From Saint-Germain to Lisbon Oct 16 2021 This comprehensive book is mainly based on primary archive sources and eyewitness talks. It focuses on Austria's relations to Europe in general, two significant issues of European integration especially after 1945 as well as on its EU membership. Ten chapters will show the developments over decades in a chronological manner. One concentrates on Austria's small room for political maneuverability between concepts of Middle Europe, Paneurope, the "Anschluss" by Nazi-Germany (1918-1938) and the exile groups (1938-1945). A further chapter deals with Austria's participation in the Marshall-Plan and the Organization for European Economic Cooperation (OEEC, 1947-1953). The next chapter focuses on the intended arrangements with the European Coal and Steel Community (ECSC), which were a tightrope act between Western orientation and neutrality (1954-1956). A further chapter shows the unsatisfactory membership within the European Free Trade Association (EFTA) and the failed attempts of

association with the European Economic Community (EEC, 1961-1967). Free trade remained as a substitute solution (1972). One chapter demonstrates Austria's policy of "wait and see" (1972-1986) and a further one examines the attempts of full membership in the European Communities (EC and EU, 1987-1995). Light will be shed on the negotiations and agreements with Brussels (1993-1994) and on the implementation of the EU entry (1994-1995). Austria is also presented as a member of the EU until the Treaty of Lisbon came into force (1995-2009). The reader will get backgrounds of the country's long road to Europe which offers different developments of a story of ambivalence and complexity. The question will also be raised and answered how "Europe" became a controversial issue of domestic policies and national identity. A final assessment will sum up the main aspects. An annex with an edition of 100 documents, many of which new, a bibliography and a chronology provide additional and expanded information.

Groups, Coteries, Circles and Guilds Oct 24 2019 The essays in this volume analyse the significance (and failures) of literary coteries as spaces of aesthetic and political freedom. They offer an evaluation of the ethos of sociability in the women's salons of the Enlightenment, as the basis of the utopia of community and reflect on the notion of individual authorship within a group.

Diaspora and Citizenship Jul 13 2021 This collection of papers discusses the impact of diasporas on the articulations and practices of legal, political, cultural and social citizenship in their country of origin. While the majority of current citizenship debates focus on the challenges and directions in which diasporic and migrant communities impact on the citizenship regime in their country of settlement, the papers in this volume approach the study of citizenship from the perspective of the link between the sending state and its diasporic communities abroad. The papers discuss the role of language, religion, kinship, and other ethnic markers in diaspora politics and trace their implications for the articulations and practices of citizenship. Through discussing cases across political and geographical spectrums, and from different historical epochs the book broadens and enriches the debate on citizenship by demonstrating important ways in which diasporas impact on the delineation of citizenship regimes and the politics of national identity in their homeland. This links to the continued use of language as an ethnic marker, but also one which may be learned, allowing a certain degree of choice and shifting affiliations amongst putative members of a diaspora. This book was published as a special issue of *Nationalism and Ethnic Politics*.

World Migration Report 2008 Oct 04 2020 The task of formulating workable approaches to the management of international migration remains a formidable challenge for the community, one that will require both time and effort over the coming years. In what terms are we to develop comprehensive migration management strategies that will help us achieve coherence of action? What organizing principles should be adopted? Is there, in conceptual terms, a point of leverage to move the debate forward? Part of the problem lies in the difficulty of coming to a consensus about the fundamental nature of migration and its outcomes. Underlying the current and welcome inclination to acknowledge the potentially beneficial outcomes of migratory phenomena are many questions that are yet to be fully resolved. In the midst of that uncertainty there are suggestions worth exploring that contemporary migration - as opposed to whatever its historical antecedents may have been - is uniquely related to and defined by those processes of economic and social integration collectively known as globalization. The argument is that, whether by design or not, these developments are largely responsible for the creation of an unprecedented context in which human mobility seeks to find expression on a genuinely global scale. The *World Migration Report 2008* tackles this issue directly and seeks to identify policy options that might contribute to the development of broad and coherent strategies to better match demand for migrant workers with supply in safe, humane and orderly ways. Part A of the Report explores the nature and magnitude of the need for such strategies through the observation and analysis of a wide range of contemporary migratory patterns linked to economic purposes while Part B discusses the

contours of possible policy responses.
