others, our health and longevity, our finances, our ability to realize dreams, and whether we will be accepted, loved, or even safe. *Radical Belonging* is not a simple self-love treatise. Focusing only on self-love ignores the important fact that we have negative experiences because our culture has targeted certain bodies and people for abuse or alienation. For marginalized people, a focus on self-love can be a spoonful of sugar that makes the oppression go down. This groundbreaking book goes further, helping us to manage the challenges that stem from oppression and moving beyond self-love and into belonging. With Lindo Bacon's signature blend of science and storytelling, *Radical Belonging* addresses the political, sociological, psychological and biological underpinnings of your experiences, helping you understand that the alienation and pain you are experiencing is not personal, but human. The problem is in injustice, not you as an individual. So many of us feel wounded by a culture that has alienated us from our bodies and divided us from each other. *Radical Belonging* provides strategies to reckon with the trauma of injustice; reclaim yourself, body and soul; and rewrite your nervous system to better cope within an unjust world. It also provides strategies to help us all provide refuge for one another and create a culture of equity and empathy, one that respects, includes, and benefits from all its diverse peoples. Whether you are transgender, queer, Black, Indigenous or a Person of Color, disabled, old, or fat—or your more closely resemble the "mythical norm"—*Radical Belonging* is your guidebook for creating a world where all bodies are valued and all of us belong—and for coping with this one, until we make that new world a reality.

Visceral and Ectopic Fat Nov 06 2020 While the health consequences and mechanisms by which visceral fat causes disease are well-studied, relatively less is known about ectopic fat, its patterns of deposition and its effects on the pathobiology of type 2 diabetes, atherosclerosis, and cardiovascular disease. *Visceral and Ectopic Fat: Risk Factors for Type 2 Diabetes, Atherosclerosis, and Cardiovascular Disease* covers the wealth of literature that has been amassed over the past decade on this topic. This reference brings all the research and clinical data together in one volume and helps clinicians and academic researchers understand more thoroughly the underlying mechanisms and interrelation between fat deposits and ectopic fat stores in relation to health and disease. It showcases some of the recent developments in adipose tissue biology, particularly on the impact of interventional strategies - bariatric surgery, liposuction, physical and dietary intervention - of which information is desired among health specialists and policy makers. Brings together up-to-date research on imaging, genetics, and risk factors for chronic diseases such as diabetes, heart disease, cancer, and fatty liver disease Takes a deep dive into the current state of knowledge regarding fat stores, ectopic fat, regulation of fat stores, clinical implications, interventions, and imaging techniques Provides up-to-date information specifically focused on visceral and ectopic fat. In addition, both pathophysiological and preventive and treatment aspects of the problem will be considered Covers a broad range of organs - different fat stores such as skeletal muscle, bone marrow, liver and kidney Discusses potential interventions to reduce abdominal fat

In the Interests of Safety Nov 18 2021 Does an airline pilot really need to surrender his tweezers at airport security when he's about to board an aircraft equipped with an axe on the back of the cockpit door Can a mobile phone really cause a major explosion at a gas station And is there really a good reason why you should be prevented from swimming in a lake more than a foot deep These rules exist, and they exist in the name of our own protection. But in this engrossing dissection of global health, safety and security regulations, authors Tracey Brown and Michael Hanlon dig a little deeper to discover the real reasons behind many of the instructions we obey without questioning their creators' motives. Their conclusions range from the startling to the staggering, and in presenting them the authors seek to empower readers to question the people and organisations who come up with them in the first place.

Saving the International Justice Regime Dec 27 2019 While resistance to international courts is not new, what is new, or at least newly conceptualized, is the politics of backlash against these institutions. *Saving the International Justice Regime: Beyond Backlash against International Courts* is at the forefront of this new conceptualization of backlash politics. It brings together theories, concepts and methods from the fields of international law, international relations, human rights and political science and case studies from around the globe to pose - and answer - three questions related to backlash against international courts: What is backlash and what forms does it take? Why do states and elites engage in backlash against international human rights and criminal courts? What can stakeholders and supporters of international justice do to meet these contemporary challenges?

Green Mama-to-Be Aug 03 2020 "I wish I'd known that when I was pregnant!" It's a feeling all parents know: wanting to keep our children safe and thriving in an ever-changing world. What happens during pregnancy sets the stage for the rest of a child's life, so the Green Mama is here to help make this period healthier, happier, and safer for both mother-to-be and baby. Swollen ankles? Difficult birth? Postpartum depression? Most expectant parents think. It won't happen to me! But from conception through to birth, families today aren't getting what they expect—or expecting what they get. The Green Mama explores a variety of sources, from the latest scientific and medical research and advice to traditional wisdom, to find out what issues, decisions, and avoidable dangers have the greatest impact on our children's health. She brings together this combined wisdom to demystify epigenetics, the microbiome, a healthy pregnancy diet, toxin-free living, pregnancy exercises, herbal remedies, natural birth, healthy postpartum care, and many of the other mysteries of modern birth and parenting. Through gentle guidance, humour, and a trove of specific advice from dependable sources, *Green Mama-to-Be* is the essential guide for today's mothers- and fathers-to-be.

Perfect Me Apr 11 2021 How looking beautiful has become a moral imperative in today's world The demand to be beautiful is increasingly important in today's visual and virtual culture. Rightly or wrongly, being perfect has become an ethical ideal to live by, and according to which we judge ourselves good or bad, a success or a failure. *Perfect Me* explores the changing nature of the beauty ideal, showing how it is more dominant, more demanding, and more global than ever before. Heather Widdows argues that our perception of the self is changing. More and more, we locate the self in the body—not just our actual, flawed bodies but our transforming and imagined ones. As this happens, we further embrace the beauty ideal. Nobody is firm enough, thin enough, smooth enough, or buff enough—not without significant effort and cosmetic intervention. And as more demanding practices become the norm, more will be required of us, and the beauty ideal will be harder and harder to resist. If you have ever felt the urge to "make the best of yourself" or worried that you were "letting yourself go," this book explains why. *Perfect Me* examines how the beauty ideal has come to define how we see ourselves and others and how we structure our daily practices—and how it enthralls us with promises of the good life that are dubious at best. *Perfect Me* demonstrates that we must first recognize the ethical nature of the beauty ideal if we are ever to address its harms.

Corporate Social Responsibility in the Hospitality and Tourism Industry Jun 01 2020 Increased tourism benefits local economies by creating more revenue and employment options as interest in the location grows. However, as the hospitality and travel industry continues to grow and adapt, it becomes imperative that they implement socially responsible procedures. *Corporate Social Responsibility in the Hospitality and Tourism Industry* discusses issues and challenges faced by organizations implementing responsible business practices within the travel, hotel, leisure and hospitality industries. Featuring best practices and theoretical concepts on the support of local economies, ethical sourcing of native goods, and sustainability procedures, this publication is a vital source for policy makers, academicians, researchers, students, technology developers, and government officials interested in emergent ethical and moral practices within the travel industry.

US Foreign Policy in the Eastern Mediterranean Aug 23 2019 This book examines US foreign policy in the Eastern Mediterranean and the region's key role in the practice and evolution of American exceptionalism. The political developments in the Eastern Mediterranean during the 19th and the first half of the 20th centuries, gave to the US opportunities to express, in the most explicit way, its anti-colonialism, the fervent support of open and democratic societies, and its willingness to openly confront tyranny and oppression whenever this was possible (or necessary) for American interests. Since that time, the region has been a testing ground for the core elements of American foreign policy deployed worldwide. The monograph shows the contributions of the United States during critical moments in the region, such as the First Barbary War (1801-1805), the introduction of Truman Doctrine, Washington's role in the Suez Crisis, the Greek junta and the Imia Crisis of 1996. It also scrutinizes the different levels of the economic, military and diplomatic challenges which China, Russia and Turkey present today, while it also covers the American approach to the Arab Spring. From a 'Shining City on a Hill' to the current 'Make America Great Again' mottoes, this critique follows American Foreign Policy in the Eastern Mediterranean and the strong bonds that the nation established with the geostrategic, political and ideological features of the region. The pace of recent events, and the increasing complexity of this global corner, prove a challenge to America today; the future and clarion call that hard work and the finest ingenuity are necessary to keep its regional hegemony, and its course toward increased prosperity. This work's goal is to inspire the conversations by academics, diplomats, leaders (both political and military) and most of all businessmen, to this end.
