What once was myth is today a medium. In Eduardo Kac: Life Extreme, Kac, the pioneer of "bio art" who is internationally recognized for celebrated works such as "Genesis" and the fluorescent green "GFP Bunny," has selected 36 new organisms and invited the prominent philosopher Avital Ronell to discover these new beings. The book, published in Dis Voir's new Encountersseries, is prefaced by Kac's "Anthroduction" and includes a whimsical taxonomy of taxonomies, offering a unique classification method for future species.

Archispeak Sep 10 2020 Widely used in architectural circles in the heat of discussion, the recurrent use of particular words and terms

has evolved into a language of design jargon. Commonly found in architectural literature and journalism, in critical design debate and especially in student project reviews, Archispeak can seem insular and perplexing to others and -- particularly to the new architectural student -- often incomprehensible. There is a need to translate architectural design concepts into spoken and written commentary -- each word in use embodying a precise and universally accepted architectural meaning. If we explore the vocabulary of this language we gain insight into good design practice and into collective understanding of what constitutes a refined architecture. This unique illustrated guide will help students understand the nuances of this specialized language and help them in communicating their own design ideas.
