**Korean** Dec 13 2020 Whether travelling to a foreign country or to your favorite international restaurant, this Nice & Easy guide gives you just enough of the language to get around and be understood. Much of the material in this book was developed for government personnel who are often assigned to a foreign country on a moment's notice and need a quick introduction to the language.

**Language at the Speed of Sight** Aug 01 2022 In this "important and alarming" book, see why so many American students are falling behind in their reading skills while others around the world excel (New York Times). In 2011, when an international survey reported that students in Shanghai dramatically outperformed American students in reading, math, and science, President Obama declared it a "Sputnik moment": a wake-up call about the dismal state of American education. Little has changed, however, since then: over half of our children still read at a basic level and few become highly proficient. Many American children and adults are not functionally literate, with serious consequences. Poor readers are more likely to drop out of the educational system and as adults are unable to fully participate in the workforce, adequately manage their own health care, or advance their children's education. In *Language at the Speed of Sight*, internationally renowned cognitive scientist Mark Seidenberg reveals the underexplored science of reading, which spans cognitive science, neurobiology, and linguistics. As Seidenberg shows, the disconnect between science and education is a major factor in America's chronic underachievement. How we teach reading places many children at risk of failure, discriminates against poorer kids, and discourages even those who could have become more successful readers. Children aren't taught basic print skills because educators cling to the disproved theory that good readers guess the words in texts, a strategy that encourages skimming instead of close reading. Interventions for children with reading disabilities are delayed because parents are mistakenly told their kids will catch up if they work harder. Learning to read is more difficult for children who speak a minority dialect in the home, but that is not reflected in classroom practices. By building on science's insights, we can improve how our children read, and take real steps toward solving the inequality that illiteracy breeds. Both an expert look at our relationship with the written word and a rousing call to action, *Language at the Speed of Sight* is essential for parents, educators, policy makers, and all others who want to understand why so many fail to read, and how to change that.

**Modern Languages Study Guides: Como agua para chocolate** Apr 16 2021 Exam Board: AQA, Edexcel, WJEC, Eduqas & CCEA Level: AS/A-level Subject: Modern Languages First Teaching: September 2017 First Exam: June 2018 Literature analysis made easy.
