Hope Reigns - Beyond 2012 Dec 29 2019 The Real Secret of the End of Time, Ascension Into The 5-Dimension The current events and those in the future do not signify the end of the world nor are they a punishment from God. They do, however, represent the end of time. Most importantly they symbolize the end of the world as we know and understand it. This book provides a message of hope for the dramatic period of darkness that is upon us, and a view into the future as New Terra ascends into the 5-Dimension. It depicts a vision of a world where heaven on earth is a reality. These cycles of time have been announced for centuries in Revelations of the Bible, the Mayan Calendar, and in the oral traditions of most known cultures. While history repeats itself, this is the last age of illusion, which means our evolution into a new level of humanity.

" —The Economist The captivating story of the family behind the Cartier empire and the three brothers who turned their grandfather 's humble Parisian jewelry store into a global luxury icon—as told by a great-

granddaughter with exclusive access to long-lost family archives " Ms. Cartier Brickell has done her grandfather proud. " —The Wall Street Journal The Cartiers is the revealing tale of a jewelry dynasty—four generations, from revolutionary France to the 1970s. At its heart are the three Cartier brothers whose motto was " Never copy, only create " and who made their family firm internationally famous in the early days of the twentieth century, thanks to their unique and complementary talents: Louis, the visionary designer who created the first men ' s wristwatch to help an aviator friend tell the time without taking his hands off the controls of his flying machine; Pierre, the master dealmaker who bought the New York headquarters on Fifth Avenue for a double-stranded natural pearl necklace; and Jacques, the globe-trotting gemstone expert whose travels to India gave Cartier access to the world ' s best rubies, emeralds, and sapphires, inspiring the celebrated Tutti Frutti jewelry. Francesca Cartier Brickell, whose great-grandfather was the youngest of the brothers, has traveled the world researching her family ' s history, tracking down those connected with her ancestors and discovering long-lost pieces of the puzzle along the way. Now she reveals never-before-told dramas, romances, intrigues, betrayals, and more. The Cartiers also offers a behind-the-scenes look at the firm ' s most iconic jewelry—the notoriously cursed Hope Diamond, the Romanov emeralds, the classic panther pieces—and the long line of stars from the worlds of fashion, film, and royalty who wore them, from Indian maharajas and Russian grand duchesses to Wallis Simpson, Coco Chanel, and Elizabeth Taylor. Published in the two-hundredth anniversary year of the birth of the dynasty ' s founder, Louis-François Cartier, this book is a magnificent, definitive, epic social history shown through the deeply personal lens of one legendary family.

The H. L. Hunley Feb 20 2022 On the evening of February 17, 1864, the Confederacy's H. L. Hunley sank the USS Housatonic and became the first submarine in world history to sink an enemy ship. Not until World War I—half a century later—would a submarine again accomplish such a feat. But also perishing that moonlit night, vanishing beneath the cold Atlantic waters off Charleston, South Carolina, was the Hunley and her entire crew of eight. For generations, searchers prowled Charleston's harbor, looking for the Hunley. And as they hunted, the legends surrounding the boat and its demise continued to grow. Even after the submarine was definitively located in 1995 and recovered five years later, those legends—those barnacles of misinformation—have only multiplied. Now, in a tour de force of document-sleuthing and insights gleaned from the excavation of this remarkable vessel, distinguished Civil War-era historian Tom Chaffin presents the most thorough telling of the Hunley's story possible. Of panoramic breadth, this Civil War saga begins long before the submarine was even assembled and follows the tale into the boat's final hours and through its recovery in 2000. Beyond his thorough survey of period documents relating to the submarine, Chaffin also conducted extensive interviews with Maria Jacobsen, senior archaeologist at Clemson University's Warren Lasch Conservation Center, where the Hunley is now being excavated, to complete his portrait of this technological wonder. What emerges is a narrative that casts compelling doubts on many long-held assumptions, particularly those concerning the boat's final hours. Thoroughly engaging and utterly new, The H. L. Hunley provides the definitive account of a storied craft.

The Doctor in the Victorian Novel Sep 25 2019 With the character of the doctor as her subject, Tabitha Sparks follows the decline of the marriage plot in the Victorian novel. As Victorians came to terms with the scientific revolution in medicine of the mid-to-late nineteenth century, the novel's progressive distance from the conventions of the marriage plot can be indexed through a rising identification of the doctor with scientific empiricism. A narrative's stance towards scientific reason, Sparks argues, is revealed by the fictional doctor's relationship to the marriage plot. Thus, novels that feature romantic doctors almost invariably deny the authority of empiricism, as is the case in George MacDonald's Adela Cathcart. In contrast, works such as Wilkie Collins's Heart and Science, which highlight clinically minded or even sinister doctors, uphold the determining logic of science and, in turn, threaten the novel's romantic plot. By focusing on the figure of the doctor rather than on a scientific theme or medical field, Sparks emulates the Victorian novel's personalization of tropes and belief systems, using the realism associated with the doctor to chart the sustainability of the Victorian novel's central imaginative structure, the marriage plot. As the doctors Sparks examines increasingly stand in for the encroachment of empirical knowledge on a morally formulated artistic genre, their alienation from the marriage plot and its interrelated decline succinctly herald the end of the Victorian era and the beginning of Modernism.
