**Bullying Prevention and Intervention at School** Jan 03 2020 This book examines the continuum of bullying services, including prevention, intervention, and recovery. It reviews current theories, studies, and programs relating to this issue as well as outcome-based solutions to enhance best practices. Chapters discuss prevention and intervention services such as enhancing and promoting teacher skills in identifying abusive behaviors; interventions with bullies, victims, bystanders, and enablers; and curbing digital forms of bullying. International perspectives on program development and delivery offer fresh approaches to conceptualizing a school's particular bullying problems and creating effective policy. In addition, chapters cover program evaluation, guiding principles for evaluators, measurement methods, and documenting and disseminating findings. The book also provides recommendations for program development. Topics featured in this book include: An Adlerian approach to predicting bullying behavior. Bibliotherapy as a strategy for bullying prevention. Coaching teachers in bullying detection and intervention. Cyberbullying prevention and intervention. The "Coping with Bullying" program in Greek secondary schools. Factors that affect reporting victimization in South African schools. **Bullying Prevention and Intervention at School** is a must-have resource for researchers, clinicians and other practitioners, graduate students, and policymakers across such disciplines as child and school psychology, social work/counseling, pediatrics/school nursing, and educational policy and politics.

**Self-Injury in Youth** Sep 22 2021 This edited volume features evidence-based reviews and practical approaches for the professional in the hospital, clinic, community and school, with case examples throughout. Divided into five major sections, the book offers background historical and cultural information, discussion of self-injury etiology, assessment and intervention/prevention issues, and relevant resources for those working with youths who self-injure.

**Crisis Intervention Handbook** Dec 14 2020 Fewer concepts in American society have received more attention recently than the need for skilled crisis intervention. Images of crises inundate internet and newspaper headlines, television screens and mobile devices. As a result of the growing amount of acute crisis events portrayed in the media that impact the lives of the general public, interest in crisis intervention, response teams, management, and stabilization has grown tremendously. Skills and methods to effectively manage acute crisis situations are in high demand. While many claim to understand the rapidly growing demand for effective crisis management, few provide clearly outlined step-by-step processes to educate and guide health and mental health professionals. This is a thorough revision of the first complete and authoritative handbook that prepares the crisis counselor for rapid assessment and timely crisis intervention in the 21st century. Expanded and fully updated, the *Crisis Intervention Handbook: Assessment, Treatment, and Research, Fourth Edition* focuses on crisis intervention services for persons who are victims of natural disasters,

school-based and home-based violence, violent crimes, and personal or family crises. It applies a unifying model of crisis intervention, making it appropriate for front-line crisis workers-clinical psychologists, social workers, psychiatric-mental health nurses, and graduate students who need to know the latest steps and methods for intervening effectively with persons in acute crisis.

**Cochrane Handbook for Systematic Reviews of Interventions** Mar 17 2021 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a

standardized format, published in The Cochrane Library ([www.thecochranelibrary.com](http://www.thecochranelibrary.com)). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

**Assessment and Intervention with Children and Adolescents Who Misuse Fire** Feb 13

2021 It's surprisingly common for children and adolescents to play with fire and to actually set fires. A single fire has the potential to cause a cascade of serious consequences to children, families, and their community, sometimes with devastating impact. Yet, there is limited practical information and evidence-based advice available to help programs and practitioners with children and adolescents who engage in this behavior. *Assessment and Intervention with Children and Adolescents Who Misuse Fire* presents practical guidelines to facilitate the clinical assessment and treatment of youth firesetting. Based on nearly four decades of research and intervention experience, the treatment is directed toward reducing any inappropriate involvement in fire or related activities in order to lower the risk for property damage, personal injury, and other adverse consequences associated with these behaviors. This evidence-based intervention provides clinicians with a comprehensive program for school-aged children, early adolescents, and adolescents, and the child and his/her caregiver(s) are both important participants in treatment. The modular approach allows for therapists to be flexible in deciding which topics to cover in order to best meet the needs of children and families. This treatment model encourages more appropriate and safe behaviors in both children/adolescents and their caregivers and provides skills likely to discourage fire involvement. In addition, the materials promote controlling exposure to incendiary materials and opportunities to use fire. The intervention is provided in a single volume, encompassing a practitioner guide, parent workbook, and child/adolescent

workbook, including handouts for participating clients.

*The Definitive Guide to Addiction Interventions* Dec 02 2019 Written for a broad audience of medical and behavioral healthcare professionals, *The Definitive Guide to Addiction Interventions: A Collective Strategy* introduces clinicians to best practices in addiction interventions and bridges the gap between the theory and practice of successful intervention. Synthesizing decades of fieldwork, Louise Stanger explores the framework for successful invitations to change, what they look like in action, and how to adjust approach

by population, and Lee Weber serves as editor. The authors summarize and compare intervention models in use today and explain the use of family mapping and individual portraiture as clinical tools. The text also teaches clinicians to troubleshoot common situations as they help move clients toward positive life decisions. Practical, ready-to-use clinical tools follow the text in downloadable worksheet form.

Handbook of Life-Course Criminology Aug 29 2019 The wide-ranging scope of the Handbook of Life-Course Criminology covers genetics and environment, child offenders and late bloomers, the impact of school and peers, lifelong and time-limited criminal careers, and qualitative and quantitative methodologies. This unique Handbook is further set apart by its dual coverage of the leading edge of current research and innovative directions for future work in the field. Pathways to crime have been a central concept of criminology from its inception. Accordingly, a lifespan approach to the field has replaced earlier biological and sociological perspectives with a more nuanced understanding of offender behavior and a wider lens of study. The contributions to this Handbook break down issues of criminal and antisocial behavior from early childhood to late adulthood, examining developmentally targeted prevention and intervention strategies and reviewing emerging trends in research. Among the topics:

- Childhood: including physical aggression in childhood, pre- and peri-natal development, and environment.
- Adolescence: the impact of schooling, unstructured time with peers, gang membership and peer networks.
- Adulthood:

Adult onset crime, unemployment in emerging adulthood, crime and adult outcomes. ·  
Prevention and Intervention: community programs, lifetime intervention strategies, re-entry.  
This volume will be a valuable piece for researchers in Criminology and Criminal Justice as well as related disciplines such as Sociology, Developmental Psychology, and Social Policy. It will serve as an important reference for the current state of research, as well as a roadmap for future scholars. "This impressive Handbook provides comprehensive coverage of key developmental and life course issues in criminology from birth to adulthood, including biology, genetics, gangs, schools, neighborhoods, adult onset, desistance, and interventions. The research recommendations in each chapter are especially important, and they should stimulate advances in knowledge for many years to come. This Handbook should be required reading for all criminologists." David P. Farrington, Professor of Psychological Criminology, Cambridge University, Cambridge, UK "In just a few decades developmental criminology has become the dominant intellectual force in criminology. This volume demonstrates why. It provides incisive reviews of important themes in developmental criminology. More importantly, it lays out rich agendas for future research that should inspire the next generation of developmental criminologists." Daniel S. Nagin, Teresa and H. John Heinz III University Professor of Public Policy and Statistics, Carnegie Mellon University, Pittsburgh, PA, USA

*Cardiovascular Catheterization and Intervention* Jul 21 2021 Interventional cardiology refers to the catheter-based treatment of cardiovascular diseases and is one of the fastest growing fields in medicine. This updated text addresses recent advances in structural heart interventions, in particular aortic and mitral valve procedures. The advent of newer technologies presents both opportunities and challenges for the cardiologist to treat patients optimally. Interventional cardiologists are now at the forefront of peripheral and structural heart interventions. This new edition focuses on tailoring treatment to individual patients, taking into account specific risk factors and comorbidities, and appropriate use of devices. This second edition also provides useful tools, such as treatment algorithms, evidence tables, charts, tables, and illustrations to enhance the value of this volume as a practical reference tool. The online edition also includes several "how-to" videos.

**A Practitioner's Guide to Enhancing Parenting Skills** Mar 05 2020 A Practitioner's Guide to Enhancing Parenting Skills: Assessment, Analysis and Intervention offers a detailed and stepwise approach to problem behaviour analysis and management, based on the successful and evidence-based Enhancing Parenting Skills Programme (EPaS). This unique programme, based on 40 years of Professor Hutchings' clinical work, draws on social learning theory (SLT) principles designed to support families of young children with behavioural challenges. In this book, Hutchings and Williams combine clear practical guidance with case examples and useful checklists to deliver SLT-based interventions tailored to the unique needs of individual families. The case analysis identifies the assets and skills in the home situation and the functions of problem behaviours before creating a set of achievable goals. The latter part of the manual includes examples of intervention strategies to address several common problems, including toileting, eating and night-time problems. This book is an invaluable tool for all practitioners working in Early Years including CAMHS primary care staff, social workers, clinical psychologists, health visitors and school nurses.

*Social Support Measurement and Intervention* Aug 10 2020 Surgery and pharmaceuticals

are not the only effective procedures we have to improve our health. The natural human tendency to care for fellow humans, to support them with social networks, has proven to be a powerful treatment as well. As a result, the areas of application for social support intervention have expanded dramatically during the past 20 years. As these areas have expanded, so too has the literature on the theory and measurement of social support. Yet, the literature has focussed on very particular areas. Investigators in the social sciences have mainly focused on the protection that social support confers in the context of stressful life events and transitions, whereas studies in the health sciences have concentrated on the effects of social networks and supports on population mortality and morbidity. Although no single theoretical framework has been widely accepted, there is consensus that both the psychological sense of support and actual expressions of support play critical roles in maintaining health and well being. This book is a state-of-the-art resource for the selection and development of strategies for social support assessment and intervention. Designed for use by behavioral and medical scientists conducting studies of physical illness, psychological adjustment, and psychiatric illness in human populations, this volume presents a broad conceptual framework addressing the role of social support in mental and physical health. The book is divided into four sections. The first provides some historical context as well as a conceptual overview of how social support might influence mental and physical health. The second discusses techniques for measuring social networks and

support, and the third addresses the design of different types of support interventions. The final section presents some general comments on the volume and its implications for social support research and intervention. This resource is meant to aid researchers in understanding the conceptual criteria on which measurement and intervention decisions should be made when studying the relations between social support and health. Furthermore, the information provided on both measurement and intervention will be valuable to practitioners interested in designing and evaluating prevention and treatment initiatives. Sponsored by the Fetzer Institute as a follow up to their successful 1995 publication, *Measuring Stress*, this book will provide the most up to date research on the effects of social support interventions on physical and mental health.

**Early Detection and Intervention in Psychosis** Oct 31 2019 This new volume reviews early detection approaches and possible subsequent interventions for psychosis. After introductory chapters, various methods for early detection not only in adults, but also adolescents are described. In this context, the validity of the psychosis high-risk state is debated along with whether early detection is indeed helpful, or actually stigmatizing, for the patient. Further contributions review neuroimaging, including structural and functional MRI, as well as pattern recognition methods and measurement of connectivity abnormalities. Neurocognitive and neurophysiological assessments are also discussed in detail. The last part focuses on early intervention for emerging psychosis, including

psychological methods, non-pharmacological substances and pharmacological treatments. Overall conclusions and future perspectives are provided in a final chapter. This book is a state-of-the-art review of current options. It is important reading for researchers and clinicians faced with recognizing and treating psychosis in the most timely and effective manner possible.

**Understanding and Managing Parental Alienation** May 19 2021 In *Understanding and Managing Parental Alienation: A Guide to Assessment and Intervention*, Janet Haines, Mandy Matthewson and Marcus Turnbull offer a comprehensive analysis of contemporary understanding of parental alienation. Grounded in recent scientific advances, this is the first book of its kind providing resources on how to identify parental alienation and a guide to evidence-based intervention. Parental alienation is a process in which one parent manipulates their child to negatively perceive and reject the other parent. Recognising this phenomenon and knowing when to intervene is often the biggest challenge faced by practitioners and this book provides a guide to this process. Divided into six parts, it examines what parental alienation is and how it is caused, how it affects each family member as a mental health concern and form of violence, and how to assess, identify and intervene successfully from a legal and therapy standpoint. Taking on a gender-neutral approach, the book is filled with contemporary case examples from male and female perspectives, cutting-edge research, practitioner-client dialogues, and practitioners'

reflections to show the difficult realities of parental alienation. Practical and accessible, this is an essential resource for mental health professionals working with families experiencing parental alienation, as well as postgraduate students of clinical psychology, counselling, family therapy, social work, and child and family psychology. This book will also be of immense interest to family lawyers and mediators due to its multidisciplinary approach.

**Developing Practice Guidelines for Social Work Intervention** Nov 12 2020 This book bridges the gap between social work knowledge and empirically based practice. Although there is a significant need for the use of empirically tested and verified knowledge in social work practice, the empirical basis of support is nearly absent from practitioners' considerations as they make clinical decisions in routine practice. The authors advocate the development of readily available, accessible, and professionally sanctioned practice guidelines for use by practitioners, a necessity in the age of managed care and demands for greater accountability, effectiveness, and efficiency in practice. This book features a much-needed discussion of racial and ethnic differentials in relation to practice guidelines and on the relationship between practice guidelines and different aspects of service delivery.

*A Practical Guide to Early Intervention and Family Support* May 07 2020 Parental mental health problems and substance misuse affect a significant number of families. This handbook provides practitioners with early intervention techniques and effective support strategies for ensuring the best outcomes for these vulnerable families. Featuring pointers, models and practice examples, *A Practical Guide to Early Intervention and Family Support* considers the concept of resilience and effective family support. Assessing the policy context and possible barriers to support, it looks at assessment of need, safeguarding children, minimising negative impact, and most importantly, keeping families together where possible. Drawing on key research on the risks and impacts, this book demonstrates the need for a unified approach from a range of adult and children's services. This third edition has been fully updated to reflect developments in policy and services. Essential

reading for all professionals who are involved in providing services to families, it will also be of interest to service commissioners and those with an academic interest in what helps to support children and families in these circumstances.

**Mental Health Assessment, Prevention, and Intervention** Sep 30 2019 This book presents and integrates innovative ways in which the disciplines of school, clinical, and counseling psychology conceptualize and approach mental health assessment, prevention, and intervention for promoting child and youth well-being. It describes a synthesized model of clinical reasoning across school, clinical, and counseling psychology that demonstrates how decisions are made with respect to assessment, prevention, and intervention across situational contexts to ensure successful outcomes for children and youth. In addition, the volume examines theoretical, empirical, and practical frameworks and methods with respect to addressing the mental health and well-being needs of children and adolescents within and across school, clinical, and counseling psychology disciplines. In addition, the book presents transformative, constructivist, multicultural, innovative, and evidenced-based approaches for working with children and youth as well as their families relative to the identification of mental health concerns, enhanced service system integration, social justice and advocacy. This book is an essential resource for researchers, clinicians, therapists, practitioners, and graduate students in clinical, counselling, and school psychology, social work, educational psychology, child and adolescent psychiatry, developmental psychology,

pediatrics and all interrelated disciplines.
