They Ask, You Answer Apr 10 2021 The revolutionary guide that challenged businesses around the world to stop selling to their buyers and start answering their questions to get results; revised and updated to address new technology, trends, the continuous evolution of the digital consumer, and much more In today's digital age, the traditional sales funnel—marketing at the top, sales in the middle, customer service at the

bottom—is no longer effective. To be successful, businesses must obsess over the questions, concerns, and problems their buyers have, and address them as honestly and as thoroughly as possible. Every day, buyers turn to search engines to ask billions of questions. Having the answers they need can attract thousands of potential buyers to your company—but only if your content strategy puts your answers at the top of those search results. It's a simple and powerful equation that produces growth and success: They Ask, You Answer. Using these principles, author Marcus Sheridan led his struggling pool company from the bleak depths of the housing crash of 2008 to become one of the largest pool installers in the United States. Discover how his proven strategy can work for your business and master the principles of inbound and content marketing that have empowered thousands of companies to achieve exceptional growth. They Ask, You Answer is a straightforward guide filled with practical tactics and insights for transforming your marketing strategy. This new edition has been fully revised and updated to reflect the evolution of content marketing and the increasing demands of today's internet-savvy buyers. New chapters explore the impact of technology, conversational marketing, the essential elements every business website should possess, the rise of video, and new stories from companies that have achieved remarkable results with They Ask, You Answer. Upon reading this book, you will

Online Marketing with Organic Search Engine Optimization May 31 2020 Too many webpage owners feel that once they submit their page to a search engine they are guaranteed success. That is generally not the case. Simply submitting your web page to a search engine is not always enough to get any hits. Most web pages require search engine optimization to become truly successful. Search engine optimization (SEO) is the art and science of making web pages attractive to the search engines. The goal of search engine optimization is to have your website ranked in the top ten internet search hits that appear on the first page. Why is it important to be on the first page? It is important because the average internet user doesn't click on any of the sites listed on the second or third page. Out of sight, out of mind. One of our clients reported a two hundred and ten percent increase on her e-commerce sight when we redesigned her webpage for optimal search engine optimization.
