Alternative Ecological Risk Assessment Jan 25, 2022 In *Alternative Ecological Risk Assessment* the author, Lawrence V. Tannenbaum, provides a critical review of current practices in the ecological risk assessment field and proposes alternatives that are supported by established science and keen observation. It is hoped that this approach will pave the way to a greater understanding of what appropriate and useful ecological assessments of contaminated sites should entail. He demonstrates that in most cases current practices do not provide a thorough assessment of ecological risk, and moreover, that endeavoring to assess ecological risk is actually an unnecessary undertaking at conventional hazardous waste sites. (He states, for example, that the concentration of contaminants often ignored by practitioners, questions why animals like deer are routinely assessed at 5-acre sites, and challenges the ecotoxicology data currently used.) The book is aimed at students and professionals in the fields of environmental science, ecology, ecotoxicology, and health risk assessment.

The World Views of the Obama Administration Jan 17, 2021 This book presents selected non-US views of the Barack Obama administration. Each chapter investigates eight years of the Obama presidency from a different national perspective. By bringing together fourteen country studies from all regions of the world, this volume offers an accumulative global view of the Obama White House's foreign policies and bilateral affairs. It provides

outside perspective on a presidency that was initially greeted with much enthusiasm world-wide, but fall out of favor over time in most countries. The overwhelming hope that was associated with the election of Barack Obama in 2008 turned to disillusionment world-wide; the changes in US external affairs he promised were only partially fulfilled and the world was reminded that America's place and role in the world would not change dramatically, not even under the inspirational Obama.

Teaching in the Post COVID-19 Era 24 2021 This handbook showcases extraordinary educational responses in exceptional times. Crimes in Archival Form Aug 08 2020 Crimes in Archival Form explores the many ways in which human rights "facts" are produced rather than found. Using Myanmar as his case study, Ken MacLean examines the finding practices of a human rights group, two cross-border humanitarian agencies, an international law firm, and a global NGO-led campaign. Foregrounding fact-finding, in critical yet constructive ways, prompts overdue conversations about the possibilities and limits of human rights documentation as a mode of truth-seeking. Such conversations are particularly urgent in an era when the perpetrators of large-scale human rights violations exploit misinformation, weaponize disinformation, and employ outright falsehoods, including deepfakes, to undermine the credibility of those who document abuses and demand accountability in the public opinion and in courts of law. MacLean compels practitioners and scholars alike to be more transparent about how human rights "fact" production works, why it is important, and when its use should prompt skepticism.

Therapy Response Imaging in Oncology July 01 2020 This book is a detailed guide to therapy response imaging in cancer patients that fully takes into account the revolutionary progress and paradigm shift in treatment approaches for advanced disease. The opening chapters describe the role of imaging as a "common language" for tumor response evaluation in oncology and address challenges and strategies in the era of precision therapy and cancer immunotherapy. Practical pitfalls are discussed, with emphasis on the importance of approaching cancer as a systemic disease and the need for increased awareness of drug toxicity due to novel therapies. Therapy response imaging in a wide range of cancer types is then comprehensively described and illustrated, using a disease-specific approach. A concluding section focuses on emerging approaches and future directions, including radiomics/radiogenomics, co-clinical imaging, and molecular and functional imaging. Therapy Response Imaging in Oncology will be of high value for radiologists, nuclear medicine physicians, and oncologists. It will also be of interest to cancer care providers and oncology trial investigators.

Interdisciplinary Education in the Age of Assessment Excerpt 2021 Interdisciplinary Education in the Age of Assessment addresses a prevalent need in educational scholarship today. Many current standards-driven curricula follow strict subject-specific guidelines, leaving educators little room for interdisciplinary innovation. This book gears itself toward developing assessment models specific to interdisciplinary education, positioning itself as a seminal volume in the field and a valuable resource to educators across the disciplines. Each chapter covers a major subject area (literacy, science, math, social studies, bilingual education, foreign language, and educational policy) and discusses methods of assessing integrated/ interdisciplinary curriculum and instruction.

Classroom Assessment Sep 20 2021 Jim Popham's widely popular Classroom Assessment shows teachers how to use classroom testing skillfully and formatively to dramatically increase their teaching effectiveness and the difference in how well students learn. Measuring College Learning Responsibility 2021 Accrediting boards, the federal government, and state legislatures are now requiring a greater level of accountability from higher education. However, current accountability practices, including accreditation, No Child Left Behind, and performance reporting are inadequate to the task. If wielded indiscriminately, accountability can actually do more harm than good. This innovative work looks broadly at how accountability is being considered by campuses, accrediting boards, education organizations, and governments in the US and abroad. It explores how new demands for accountability and new technologies are changing the way student learning is assessed. The author, one of the most prominent assessment researchers in the nation, provides a framework for assessing student learning and discusses historical and contemporary debates in the field. He details new directions in assessment, such as the Learning Assessment he helped develop, analyzes exemplary campus assessment programs, and proposes considerations necessary for designing successful accountability systems.

Enterprise Architecture for Global Companies in a Digital World 2020 This book investigates solutions incorporated by architecture boards in global enterprises to resolve issues and mitigate related architectural risks while also proposing and implementing an adaptive integrated digital architecture framework (AIDAF) and related models and approaches/platforms, which can be applied in companies to promote IT strategies for cloud/mobile IT/digital IT. The book is divided into three main parts, the first of which (Chapters 1-2) provides the background and motivation for AIDAF aligned with digital IT strategies. The second part (Chapter 3) provides an overview of strategic enterprise architecture (EA) frameworks for digital IT, elaborates on the essential elements of EA frameworks in the digital IT era, and advocates using AIDAF, models for architectural assessment/risk management, knowledge management on digital platforms. In turn, the third part (Chapters 4-6) demonstrates the application and benefits of AIDAF and related models, as shown in three case studies. This book to be a very nice contribution to the EA community of practice. I can recommend this book to digital IT strategists/practitioners, EA practitioners, students in universities and graduate schools. Foreword by Scott A. Bernard) "In this new age of the digital information society, it is necessary to adopt a new EA framework. This book provides state-of-the art knowledge and practices about EA frameworks

for IT practitioners, IT strategists, CIO, IT architects, and even students. It serves as an introductory text for all who drive the information society in this era."(From the Foreword by Jun Murai)

Knowledge Management, Trust and Communication in the Era of Social Media December 21, 2021 The article entitled "Selected Aspects of Evaluating Knowledge Management Quality in Contemporary Enterprises" broadens our understanding of knowledge management and estimates select aspects of knowledge management quality evaluations in modern enterprises from theoretical and practical perspectives. The seventh article aims to present the results of pilot studies on the four largest Information Communication Technology (ICT) companies' involvement in promoting the Sustainable Development Goals (SDGs) through social media. Studies examine which communication strategy is used by companies in social media. The primary purpose of the eighth article is to present the relationship between trust and knowledge sharing, taking into account the importance of trust in the efficiency of doing business. The results showed that trust is vital in sharing knowledge and essential for achieving a high-performance efficiency level. The ninth article presents the impact of social media on tourists' choices in tourism and tourist products' specificity. The study's main purpose was to indicate the most used social media in selecting a tourist destination and implementing Generation Y's journey. The 10th article aims to identify the most critical purposes of using social media by responding to women's attitudes and their respective countries' economic development. The research was done through an online survey from 2017–2018, followed by an analysis of eight countries' results. The article entitled "Integrated Question Answering System for Natural Disaster Domains Based on Social Media Messages Posted at the Time of a Natural Disaster" presents the framework of a question-answering system that was developed using a Twitter dataset containing more than 9 million tweets compiled during the Osaka North Earthquake that occurred on April 16, 2018. The authors also study the structure of the questions posed and develop methods for classifying questions into particular categories to find answers from the dataset using an ontology, word similarity, keyword frequency, and natural language processing. The book provides a theoretical and practical background related to trust, knowledge management, and communication in the era of social media. The editor believes that the collected articles can be relevant to professionals, researchers, and students' needs. The authors try to diagnose the current situation and show the new challenges and future directions in this area.

Angels and Superheroes Oct 10 2020 The school accountability movement's focus solely on improving standardized test scores is dehumanizing. There is no standardized child. In the rush to quantify, evaluate, and ostensibly improve the American educational system, we have forgotten that education is complicated. An attempt to distill it into a simplistic measure will fall short – and will compromise the nobility of the work we can do. How can teachers continue to do the incredibly challenging work of effective education in an environment that is downright damaging? We can save the soul of education by resisting the dehumanization of students. We can shield children by embracing social-emotional learning, building trust, and displaying compassion. There is no quick-fix to creating a nurturing relationship. There is no single data point that can measure it. Teachers must commit to being present, paying attention, maintaining consistency, engaging in hard work, practicing empathy, and working together. *Angels and Superheroes* provides specific, reproducible practices designed to help teachers cultivate trust and compassion, while managing the pressures of the testing movement. With time-proven and cutting-edge research, this book provides engaging examples, concrete strategies, and implementation resources to support teachers in bridging the divide between why they chose this career field – the work that which is currently being required of them – the test scores.

MRI for Radiotherapy Jul 27 2019 This book provides, for the first time, a unified approach to the application of MRI in radiotherapy that incorporates both a physics and a clinical perspective. Readers will find detailed information and guidance on the role of MRI in all aspects of treatment, from dose planning, with or without motion, through to response assessment. Extensive coverage is devoted to the latest technological developments and emerging options. These include hybrid MRI treatment systems, such as MRI-Linac and proton-guided MRI, which are ushering in an era of real-time MRI guidance. The past decade has witnessed an unprecedented increase in the use of MRI in the radiation treatment of cancer. The development of highly conformal dose delivery techniques has led to a growing need to harness advanced imaging for patient treatment. With its flexible contrast and ability to acquire functional information, MRI offers advantages at all stages of treatment. In documenting the state of the art in the field, this book will be of value to a wide range of professionals. The authors are international experts drawn from the scientific committee of the 2017 MRI in RT symposium and the faculty of the ESTRO teaching course on imaging for physicists.
